Newcastle, Oct. 13, '85.

**Valuable Property FOR SALE.**

The subscriber offers for sale his commodious and valuable residence at Grand Ave. The House and land on which it stands, one acre in extent, is within easy reach of church and school house and in a fine commanding position, giving a grand view of the Bay. It is surrounded by three roads, one leading to Grand Ave., one to the station, and one to the Carleton Railway, about two acres distant.

The house is well finished, with good Out-houses and Wells, and is in every way well adapted for a Hotel or seaside residence.

For terms or other information apply to

J. H. MANN,  
Grand Ave., Gloucester Co.,  
N. B., Oct. 19, '85.

**E. LEE STREET, Proprietor.**  
McAllister Building,  
Next New Post Office.  
Newcastle, Sept. 22, '85.

**STRENGTH.**

STRENGTH to vigorously push a business; strength to study a profession; strength to regulate a household; strength to do a day's labor without pain, all this represents what is wanted in a broad hearted, energetic, "Oh, I wish I had the strength." If you are broken down, have no energy, or feel as if life were hardly worth living, you can be relieved and restored to health and strength by taking

**DAVIS' QUININE, IRON & WINE.**

which is a true tonic, a medicine universally recommended for all wasting diseases.

**TESTIMONIAL.**  
Upper-Caverhill, York Co., N. B., July 26, '82.

GEORGE H. DAVIS, Esq.—Dear Sir—In answer to your letter of enquiry relative to the benefit derived from DAVIS' QUININE, IRON AND WINE, allow me to say that I consider it a wonderful medicine, and one which has never been tried several others without having been benefited. I was induced to try your Quinine, Iron and Wine, and in a few days, having gained by its use my former strength and activity, and as for my appetite, it never was better.

Very truly yours,  
**ELIAH NAVINS.**

**DAVIS' QUININE, IRON & WINE,**  
PREPARED ONLY BY  
**Geo. H. Davis,**  
Corner Queen and Regent Sts., Fredericton,  
PRICE 50 cents. 6 BOTTLES FOR \$2.50.

**SCHOOL FURNITURE, SCHOOL DESKS, ETC.,**

Don't encourage Home manufacture unless you can save money. You can do so by purchasing your

**SCHOOL FURNITURE,**  
at

**CASSIDY'S SHARP AND DOOR FACTORY,**  
Chatham.

The Desk I make is best and best combined, and is offered to School Trustees. Desks polished, 7 lower in price than the same article can be imported for.

Sample to be seen at the Factory.  
**GEORGE CASSIDY,**  
Chatham, Jan'y 10, 1885.

**THOS. MALBY,**  
UNDERTAKER,  
Keeps constantly in stock

**Coffins and Caskets**  
of all kinds, and will supply BURIAL ROBES and all the FURNISHINGS necessary.

**HEARSE SUPPLIED**  
when required.

Newcastle, June 29, 1885. GEORGE BROWN.

**DAVID SIMPSON,** of Ohio, writes as follows: "He lost his hair and was quite bald. He applied MANN'S LINIMENT, and in a few days he had a good head of hair."

The latest freak of fashion is a crush hat for women. A man who sold a broken-in large hat at a concert has yearned to make a "crush hat" of it on the spot.

The "Electric" package Dykes are the most brilliant and lasting of all colors. Every package warranted to give satisfaction. Ask your dealer for them, and take no other. Price 10 cents. U.

**ROYAL BAKING POWDER**  
Absolutely Pure.

This powder never varies. A barrel of pure, strength and wholeness. More economical than the ordinary kind, and cannot be sold in competition with the multitude of low tests, short weight adulterated powders. Sold only in cases. ROYAL BAKING POWDER CO., 100 Wall St., New York.

**CONSCIENTIOUS DRUGGIST,**  
I would recommend for  
**DYSPEPSIA! INDIGESTION!**  
And kindred diseases, the use of  
**MALTOPEPSYN!**

Consumption and All Wasting Diseases.

The use of  
**MORSE'S CARBOLATED NORWEGIAN COD LIVER OIL!**  
For Tending Inflammation and Nervous Debility.

**Glycerole of Celery Compound**  
(containing no opium).

YOU PROBABLY ASK WHY I RECOMMEND THESE. It is because I know them to be reliable remedies, endorsed by leading physicians throughout the Dominion, for the cure of specific diseases and not claiming to cure everything. Also because they are sold in competition with the multitude of low tests, short weight adulterated powders. Sold only in cases. ROYAL BAKING POWDER CO., 100 Wall St., New York.

