### CANADA A WORLD FORCE.

Catholic Paper Comments on Birth of New Province.

London, Sept. 1.—(C.A.P.)—The Tablet, the leading Catholic organ in Great Britain, says: "Not in vain has Canada been termed a great experiment. Her advance towards the leading place in the development of the western world has just reached a new stage in the inauguration of an autonomous government in the Northwest. The calculations of those who predicted her future state gravitation to the United States have been falsified, and those prophesies discredited by the operation of natural forces which mold the destinies of nations to the discomfiture of theoretic forecasts. Canada's ambitions have expanded with her material development, and with the presence of future greatness has come the consciousness of a separate mission among the peoples of the earth. If any man has been instrumental in shaping and inspiring these aspirations it is Sir Wilfrid Laurier, and under his sway they have taken definite form and shape."

### BRITISH WEST INDIES.

In view of the interest that is now being taken in the federation of the British West Indies with Canada, one of the most important points would be the gain of the West Indian market for her produce and manufactures. The total imports of the British West Indies are about \$30,000,000, comprising principally fish and food stuffs, timber, flour, hay, provisions, etc. By far the larger quantity of these are supplied from the United States. Nevertheless, Canada has been a very small one. Source of supply of salt, fish and lumber, but of the other articles the percentage has been but a very small one. There is no excuse for this, because Canadian flour, potatoes, peas, salt meats, canned goods, dairy products, breadstuffs, cotton goods, furniture, boots, clothing, etc., are in no way inferior to American goods. One of the principal reasons why the bulk of this trade has gone to the United States has been due to the superior transportation facilities that have been offered by our neighbors to the south of us. At last, however, the Canadian steamers trade between United States and West India ports from Canada, and with a better service than the Canadian ports the greater part of this trade ought to be diverted to Canada.

The exports of the West Indies consist exclusively of agricultural products, viz., sugar (which can be produced from the cane cheaper than from beet root), coffee (which is produced in the Blue Mountain district of Jamaica, realizes the highest price in the markets of the world), cocoa, now the most important industry in Grenada, Trinidad, Dominica and St. Lucia and steadily increasing in Jamaica, where the quality is exceedingly fine. In addition to this the export of tropical fruits is steadily on the increase. Jamaica oranges and bananas have such a world-wide reputation as to need no comment. All of these articles have a large consumption in Canada and therefore direct lines of fast steamers would have no difficulty in obtaining full cargoes both ways, and enable them to compete at as low rates of freight as now rule from United States ports.

We are glad to learn that this question of fast steamship service is receiving considerable attention at the hands of the Elder Dempster and other well known companies. With the possibilities of such a service, which is only waiting for improved steamship facilities, it would only be a short time before this is an accomplished fact. With federation and the fast steamship service which would naturally follow, Canada would gain the most of the \$30,000,000 which is now lost to her.

# Free Cured

Not One Penny in Advance or on Deposit

Forty years ago, when I first discarded drugs and devoted my whole attention to the study of Electricity, I could not afford to do business on a day-to-day basis, but I have now perfected my Electric Appliances, and the knowledge I have gained from all these years of experience and research is so great that I will now give my world-famed Dr. Sanden Electric Belt, with Electric Suspensory, to any man who suffers from Nervous Debility, Varicose, Losses, Rheumatism, Lame Back, Stomach, Liver and Kidney Troubles, absolutely

## FREE UNTIL CURED

I don't ask you to pay or deposit one cent until I convince you. Simply call or write for a Belt and wear it for two months, and if cured pay me the usual price—in many cases not over \$5.00. If not cured, return the Belt, and that ends the matter. If you prefer to pay cash, I give you the usual wholesale discount. Be sure you get the genuine. My great success has brought forth many imitators, and I must caution the public against their worthless, blistering imitations.

Call to-day and take a Belt along, or write for one and my two valuable books on Electricity and its medical uses. Sent, sealed, free by mail.

