San Francisco, May 18 .- Evidence is

accumulating against J. E. Blanther, suspected of the murder of old Mrs Philopena Langefeldt Friday night. Through the unwilling aid of his boon companion, George Dodge, and the voluntary statement of J. H. Lynch, a fellow roomer, Blanther's movements have been in part traced. It is believed that the murder of Mrs. Langefeldt took place before 11 o'clock Friday night. Between 11 o'clock and midnight Blanther entered the bathroom of the resi dence where he roomed to wash his hands. When J. H. Lynch was about to enter the room Blanther hastily departed without saying a word, and as Lynch stepped over to the wash basin he was surprised to see it was reddened

with blood. It is said that the police have recovered from a pawn shop a diamond ring which was stolen from Mrs. Langefeldt by the murderer. A description of Blanther has been telegraphed all along the Pacific coast.

To Look for the Pole-Ice Blockade in St. John's.

St. John's, May 20.-The Arctic explorer, Lieut. Robert Peary, is going north again this summer and a steamer is now being arranged here for that purpose. The object of the expedition is believed to be to secure for the Philadelphia Academy of Sciences the fortyton meteorite near Capt York, which Lieut. Peary discovered last year. Another ice blockade has suspended all shipping movements for the past

three days. The English steamer Nimrod has returned from Green's Pond, where, with land in view, she was jammed in the ice and blocked for sixteen days. She reports that the whole coast is blocked with ice, and that all the bays are full of it. Serious destitution exists, owing to the inability of traders to secure supplies from St. John's, navigation being impossible

The people are at many places eating their seed potatoes and at other places the inhabitants are making a general division of the stores of flour and provisions, to make out an existence until supplies are procurable. The blockade is having a damaging effect upon the cod-fishery, the fishermen being unable to begin operations.
