

Convective heat is particularly applicable in cases where radiant heat is not indicated and the reverse is quite true. Their differential thermic value is clearly set forth in the October issue of the Bloodless Phlebotomist, along with an interesting paper by Dr. David MacIntyre, a Cunard Surgeon, upon "Drugs at Sea."

In the same issue of the Phlebotomist, Dr. Edward Parrish, of Brooklyn, presents his methods of treating Tic Douloureux and Dr. Leverett, of Yonkers, relates his experience in the successful handling of ivy poisoning cases, which in many instances are quite as intractable as Tic Douloureux.

In addition to these papers, much other interesting and instructive material is given, and it is worth while to write to the Denver Chemical Mfg. Co., New York, for a copy of the Bloodless Phlebotomist for October, which they will send upon request.

DYSMENORRHEA AS A PRE-DISPOSING CAUSE OF NEUROSIS.

Functional irregularities of the organs of generation, particularly if accompanied by pain, is possibly the greatest factor in the increasing number of women who consult the general practitioner presenting marked neurotic manifestations.

Where malformation is not present, successful treatment depends not only upon the recognition of the cause, but the proper selection of a remedy for its removal.

To normalize pelvic circulation and to relieve pain without resorting to an opiate is the object to be accomplished. Since the time of Sims, the sheet anchor of the general practitioner in the treatment of menstrual and obstetrical conditions has been Hayden's Viburnum Compound, a dependable and reliable product.

In neurotic conditions dependent upon menstrual irregularities, Hayden's Viburnum Compound not only exerts a calmative, but a corrective influence.

Samples of H. V. C., with formula and literature, will be forwarded upon request to the New York Pharmaceutical Company, Bedford Springs, Bedford, Mass.

CEREBRO-NERVOUS AFFECTIONS OF WOMEN.

Prof. Charles J. Vaughan, Chair of Gynaecology, Atlanta College of Physicians and Surgeons, writes: "Neuralgia constitutes the great cause
