

ED ON
OF LIVING

Hamilton Speech.)
by the British Board of Trade, which
the cost of living has increased 7
decade, and in Canada 5 per cent.
Canada produces yearly 200,000,000
is only 50,000,000 bushels, and
to this time practically the only
has to import all the wheat which
that the price of wheat and the price
in Canada, then you have to
nothing rotten in the state of living,
and the end of the high cost of living,
or three months than it is today,
ons in the American tariff, mills,
before these products are already
know in the matter of cattle alone,
all parts of Canada, where there are
not come back free from the United
of the same kind can come back free
it is that all of the articles which are
articles in Canada and the price in-
ings.
and the policy which I give you,
Canadian ought to support at the present
at Ottawa is to give up abso-

and has been always the policy of
as far as possible we should stand
been very chary during the fifteen
scarcities in the tariff.
a tariff of customs duties we create
and industries are developed,
that tariff all of a sudden the result
decided more than once during the
we would be prepared for them.
we found that it was pressing un-
quity we could be prepared to re-
for an alteration in the tariff,
did do better than we did. You have
your work."

light. In two years a hen outlives her
fulness to the commercial keeper and
goes to the block.
inasmuch as some eggs are laid even
by a flock of, say one hundred
as it may be argued that if there were
as many hens there would be
as many eggs, and at the high
prices of today there would be big profits
for the farmer to raise a dozen
deduction, however. While eggs to-
day are sold in Boston at fifty to sixty
a dozen, they actually cost the hen
from \$5 to \$80 a dozen. That's
sense, says the skeptic. It is true
the keeper. It is purely a mathe-
matics. If it costs several dol-
lars to feed one hundred hens one week
of those one hundred hens lay only
one or four eggs during the week it is
ident that it will take two or three
weeks for the farmer to raise a dozen
eggs and just as evident that it costs
in several dollars. The amount varies
according to the method of feeding, but
costs the ordinary hen farmer at least
a week for feed for one hundred hens
side the cost of labor. Consequently
makes more money when eggs are
at 25 cents a dozen than when they
are at five cents a dozen, in fact has
made enough then to pay for his
sees when the prices for eggs are high.

C.R. SURVEYOR
KILLED BY TRAIN
NEAR ATHOL, N.S.

Another Badly Injured—Victims, On Hand-car, Were Struck By C.P.R. Express.
Amherst, Nov. 27.—Ralph Noyes, a member of an I. C. R. surveying party taking at Athol (N.S.), was instantly killed this morning, and a Canadian, W. Currie, was very seriously injured. They were working under J. H. Conner, C. E., of Dartmouth, on the survey of the double track. Others in the party were J. A. Rankine, of York, and A. A. Burke, of Moncton. The party have their headquarters at Athol, and this morning were working the track ahead of a trolley car, which were the others. The C. P. R. from Halifax came up behind, and within a car length of the trolley car Burke and Workman heard its approach, and giving a warning cry, ran to safety. Noyes and Currie, however, were on the car, which was struck the engine. Noyes was thrown a distance, and lighting on a pile of wood was instantly killed. Currie was badly injured. One leg was broken, hand cut off, and his head injured. He is now in the hospital at Amherst. Noyes' body is at Moncton, where a request will be held. Noyes, who was about twenty-five years of age, was from Malden (Mass.), and is unmarried. Currie, aged twenty-three, is a Halifax man.

E. LITTLE GIRL
BURNED TO DEATH

Arloctown, P. E. I. Nov. 27.—The year-old daughter of Mrs. Howatt of West Troy was burned to death this week in the morning. The child was put out of bed and went to the en. A spark from the stove caught her night dress and when the mother, who was in the room, hastened to her assistance she found her child in flames. Howatt was badly burned about the face while smothering the fire. She died a few hours later.

North Shore Man Breaks a Leg.
Newcastle, N. B. Nov. 27.—(Special.)—Lawlor, of Redbank, employed on the power house here, fell thirty feet today, breaking one of his legs. He was taken to the Chatham hospital. The accident was caused by a ladder giving on an icy roof.

Now is the Time to Enter

Full staff of skillful and experienced teachers. Up-to-date courses of study. Light, airy, cheerful rooms. Complete equipment. Over 40 years' experience of the needs of the public, and of success in meeting those needs.

Catalogue mailed to any address. Send for Our Catalogue. S. KERR, Principal.

DUKE OF CONNAUGHT

ROBBED OF HIS JEWELS?
(Continued from page five.)

ary. According to the Vossische Zeitung the Cunard line has taken the initiative in securing the present arrangements.

PRINCE ARTHUR IN GREAT DEMAND.
To meet Prince Arthur of Connaught the president of the Territorial Force Association of the county of London has issued invitations for a dinner on Dec. 10, at the Duke of York's headquarters. On the occasion of the opening of the London Territorial Service Club.

Prince Arthur has consented to perform the opening ceremony of the National Hospital for Diseases of the Heart at St. John's.

