SIR ROBERT PROMOTED RECRUITIN

(Continued from page 1)
home could be gone after and possibly
secured."

Sir Robert added that he had interrupted only because he understood Mi Graham was attributing to him som action which had occasioned slackin in recruiting. He desired absolute! to deny that. Mr. Graham added the recruiting while thoroughly successful in Ontario would have been much mor successful if there had been more or ganization and co-operation in the government.

Hon. Mr. Graham.

Mr. Graham turning to Quebec at tacked the government for having appointed a Methodist clergyman as chief recruiting officer among the French Canadians. He claimed that the doctrine preached prior to 1911 by certain people in Quebec that we owed nothing to Britain and should not send a man to fight her battles had more to do with slowness of recruiting in Quebec than any other cause. Another cause was that when the war began the government of Canada had three members who had taken that position at every church door in Quebec. The people of Quebec challenged the sin cerity of the men who were asking them to enlist. Further than this, when

not a French speaking member who dared go on the platform and ask to

"Wrong," retorted Mr. Sevigny.
Mr. Graham declared that he was
not wrong and asked where Frenchspeaking members of the government
were making speeches. He maintained that when the war broke out the
late Mr. Casgrain had been sent by
the government to speak at recruiting
meetings. He was not then a member
of the government. He complained
that Armand Lavergne had been put
into a uniform. He had gone up and
down asying: "You must not recruit
for overseas, but only for home service." And at the same time General
Lessard and Colonel Blondin were
saying: "You must recruit for overseas service." The call from Quebec,
he said, was made in the most irritat.

Conscription of Wealth

cussion of the resolution of which he gave notice some days ago in which he gave notice some days ago in which he recommended conscription of wealth and the resources of the country. He said he could see no earthly reason why men of large incomes should not contribute generously to the carrying on of the war. He suggested that every man of capital in the Dominion should, be compelled by law to invest a large portion of his capital in Canadian bonds for the carrying on the war. The government would be warranted, he said, in making every acre of vacant land in Canada, which is held for speculation, pay taxation during the war time. If the owner of such vacant land wished to escape taxation, he would have the land cultivated and this would bring greater good to the country as a whole and would furnish traffe for our system of transportation.

The agricultural interests demanded.

The agricultural interests demanded aergetic steps to secure more cars

and rolling stock that transportation government had not foreseen and procongestion might be relieved. Much vided for traffic requirements on the of this congestion last winter, he declared, was due to the fact that the

AGAIN in Montreal.

THE Chicago traffic test has been beaten by the Canadian Chalmers. This time the run was made on high gear through the crowded traffic of Montreal.

In 24 hours of steady driving, the low and intermediate gears removed, not a stop for the motor, the Chalmers ran up a mileage of 590.7. This beats the famous Chicago test by 4 miles. In spite of the constant stopping at crossings and slowing down, the gasoline gave an average of over 20 miles to the gallon

This car was a stock 5-passenger Chalmers, the comfortable Chalmer so much admired for its luxuriou finish and smart design. Here is a further proof of the smoothrunning of the Chalmers Motor, its wide flexibility, its vast reserves of power for hills and beavy roads.

In Detroit a slow-speed test was made. High gear again. Speed never exceeded 3 miles an hour. 71.7 miles were travelled in the 24 hours. 12 miles to the Imperial gallon.

In Grand Rapids a non-stop test was made on high gear, running up 603 miles in 24 hours.

These tests prove flexibility beyond question. They prove the fine action of the Chalmers under most trying conditions. They prove the cooling, the oiling, the economy.

But, in Minneapolis and St. Paul came the supreme test of the lubrication and and cooling. The Chalmers ran for 24 hours on LOW GEAR without Motor stop. 257 miles; using only 3 quarts of oil, 4 gallons of water; 8.8 miles to the gallon of gasoline.

This is the sort of car your Chalmers will prove for you. Test it yourself. Any time.

PAIGE The Most Beautiful Car in America

THIS is the year of all years when it will pay you to place an order for your Paige, just as early as possible.

In the first place, there is every indication that the "sold out" condition of last year will be repeated.

Thousands of people have been watching the performance of this great car—studying the experience of owners—convincing themselves that Paige is actually first choice in the field of light sixes.

Then, too, you will undoubtedly be obliged to pay more for your Paige if you wait too long.

It is a matter of public knowledge that the costs of all manufacturing materials and labor have increased tremendously during the past year—and quotations are still climbing.

We have, of course, protected ourselves by early purchase. But our present supplies cannot last indefinitely and, in the face of a steadily advancing market, we shall be obliged to increase list prices proportionately.

So—for your own protection—now is the time to act. Don't wait until it is too late. Don't place yourself in a position where it will be necessary to compromise on a "second best."

See the Paige dealer today.

FARMERS!

Every Building on Your Farm Needs Good Paint.

Paint protects. Paint wards off rot and decay. Paint is a property improvement that increases the value of your whole place. Paint is an investment that pays a big profit in prosperous appearance and long life to the buildings.

MARTIN-SENOUR

"100% PURE" PAINT

(Made in Canada)

is saving the farmers of Canada hundreds of thousands of dollars by protecting their homes and barns from wear and weather. This pure, reliable paint spreads easily and is the cheapest in the end, because it covers 900 square feet of surface per gallon and lasts far longer than the cheap prepared paint or hand-mixed lead and oil

Ask for "Farmer's Color Set" and "Town and Country Homes". Just what you'll need in planning your painting.