# LABRADOR MISSION FAILS

SUN OBSCURED BY CLOUDS  
Observation Parties Sent Out by Canada and Lick Observatory Get No Photographs.

St. John's, Nfld., Sept. 1.—The Lick Astronomical Observatory expedition which went to Cartwright, Labrador, to observe the solar eclipse of Wednesday last, met with complete failure. Heavy banks of clouds obscured the heavens during the entire period of eclipse, and the result of the attempted observations was so unsatisfactory that the astronomers will not even attempt to develop the photographic plates which were exposed.

The report of the failure of the mission was brought here to-day by Governor MacGregor, who had accompanied the expedition to Cartwright, and who returned here to-day on the warship Scylla. The governor said he feared also that the expedition sent out by the Canadian government, which was located at Hamilton, only about fifty miles from Cartwright, was fully as unfortunate as those from Lick.

Early morning conditions last Wednesday were very favorable for observation of the heavens, the governor said, and every preparation had been made for the work, which was to begin about 8 a.m. Before that hour, however, banks of clouds rolled up, and during the whole period of totality of the eclipse the heavens were obscured.

Saw Eclipse From Egypt.  
London, Sept. 1.—Prof. Wm. Joseph Huxley of the Lick Observatory expedition cables to the Associated Press from Assuan, Egypt, that the expedition executed its eclipse program as planned. The elongates were in the form of streamers of the fish-tail type, with marked rays from the sun spot zones, especially from the southeast limb. North polar prominences distinctly occurred. Prominences were pronounced, especially those near the North Pole. The motion of the shadow bands was determined.

WON'T REMOVE EMBARGO.  
Britain's Reply to Request of Canadian Government.

Ottawa, Sept. 1.—The Dominion government has received a reply from the imperial authorities in answer to the request to remove the embargo on Canadian cattle. The British government, on a report of the British board of agriculture, has declined to do so. The report of the British board of agriculture sets forth that the trade in cattle between the colonies and foreign countries and Britain.

The embargo has been in existence since 1879. In 1891 there were imported into Britain from Argentina 4200 cattle. In 1899 the number was 8,000. In the case of the United States there were imported into Britain 16,000. In 1904 the number was 60,000. In 1905 there were imported from Canada 190,812, at a cost of \$3,315,000, and in 1904, 146,500, at a cost of \$2,547,000. Previous to 1903 the other highest year was 1900, when there were imported 120,468, valued at \$1,892,290.

The report goes on to say that in consequence of the enormous losses which the British agriculturists have incurred in the last few years, the increased pressure of colonial and foreign competition, it makes it more than probable that the British government will be taken against the introduction of disease consistent with the reasonable requirements of commerce, and the interests of consumers at home.

TRAIN DEMOLISHES STATION.  
Rear Cars Leave Track, Causing Death of Ten.

Witham, Eng., Sept. 1.—As the express train from London to Cromer on the Great Eastern Railway was entering Witham Station this morning several passenger cars left the track and crashed into the station buildings, causing the death of ten persons, six of whom were women, and seriously injuring twenty people. Among the killed was the porter of the station, who was sitting in a room in the station. He was crushed to death. Two ticket sellers were buried in the wreckage, but they escaped serious injury. The gasometers beneath the cars caught fire and consumed the wreckage, but the bodies were removed before the flames gained headway. It was the rear cars that left the track, and the front cars remained on the rails.

COMMENDABLE EXHIBIT.  
Model Tobacco Farm to Be Shown at St. John's World Government's Attention.

The culture of tobacco is daily assuming greater importance in the Province of Quebec. Anyone who has traveled thru the country districts is familiar with the broad green leaves of the plant, for almost every farm now has its tobacco crop.

Among the farmers, however, there is a lack of knowledge as to the proper method of dealing with the crop. To get it into condition for the market. To illustrate such methods, a model tobacco farm is being put up in the Sherbrooke Exhibition, of which it will form an interesting feature. The right way of growing, harvesting, drying, curing and packing tobacco will be shown on a large scale.