The Union Bank of Canada will open a new branch at St. John's, commencing today, with G. M. C. Hart Smith as manager.

PLENTY OF ARMS FOR MEXICAN REBELS

(Continued from page 1.)

was not made clear just how the American naval officers had managed to get in touch with General Aguilar, the rebel leader in the state of Vera Cruz, as the latter was understood to be at least 25 miles in the interior. He reached him, however, and was given definite assurance of the safety of foreign lives and property. So far as can be learned here, General Aguilar imposed no conditions in regard to the presence of the rebel gunboats in the harbor of Tampico, although last week he demanded their withdrawal under penalty of destruction of the town.

News came to the navy department of the departure from European waters of the fourth division of the Atlantic fleet, comprising the battleships Connecticut, Kansas and Ohio under the command of Rear Admiral Beatty. The division will keep company with Admiral Badger's command until the Azores are reached, when the fourth will steam directly for the Mexican coast, stopping at Guantanamo.

NEWCASTLE NEWS

Newcastle, Dec. 1.—The proceeds of Friday's pie and ice in aid of Harris Academy were \$156.
The Methodist ladies held a successful sale of home cooking Saturday afternoon. Proceeds some \$80, for church repairs.
The ladies of St. Mark's Presbyterian church, Douglastown, held a Scotch concert Friday evening. Together with some preliminary cottage socials, \$65 was realized.

THE SEMI-WEEKLY TELEGRAPH, ST. JOHN, N. B. WEDNESDAY, DECEMBER 3, 1913

MAY SOLD FOR ENOUGH TO PAY THE ORIGINAL COST OF THE STOCK AND THE GRAIN THEY

Such good laying did the pullets do that they began to become broody in early March. The Plymouth Rocks were wanted to give more "letters" than the Wyandottes. They were made the hatching machines that first spring. In the dry barn cellar the nests were put, filled with eggs and covered with the broody pullets. This cellar opened to the east, had a wide driveway into it and made a fine place to hatch the chicks. Until Mr. Blank could spend all of his time at home it was thought wise to hatch with him rather than with incubators.

During the winter four small houses, 8 by 8 feet each, were built in the barn floor and drawn out to a sunny spot in early March. In each of these houses was put a portable brooder, a house to care for the chicks through the week when heat was required. The pullets were set in lots of four, and when the chicks were hatched, they were put together and placed in one of the brooders. The average hatch was eight chicks, though they got twelve several times. When the brooder was full of chicks, they were set under each pullet. Later in the season, in April and May, six hens were set at a time, giving more than fifty-five chicks put under a single hen, and they well repaid the simple room given them.

Much of the grain used in winter, some pruning was done to the small orchard of overgrown apple trees. A man was hired to cut down the trees in the woods. When the trees were cut down, the March pullets were set and wire netting stretched to make yards for the four pens in the barn. In middle April a nearby farmer was hired to plough an acre of ground for field corn, roots and cabbage, as well as a garden patch for raising supplies for the home table. It was found that too much feeding could not be looked out for through the year and the amount of cultivated land was purposely made small.

Much of the grain used in winter, some pruning was done to the small orchard of overgrown apple trees. A man was hired to cut down the trees in the woods. When the trees were cut down, the March pullets were set and wire netting stretched to make yards for the four pens in the barn. In middle April a nearby farmer was hired to plough an acre of ground for field corn, roots and cabbage, as well as a garden patch for raising supplies for the home table. It was found that too much feeding could not be looked out for through the year and the amount of cultivated land was purposely made small.

When an Irish miller, after having breakfasted at a Scotch inn, called for his bill, he observed an enormous charge for eggs, hatched and raised, and, holding the bill in his hand, he said, "Faith, man, eggs must be very scarce here in Scotland!" "Oh, no, sir," eggs aren't at all scarce, but Irish mill-liners are!

The months passed, the farm life became that of John Blank, and now he is finishing three whole years on his home acre. No great feat has been accomplished. He has grown up into his poultry work. Each year has seen more chicks hatched, another house or two built, more hens wintered. A second cow is in the pasture giving them milk all the month of the year, all the butter they can consume adds lots of good skim milk and buttermilk for the hens and chicks. A quiet work home is in the heart, doing the work of the light, flat land, as well as the varied products to express office, store, church and Sunday school. The Blanks have been happy as part of the community life and are happy in the winter layers. Five years from the date of moving to the farm we find a poultry plant that is simple, unassuming, profitable. There are houses for winter layers, incubators, brooders and coops for producing 800 chickens each season. The single acre of field crops has grown to three acres. Seven tons of hay are in the barn and two tons of cattle beets in the cellar. Twenty barrels of apples have been harvested, fifteen bushels of potatoes dug as well as the varied products of the kitchen garden. The payments on the farm have been made as they were due, and there is money in the pocket. Each year has seen more chicks hatched, another house or two built, more hens wintered. A second cow is in the pasture giving them milk all the month of the year, all the butter they can consume adds lots of good skim milk and buttermilk for the hens and chicks. A quiet work home is in the heart, doing the work of the light, flat land, as well as the varied products to express office, store, church and Sunday school. The Blanks have been happy as part of the community life and are happy in the winter layers.

