

Consumption is a disease of the stomach as well as of the lungs.

liver, is retained, and becomes a foreign constituent of the blood. In many cases when this takes place the skin becomes of a yellow tinge—the eyes yellow and inflamed, and the face covered with black spots, like worms, etc. Now, if ladies afflicted in this manner will take three or four of Radway's Pills every night, and a dessert-spoonful of the Sarsaparillian Resolvent three times per day, a happy change will soon follow; all these bad symptoms will soon disappear, and the weak, emaciated and wasting body will soon become healthy and robust. A lady called on me yesterday (4th of August, 1878); weight 160 pounds. She said: "Last March I left this city to go home to die; when I arrived at my home (Rochester) I was nothing but skin and bones—no appetite, no spirits, no sleep, but cold sweats and nervous trembling. I saw your book called 'False and True,' and at once commenced using your remedies. I used the Pills, 4, 5, 6, then 5, 4, 3, 2—in this order every night; the excrements that came from me were like clotted blood. I took the Sarsaparillian Resolvent—at first three times per day, then four, then five times per day—and had my spine rubbed three times per week with the Ready Relief. After using these medicines one month I was a new woman. I gained in flesh rapidly, my spirits became buoyant, appetite good, and my periods regular—that is what your medicine has done for me!"

EXTRAORDINARY CURES

Daily reported of diseases for which these remedies have not been recommended by us, and the reports of those wonderful cures have been as surprising to us as to the general public. We have for years received letters of cures of such extraordinary and marvellous character that we have refrained from publishing them, and the letters we now publish we withheld until urged by the writers and their friends, for the benefit of the public, to make them known. We give the names and post-office address of each, so that those interested may write them; and we also recommend the sick to write the ministers of the churches in each place, to ascertain the trustworthiness of the writers. We desire all who may feel inclined to commence the use of Dr. Radway's Remedies to learn all the facts respecting these cures, so "that their faith" in the remedies "may be well founded" in the hope of a cure.

For an account of the cures of Hannah P. Knapp and Mrs. C. S. Bibbins, see our Almanac for 1877, and "Radway and his Patrons." These extraordinary cures of Ovarian Tumors are becoming quite common by Radway's Resolvent. We will add a few more cases of Ovarian Tumors.

RADWAY & CO.

Ovarian Tumors.

HILLSBORO', OHIO, November 24th, 1878.

MESSRS. RADWAY & Co.—*Gentlemen:* As it no doubt affords you satisfaction to know of the success of your medicines, we write you an account of a cure of Ovarian Tumor by your Resolvent, which is exciting great interest in this community.

About eight years ago, the wife of one of the best known citizens of our county, and former member of our State Legislature, began to swell in the pelvis regions, and the physicians here could give her no satisfactory information in regard to the trouble. She went to her old family physician in Massachusetts, who told her, to her horror, the real condition. She consulted physicians in Boston, who advised an operation, to which she refused to submit. They were candid enough to tell her that they suspected adhesions of the sac of the tumor, which would make an operation very complicated and severe, and of course extremely hazardous.

The tumor had been steadily growing until last March, when her appearance was most miserable; her abdomen protruded far out and her general health was severely affected. A lady friend advised the use of the Resolvent. She began last March to take your Resolvent, Relief and Pills, according to the directions, but without apparent benefit, until about a month since, when suddenly she began to discharge enormous quantities of fluid from her bladder, having at the same time copious and repeated liquid discharges from her bowels. In one day the circumference of her body diminished to the extent

Breathing quick and vehemently is a sign of malignant disease.

Lime, Whiting and Magnesia are antidotes for Oxalic Acid.

Acute Inflammation may be subdued with evacuants and counter-irritants.