The educational value of this exhibit will be widely recognized, and is worthy of the attention of the government—especially of the Honorable Minister of Agriculture. It is the exhibit of a tobacco farm is one of their methods of showing the farmer how he can improve the quality and consequently the marketable value of his tobacco crop.

Negro Pays for Crime.  
Rosina, Miss., Sept. 1.—Word has just come that a negro named Boe has been lynched by a mob near the Leake plantation. The negro was charged with attempted criminal assault upon a white girl.

Kills Wife, Then Suicide.  
Milan, Ohio, Sept. 1.—In a quarrel with his wife to-day, Wm. Bachman shot her three times, one bullet passing thru the brain. Bachman then committed suicide by throwing himself into a well. Mrs. Bachman was killed.

Business Section Wiped Out.  
Mayville, Ky., Sept. 1.—Almost the entire business section of Flemingsburg, Ky., was destroyed by fire to-day. The railroad depot, several stores and two newspaper offices were burned.

Wife Admits Murder.  
Ballston, N.Y., Sept. 1.—The mystery surrounding the murder of James M. Muckleton, a farmer, has been cleared up by a confession from his wife, who admits she killed him.

# GERHARD-HEINTZMAN MINIATURE GRAND.

A New and Exceptionally Notable Piano.

In the Gerhard Heintzman display at the exhibition is to be seen a specimen of their latest production in piano-making, a "Miniature Grand," an instrument of beautiful proportion and appearance, and of exquisite quality of tone. It gives forth the quality of tone of its elder brother, the "Baby Grand"—full, sonorous, complete, but never the less in accordance with the requirements of its generally intended home, the advanced student, and the cultured amateur, while the space it occupies will not too greatly encroach upon the limitations of the ordinary parlor. This is a combination of excellences which must inevitably commend the Gerhard Heintzman piano to the attention of many people, and already the manufacturers are booking orders far in excess of their production. It is a new style in its great measure attributable to the fact that the word has been passed by leading stars of Toronto's musical profession, and that it is in its favor with overwhelming significance.

The "Miniature Grand" is, of course, only one of the features of the Gerhard Heintzman exhibit. There are, in addition, many representations of other instruments, all very beautiful, and one in particular somewhat singular. The last is rather of an olive-wood appearance, and is a lovely work of art. The special design would perhaps be best suitable in a room of specialized character. Another upright of dark, unpolished wood—suggests a fashionable club as a fitting home. Briefly, the Gerhard Heintzman display is a carefully designed in variety of style to suit the requirements of all who want pianos, and also sufficient to show that the company is fairly flooded with business, not only at the exhibition, but also at their very extensive warehouses, 97 Yonge Street.

TWIN POWERS MAY AGREE.  
Negotiations Between Sweden and Norway Will Result in Accord.

Copenhagen, Sept. 1.—It is expected that the negotiations between Norway and Sweden will soon result in a full agreement on the subject of the division of the border. The two countries have been at odds for some time over the subject of the border, and the negotiations have been going on for some time. The Swedish government has been insisting on the division of the border, and the Norwegian government has been insisting on the division of the border.

CAR BURNS NEXT CHURCH.  
Editor World: The members of the Presbyterian Church at the corner of Bathurst and Barton streets are much exercised over the report that the Street Railway are about to build a car barn next door to their new church, and believing that it would interfere very much with the services and also deprive the church of the property, it was suggested that a meeting be called in the vestry and invite the members of the church and the members of the congregation to attend.

Settlers' Low Rates West.  
The Chicago & Northwestern Railway will sell tickets daily from Sept. 15 to Oct. 31, 1905, to points in Utah, Montana, Nevada, Idaho, Oregon, and California. The rates are very low, and the service is excellent. The railway is a very important one for the settlers of the West.