Before the Closing of Navigation You Will Need Many Articles of Winter Footwear

Call or write and we are at your service. Francis & Vaughan, 19 King Street, St. John, N. B.

The Trend of Thought.

(Ottawa Citizen, Conn.)
The Grain Growers' Guide, an up-to-date weekly, supported by the western farmers, is inviting its readers to vote on a number of important questions of the day. It announces that of all the questions in the Guide referendum none is arousing more interest and discussion than those which relate to the taxation of land values. Question No. 4 reads: Are you in favor of having all school, municipal, provincial and federal revenues raised by a direct tax on land values?

Note—"Land" here is used in its economic sense to include all natural resources. The farmers of the prairie provinces and people of the cities have experienced a partial application of this principle for the majority of rural municipalities and many towns and cities exempt improvements of every kind from taxation. The proposal in the referendum question is to extend the system of taxation to provide provincial and federal revenues on the same principle; to abolish taxes on business and build-

ings, and incomes, and to do away with the customs tariff tax on imports. Apparently the enlightened farmers of the west have no desire to see industry penalized for the benefit of the land monopoly. The trend of thought is towards a single tax on land values only.

For the first time in the history of England a colored man has been elected mayor of a borough. John Richard Archer, whose father was born in the West Indies, has been elected mayor of Battersea by a majority of one vote.

The British Museum has books written on bricks, tiles, oyster shells, bones and flat stones, together with manuscripts on bark, ivory, leather, parchment, papyrus, lead, iron, copper and wood.

The hottest region on the earth's surface is on the southwestern coast of Persia, on the borders of the Persian Gulf.

If the bright parts of the kitchen range turn black from heat, dip a cloth in vinegar and rub on the blackened parts.

Your Manly Strength "Nature" Book Free

My Free Offer to My Men and Young Men Readers.

My free offer is as follows: There are millions of men who are suffering from various ailments, and I have written a book which will tell them how to get well again.

I publish a little personal compendium of 72 pages, pocket size, containing 4,000 words and 80 half-tone photographs, which thoroughly covers the subject of sex, but only in its relation to manhood or vital manly strength. Its legitimate uses are manifold, its loss and the causes thereof, its possible restoration and its permanent preservation. These are the vital phases of the sex subject which I find to be of most interest to all men, young or elderly, single or married, and I have therefore put into this little self-help book the very best that I can offer relating to that particular personal and private advice and information, which my 30 years' practical experience in this field has taught me.

I offer this book to you absolutely free of charge, in a perfectly plain, sealed envelope, to any man or young man who writes to me and tells me (see coupon below), and there is not a particle of obligation of any kind whatsoever involved in making this gift offer to you. Over a million of these books have been sent to men all over the world who wrote for them.

Mark why I consider this illustrated sex book free is that in one part I include a description of a little mechanical vibrator of my own invention, which is for use by those of my readers who need some outside aid in the restoration of their manly vigor. However, that is a matter for each person to decide for himself. The book is complete and entirely independent of anything it says with respect to the vibrator. Therefore please use free coupon and get the book by return mail. You will find it a valuable adviser in many respects.

SANDEN, Author.

Vital manhood and abundant manly vigor is the greatest human asset of our day. Every man is entitled to be perfectly strong, vigorous and capable, just as nature intended he should, and it through the medium of my book I can show you how you yourself may become as vital, manly and forceful as the best man of your acquaintance, then I have merely given you a clear understanding of what nature is herself constantly endeavoring to tell and show you.

As to my vitality, it may or may not be necessary in your own case, but if you want to use it after reading the description, I will gladly make some liberal proposition as you may get one to try. This vitalizer, weighing only seven ounces, is worn all night. It generates heat, easy flowing FORCE which I call vitality. This FORCE enters your system at the base of the back, flowing thence through the kidneys, liver, stomach, bladder and organs, and diffusing itself to every part of the body. Over 200,000 Sanden vitality are now in use, and have recently been used by men everywhere have said it makes them feel better and stronger almost at once, that it often takes pain out of the back in a few hours, and 60 to 90 days' time is sufficient to restore normal vigor. With special attachments my vitality is used by women as well as men for rheumatism, kidney, liver, stomach, bladder disorders, etc.

If you live in or near this city, would be pleased to have you call. Hours, 9 to 6.

However, whether or not you ever use the vitality, at least you want the free book. So kindly fill in the coupon and the book will go to you, sealed, by return mail.

FREE COUPON: Dr. J. F. Sanden Co., 40 Yonge Street, Toronto, Ont. Please send me your free book. Name: Address:
