Discussant: Michael MacKinnon

Michael MacKinnon is an Associate with the Policy Research Unit at the University of York. He is also a senior lecturer in the School of Management at the University of York. He has published extensively on issues relating to the management of change, organizational development, and the role of the manager in the 21st century. He is currently working on a project funded by the Department of Health and Social Services, York, to develop a framework for the management of change in the health sector. He is also a member of the Council for Gender Equality in the Cabinet Office.

Dr. Duxbury has published widely in both the academic and practitioner literatures in the area of work-family conflict, supportive work environments, stress, telework, and supportive management. She has also given over 150 plenary talks on these issues to both public and private sector audiences.

Within the business school at Carleton, Dr. Duxbury teaches the third and fourth year courses in Systems Analysis as well as the masters course in Management of Technology and the Ph.D. course in Managing Change.
