FRIDAY MORNING, MARCH 13

Much satisfaction will be felt at the a remarkable character, and the many days when his life hung in the balance brought most people in the province less to the contemplation of his recovery than to preparation for his loss. Many notable tributes have been paid him, and he has expressed in earnest and grateful words his appreciation of the esteem and affection displayed. It will be generally hoped that the prolonged vacation which he now contemplates will completely restore him to the vigor which his years had so slightly diminished.

failed to grasp the situation which has been so brilliantly analyzed and so wisely and honestly handled by President Wilson.

It is rather surprising that the board of control of the City of Toronto should be so reluctant to support the lake cities of the Province of Ontario in the vigorous efforts that are osing made to secure the construction of a deep waterway, and I would suggest that the board of trade and the press of the city take action to place the matter forcibly befor the board of control. Many notable tributes have been paid so slightly diminished.

INTERNATIONAL TRADE.

In nothing is the gradual shrinkage of the world made more apparent than in the facilities now available to turn the current of trade into the most profitable channels. More and more is the civilized world learning its entire interdependence, and that every local disturbance brings with it an endless chain of trouble. This, more in the facilities now available to turn

This looks like a case where special protection, either by legislation or otherwise, should be provided for excitable and enterprising editors of original views. What has happened to Mr. Farr might happen to another, and the jail doctor might not always be so

EVERY LAKE PORT A SEAPORT

Editor World: I have for the past few days been on a business trip thru the western section of the Province of Ontario, and my attention has been drawn to the enthusiasm displayed by the people with regard to the con-struction of a propused deep water-way to the ocean. Everyone in this district is talking deep waterway, and appears convinced that immediate action will be taken to develop the St. Lawrence route to the sea. There is just one discordant note in utterances of the people regarding this matter, and strange to say it has reference to the apparent apathy of the City of Toronto in connection with the proposition. While Hamilton and other lake cities have given earnest

This carries useful hints for the lodge, society, factory and Sunday school as to where to go on Sunday school as to where to go on their annual summer outing and how to go there. Excursion rates from To-ronto to all principal points for or-ganized parties of one hundred or more are shown in convenient form.

An interesting fact brought out which has probably not been generally realized is that it is not necessary to travel over a thousand miles to see one of the world's largest undertakings in ship canal building, since the new Welland Canal is regarded by en
