## APPLIES NEW TESTS FOR AUTO DRIVERS

Convinced that the great number of accidents in the United States annually can be cut down if the greater care is used in preventing unfit persons from driving motor cars, the National Association of Taxicab Owners, with headquarters in Chicago has retained Dr. A. J. Snow, industrial psychologist, to devise a series of psychological tests which may be applied in a few minutes to anyone and which it is declared, will reveal without fail whether that person can safely be trusted at the steering wheel of an auto.

Dr. Snow devised three tests which reveal whether the subject is naturally cautious or careless; what the general standard of intelligence is, and whether the "fear-time reaction" or response to the immediate needs of a sudden emergency is quick enough to make that person a safe driver. He has spent many weeks checking his tests against the accident records of chauffeurs employed by Chicago taxicab companies. The drivers have been put through examinations and graded. In more than 90 per cent of cases, it is declared those who made low grades in the tests were found to have unfavorable accident records upon the personal cards of the companies which employed them. Those who made good grades were likewise found to have clean records as regards accidents.

The work of checking the tests among Chicago chauffeurs is still going forward. When enough drivers in Chicago have been examined to satisfy the National Association of Taxicab Owners, Dr. Snow will be sent to other principal cities of the country to conduct further university.

## The Cause of Cancer Has Been Discovered

Toronto, July 15.—I do not wish to enter into any controversy but there is not a shadow of doubt that Dr. Glover has discovered the cause of cancer.

This statement was made by Dr. J. Loudon, chief physician of St. Michael's Hospital, Toronto who returned to the city Sunday morning after spending some time in the laboratory of Dr. Glover of New York. Dr. Loudon attended the recent medical convention in Philadelphia at which Dr. Glover appeared.

Similar endorsement of Dr. Glover's claim to have found the cause of cancer was voiced by Dr. J. M. McCormack leading physician of the city who also attended the convention at Philadelphia. Dr. McCormack said "I am absolutely convinced that Dr. Glover has the cause of cancer. I have seen and also subcultured the micro-organism."

## WRIGLEYS

Chew it after every meal

It stimulates appetite and aids digestion. It makes your food do you more good. Note how it relieves that stuffy feeling after hearty eating.

## DREADNOUGHTS OF AIR BEING BUILT

Because of naval air work being carried on at remote sea stations the public have little or no conception of the great navy of the skies that is being built by the British Air Ministry. Development tests and experiments are carried out secretly but trials are soon to be made with some of the most recently completed sea air-craft, which are veritable flying dreadnoughts.

One of these sea-air monsters which will leave the stocks within the next few weeks, has a hull measuring more than 50 ft. in length and is very formidably armed. It will be able to settle on the roughest water and will operate exactly as if it were a battleship with wings.

There are more than a dozen entirely new types of sea-air planes now on the stocks, many of them almost ready to undergo the exhaustive official tests that are applied before the machines are ordered in bulk.

These "hush hush" craft vary from wonderful scout machines that will operate from the decks of the queer looking aircraft-carriers with which the navy is now equipped, to Dreadnoughts of the air, manned by seven, able to remain at sea for two or three days, and carrying bombs, torpedoes and several machine-guns.

In the latest types of aerial Dreadnoughts machine-guns are fitted in the wings. This gives the gunners a complete field in which to operate. There is no "blind spot" and attacking planes will not be able to "sit on the tail" of the flying ship with impunity from attack.

Other wonder craft are also being built. There is a five-seater which is intended primarily for coast defense work. It will be able to take a hand in warding off either sea or air craft. Because of that it has not been designed on specialist lines. It will carry out reconnaissance work, swoop down when traveling at nearly three miles a minute, and fire torpedoes or "drop bombs on battleships or other seacraft.

In several of these new machines it is intended to fit the new 1,000 h.p. Napier Club engine, the most powerful aero motor that has yet been actually and successfully flown. An engine that will develop 3,000 h.p. and having only 12 cylinders has recently been the subject of experimental bench tests.

## To Go Over Niagara Falls in Rubber Ball

Tobby Leach according to his latest statement is determined to go over the horse shoe falls in a rubber ball. Leach says he will make the trip either on July 26 or Aug. 5. He now says that because of prohibition on the part of the authorities he will be dropped from an airplane into the stream near the Ontario Power Plant on this side and allow himself to float over the cataract.

## Allies Seek Gold Sunk in German Warship

While the allied premiers this week are renewing their efforts to extract reparations from Germany a group of divers belonging to the three chief creditor nations will begin their attempt to extract 100,000 gold marks supposed to be lying on the bottom of the sea near Ostend.

The German torpedo boat Tubantia, which was sunk less than five miles off the Belgian coast in 1917, was said to have been carrying that amount for propaganda use in America, and if the money is recovered it will be gladly welcomed by the creditors of the Reich.

## PRINCE SAILS AUGUST 25TH

It is announced that the Prince of Wales will sail for Canada with four or five friends on August 25th, and will return to England about the beginning of October. No elaborate arrangements are being made for the trip and the Prince, at his own request, will travel as an ordinary first class passenger.

## Here and There

The value of Ontario's mineral production for the first quarter of the present year, as shown by a report of the Department of Mines, has increased \$2,383,000 over the corresponding quarter of last year, the total being \$11,575,161 and \$9,241,833 respectively. Silver was the only metal of importance to record decreased production during the period under review.

Among the passengers sailing on the Canadian Pacific liner "Mont-laurier" for England on July 8th, was E. W. Beatty, Chairman and President of the Canadian Pacific Railway. While in England, Mr. Beatty is scheduled to address the Associated Advertising Clubs of the World on July 17th on the subject of "Building an Empire with Advertising."

Excellent reports as to the hunting in the Caribou district of British Columbia are being received. F. W. Fridham and Fred. Shaver recently returned from a month's hunt in that district with an excellent specimen of grizzly bear weighing about 1,400 pounds. They saw moose, caribou, deer, black bear, sheep and grouse, and consider the district a hunter's paradise.

Addressing the annual meeting of the Bond Dealers' Association of Toronto recently, the president declared that during the 12 months ending May 1st, \$507,177,000 worth of Canadian bonds had been distributed, this being by far the largest total issued in the Dominion in any post-war year. The most striking feature in this connection is that about 80 per cent was absorbed within the borders of Canada.

On June 18th Winnipeg, Man., celebrated the fiftieth anniversary of its incorporation. From a struggling frontier village of the 70s, Winnipeg has forged into the position of third largest city in the Dominion, with continental repute as a railroad centre. It is the Gateway of the West and 100,000,000 bushels of prairie grain pass through it to the head of the lakes, whence it goes to the markets of the world.

Twenty-five officers and 200 men of the Royal Navy, from the special service squadron headed by H.M.S. Hood, enjoyed a trip through the Rockies over the Canadian Pacific lines while their ships were anchored at Vancouver recently. The sailors, who made a point, in true naval style, of seeing and doing everything, were enthusiastic over the scenery at such show-places as Banff and Lake Louise, which they declared the most beautiful they had seen in all their world cruise.

To add encouragement to the raising of high-class swine, which is being fostered by the governments of Manitoba, Saskatchewan and Alberta, the Canadian Pacific Railway is awarding a championship cup to the Boys' and Girls' Swine Clubs winning the club competitions in these provinces. The cups are for annual competition, but will become the property of the club if won for three years in succession. Medals will be awarded individual members. This year winning teams resident on the Company's lines will also be granted a free trip to the Royal stock show at Toronto.

The Arts, Science and Letters Society of the Province of Quebec recently sent a questionnaire to the various parishes of Quebec and Montmorency counties, seeking information as to the age and size of families residing in those territories. It was discovered that the family of Ismael Bedard had remained on the same land at Charlesbourg since 1629, that the largest family in Montmorency was that of Hector Laliberte, of St. Jean, Island of Orleans, who has 20 children living, and that Joseph Gagnon, St. Pierre, Island of Orleans, has the largest number of living descendants, 210.

hotel in Restigouche County or not but thought it was very unlikely unless land could be obtained for a more reasonable figure than that demanded for it now.

## The Cause of Sickness

### Almost Always due to Weak and Impoverished Blood

Apart from accident or illness due to infection, almost all ill-health arises from one or two reasons. The mistake that people make is in not realizing that both of these have the same cause at the root, namely poor blood. Either bloodlessness or some other trouble of the nerves, will be found to be the reason for almost every ailment.

If you are pale, suffering from headaches or breathlessness, with palpitation of the heart, poor appetite and weak digestion, the cause is almost always poor blood. If you have nervous headaches, neuralgia, sciatica and other nerve pains, the cause is exhausted nerves. But run down nerves are also a result of poor blood, so that the two chief causes of illness are one and the same.

If your health is poor; if you are pale, nervous or dyspeptic, you should give Dr. Williams' Pink Pills a fair trial. These pills act directly on the blood, and by enriching it give new strength to worn out nerves. Men and women alike greatly benefit through the use of this medicine. If you are weak or ailing, give Dr. Williams' Pink Pills a fair trial and you will be pleased with the beneficial results that will speedily follow.

If your dealer does not keep these pills you can get them by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## MAY NOT BUILD IN RESTIGOUCHE

### Proposed C. N. R. Summer Hotel Project May Not Materialize.

(Campbellton Graphic)

A number of railroad officials from Ottawa and Moncton were in town on Saturday en route to Dalhousie where they inspected a site in connection with the hotel project of the C.N.R. An official of the Dept. of Railways and Canals at Ottawa, who was one of the party informed the Graphic that nothing definite had been decided on yet but spoke favorably of the Dalhousie property. When asked about the Black Point site, he said that the surroundings were very favorable for such a proposition but that it was not considered feasible from a financial standpoint at the high price asked by the landowners. He said he did not know whether the railroad would build a summer