**Dissolution of Co-Partnership.**

The partnership heretofore existing between Wm. Anslow and J. J. Anslow, Proprietors and Publishers of "The Union Advocate," Newcastle, is hereby dissolved by mutual consent. All persons having any just claims against the firm formerly known as W. & J. Anslow, will please to render their accounts, and all persons indebted to them either for Job Printing, Advertising, or subscriptions to the Advocate, are requested to have their accounts settled at once after a short time the books of the firm will be placed in the hands of a lawyer with instructions to collect the debts therein contained.

**W. C. ANSLOW,**  
Newcastle, Oct. 29, 1885.

**TO HOUSEKEEPERS**

**WATERLOO, STAR, AND NIAGARA COOKING STOVES.**

Just Received—One Car Load of the above well known stoves.

**CHARTER OAK COOKING STOVES.**

Warranted to be the best and most satisfactory working Cook Stove in the market, try one and be convinced.

XXXXXXXXXXXXXXXXXXXX  
**STALLY HOX**  
XXXXXXXXXXXXXXXXXXXX

A Cheap and Good Cooking Stove for Coal. All of which will be sold at BOTTOM PRICES for CASH or on reasonable terms for approval and credit.

**J. H. PHINNEY.**  
Newcastle, April 13, 1885.

**UNDERTAKING.**

The Subscriber is now prepared to attend to all orders for undertaking.

He will keep constantly on hand a stock of

**Coffins and Caskets**  
of all kinds, and will supply BURIAL ROBES and all the FURNISHINGS necessary.

**HEARSE SUPPLIED**  
when required.

Newcastle, June 29, 1885. GEORGE BROWN.

**THOS. MALBY,**  
UNDERTAKER,  
Keeps constantly in stock

**Coffins and Caskets**  
of all kinds, from the cheapest to the most expensive.

Burial Robes, black, brown and white, at all prices, and other furnishings usually found in an Undertaker's establishment.

**Miscellaneous.**

**Scott's Emulsion of Pure Cod Liver Oil with Hypophosphites.** Is more Nutritious and Strengthening than any other combined or single remedy. The Medical Profession universally attest this and prescribe it in Consumption, and all wasting conditions, with splendid results.

**IMITATING THE ARABIAN.**—"So the Arabs go to lodge and come home late just as you do," said Mrs. Manually to her husband, who was of a convivial turn of mind. "I don't know," he answered. "But I know you do, for I read in a paper that when an Arab enters his house he removes his shoes and keeps on his hat. That's what you do when you come home late from—"

**A Family Friend.**—No family should be without Perry Davis' Vegetable Pain-Killer. It can be given to the infant or the child, and the adult for Rheumatism. There is scarcely a disease to which it may not be beneficially applied. It contains no deleterious drug, but may be used for the various ailments of mankind.

The Blundering Druggist is not incapable of feeling. One of them at Prince-ton, put up morphine for quinine and thereby killed the son of a neighbor. He said he was sorry, and by way of reparation offered to let the bereaved parent poison his son. The offer was fair, but it was refused.

**Physicians having Consumptive patients, and having a stock of this very own prescription, should not hesitate to prescribe Allen's Lung Balm.** It has cured cases when all other remedies have failed.

It is harmless to the most delicate child. Price \$1.00 per bottle. See special notice.

There was a singular experiment at the Key West church fair. A bonnet was proposed to be voted to the handsomest married woman. Every husband who owned a wife, and who had not destroyed in the confusion that followed.

**TEMPERANCE AT WINDSOR JUNCTION.**—The general temperance meeting, presided by O. G. T. T. at Windsor Junction was opened last evening; the entertainment provided by the members of Solid Rock Lodge of the visiting friends of the order, was enjoyable; the speeches short and to the point, and the vocal and musical exercises well rendered. Much credit is due to the gentleman who presided, and his wife, who made every effort to have the hall erected before Xmas; and it is to be hoped the good work commenced last night will continue to increase with two-fold rapidity.

**Farm and Household.**

**FARM NOTES.**

For calves and yearling cows brain and osmazal are the best grain food. The object with these animals should be to keep them thrifty, without forcing.

It ought to be time now for cutting brass. Cut close to the ground, or just a little below the surface. Then the 7' shoo's that will start up in the spring can be kept down with a scybe.

Altho' work and calculation should not be allowed to stand between you and getting the stables fitted up for animal comfort during the winter. A day's work with hammer, nails, strips, straw and so on will soon accomplish a great deal.

To get eggs in winter rests chiefly but not wholly with the feeding. The best food for Indian cows is unadulterated milk. Besides the grain, there must be animal food. Milk in any shape is valuable. Refuse from the butchers, scrap cake and offal from the fish markets furnish the most valuable food for a slaughter house where hogs lungs could be had for almost nothing. A string was tied around each one and it was hung to a nail. There the hogs took well on egg returns. Thrown in loose and they could hardly devour the lugs. Vegetable food is also needed. Potatoes and turnips boiled and mashed with Indian meal can hardly be estimated. Cabbage is also acceptable. In the absence of every kind of green feed, sweet clover hay affords not a bad substitute. As material needed for the formation of egg shells, and also to aid in the grinding of the food that is going on in the gizzard, it must not be forgotten to provide laying hens with small gravel and grit, broken bones, shells and the like. Properly fed, and kept in a warm, well lighted and well ventilated house during the winter, hens will not fail to lay well.

Now more than any other season the farmer should make an effort to place all his farm implements under cover. It does not pay to leave machinery exposed or to put it away in a dry condition to become covered with rust. Winter will soon be here

A man appeared on the streets of Dun-ny, living a sparkling team of fully developed elks worth \$1,000, and capable of travelling 100 miles a day. The children thought Santa Claus had come to town.

The "Blazing" Package Dykes are the most brilliant and lasting of all colors. Every package warranted to give satisfaction. Ask your dealer for them, and take no other. Price 10 cents. U.

"Queen Natalie" of Serbia has bought forty American sewing machines. This is all very well; she will get the sewing-machine agents begin to yank at the door-bell of the palace every day to know whether she doesn't want to trade her machines for some other kind." remarks an experienced housekeeper.

The COMMON SENSE EYE WATER is the best remedy known for eyes made weak by overwork, or for inflamed and sore eyes. Sold at the drug stores—Try it.

The English language consists of about 30,000 words, yet when a man is putting on his coat, he takes six quarts of clean lumps of hot water in a covered tub to keep in the steam. It should then be passed through a fine sieve to obtain the flour of lime; add one-fourth of a pound of lard, a lump pulverized, one pound of sugar, three plants of rice flour, made into a thin, well-boiled starch or jelly, and one pound of glue, dissolved in hot water. This may be applied cold on the work, but for outside work it should be applied warm. A whitewash thus made is said to be more brilliant than plaster of paris, and to attain its brilliancy many years. It should be put on with a common painter's brush, and the coat should be applied after the first is well dried. The cost of the White House at Washington was formerly plaited with this composition.

An experienced gardener says that a sure sign to find out if plants in pots get wetting is to rap on the side of the pot, near the middle, with a finger knuckle. If it gives forth a hollow ring the plant needs water; but if the e is a dull sound there is still moisture enough to sustain the plant.

**COAL ASHES IN THE GARDEN.**

Many persons make no use of coal ashes, but it certainly is an excellent manure, particularly for evergreens. We say an old gardener, and an gardener where the soil badly has been brought into excellent condition by spading in coal ashes after other things had been tried without success. Fertilizing qualities are not claimed for coal ashes, but they give depth in a very inexpensive way. It makes it work easier, serves as a mulch and insects are not fond of working in it.

Some cows' teats are so small that the grasping process is thoroughly impracticable, says a writer. We advise the milking with a wet teat, as you can get more milk, and it is certainly more in harmony with nature. Kindness and gentleness with your cows are things that are greatly conducive to a liberal flow of milk.

An exchange gives the following bit of advice; have regular hours for milking. We may obtain the greatest yield by milking in a very quiet way. It makes it work easier, serves as a mulch and insects are not fond of working in it.

The over stimulation of dairy cows has already had its effects, showing the injury to cows by suffering with special food to produce wonderful butter at the expense of the future usefulness of the cow. Another point, also practically determined, is that those wonderful amounts of butter produced have been at an expense greater than the value of the product.

Some interesting experiments have been made in France on the advantage of giving water to milk cows warmed, instead of in its natural cold state. At the Agricultural school of St. Romy two cows were fed on the same food, but one was supplied with cold water and the other with the water at 113 degrees Fahrenheit. The latter yielded a third more milk.

**TO MAKE HENS LAY.**

If your hens have ample accommodations and good feed, and do not lay in summer, you may be sure that something is wrong with them. The comb is a good indication of a cow's health. If she is in a good healthy condition her comb will be a bright red; if otherwise, her comb will be of a pale color. Feed egg food twice a week. Give variety; a warm breakfast; raw meat quite often; wheat screenings and the like. Cayenne pepper will do the work of food given in abundance. The hens get no real much corn to laying fowls as it is very fattening.

Oats make hens poor, and often break in their oviducts, and they die. They crop up the pieces leading from the crop to the gizzard, and when this is the case the hens get no nourishment; another thing—the skin or hulls of the oats crop up the gizzard and prevent its action. When the crop is packed, it is perfectly safe to cut into it and remove the contents and then sew it up.

Another point, also practically determined, is that those wonderful amounts of butter produced have been at an expense greater than the value of the product.

Some interesting experiments have been made in France on the advantage of giving water to milk cows warmed, instead of in its natural cold state. At the Agricultural school of St. Romy two cows were fed on the same food, but one was supplied with cold water and the other with the water at 113 degrees Fahrenheit. The latter yielded a third more milk.

**TO MAKE HENS LAY.**

If your hens have ample accommodations and good feed, and do not lay in summer, you may be sure that something is wrong with them. The comb is a good indication of a cow's health. If she is in a good healthy condition her comb will be a bright red; if otherwise, her comb will be of a pale color. Feed egg food twice a week. Give variety; a warm breakfast; raw meat quite often; wheat screenings and the like. Cayenne pepper will do the work of food given in abundance. The hens get no real much corn to laying fowls as it is very fattening.

Oats make hens poor, and often break in their oviducts, and they die. They crop up the pieces leading from the crop to the gizzard, and when this is the case the hens get no nourishment; another thing—the skin or hulls of the oats crop up the gizzard and prevent its action. When the crop is packed, it is perfectly safe to cut into it and remove the contents and then sew it up.

A man appeared on the streets of Dun-ny, living a sparkling team of fully developed elks worth \$1,000, and capable of travelling 100 miles a day. The children thought Santa Claus had come to town.

The "Blazing" Package Dykes are the most brilliant and lasting of all colors. Every package warranted to give satisfaction. Ask your dealer for them, and take no other. Price 10 cents. U.

"Queen Natalie" of Serbia has bought forty American sewing machines. This is all very well; she will get the sewing-machine agents begin to yank at the door-bell of the palace every day to know whether she doesn't want to trade her machines for some other kind." remarks an experienced housekeeper.

The COMMON SENSE EYE WATER is the best remedy known for eyes made weak by overwork, or for inflamed and sore eyes. Sold at the drug stores—Try it.

The English language consists of about 30,000 words, yet when a man is putting on his coat, he takes six quarts of clean lumps of hot water in a covered tub to keep in the steam. It should then be passed through a fine sieve to obtain the flour of lime; add one-fourth of a pound of lard, a lump pulverized, one pound of sugar, three plants of rice flour, made into a thin, well-boiled starch or jelly, and one pound of glue, dissolved in hot water. This may be applied cold on the work, but for outside work it should be applied warm. A whitewash thus made is said to be more brilliant than plaster of paris, and to attain its brilliancy many years. It should be put on with a common painter's brush, and the coat should be applied after the first is well dried. The cost of the White House at Washington was formerly plaited with this composition.

An experienced gardener says that a sure sign to find out if plants in pots get wetting is to rap on the side of the pot, near the middle, with a finger knuckle. If it gives forth a hollow ring the plant needs water; but if the e is a dull sound there is still moisture enough to sustain the plant.

**COAL ASHES IN THE GARDEN.**

Many persons make no use of coal ashes, but it certainly is an excellent manure, particularly for evergreens. We say an old gardener, and an gardener where the soil badly has been brought into excellent condition by spading in coal ashes after other things had been tried without success. Fertilizing qualities are not claimed for coal ashes, but they give depth in a very inexpensive way. It makes it work easier, serves as a mulch and insects are not fond of working in it.

Some cows' teats are so small that the grasping process is thoroughly impracticable, says a writer. We advise the milking with a wet teat, as you can get more milk, and it is certainly more in harmony with nature. Kindness and gentleness with your cows are things that are greatly conducive to a liberal flow of milk.

An exchange gives the following bit of advice; have regular hours for milking. We may obtain the greatest yield by milking in a very quiet way. It makes it work easier, serves as a mulch and insects are not fond of working in it.

The over stimulation of dairy cows has already had its effects, showing the injury to cows by suffering with special food to produce wonderful butter at the expense of the future usefulness of the cow. Another point, also practically determined, is that those wonderful amounts of butter produced have been at an expense greater than the value of the product.
