W. U. MEDICAL COLLEGE HOLDS ANNUAL DINNER

Research Fellowship As Memorial To Late Dr. McCallum Proposed.

EQUIPMENT IS SUITABLE

Dr. A. J. Grant Says Drugless Systems Are Absurd New Superstitions.

Physicians and surgeons of London and district, along with members of the faculty and the student body of Western University Medical School, gathered at the Tecumseh House Tuesday evenfor the annual inaugural banquet of the college, which proved a decided success. This function was staged according to custom under the auspices of the two sophomore classes at the medical school, and throughout the entire toast list optimism was the keynote sounded by the speakers. The attendance was 150, and staid graduates fraternized with junior meds during the evening, thus achieving the object of this yearly dinner.

During the course of the banquet a suggestion, which accorded surprise to the majority present, and which was favorably received, was that introduced by Dr. F. R. Miller, chief of the department of physiology at Western, in proposing the toast to "Research." Dr. Miller stated that following a conference held with his colleagues on the school faculty he wished to advocate "a memorial scholarship or research fellowship at Western University Medical School in the name of the late Dr. H. A. McCallum, as a tribute to him, to be worked out in the near future on suitable plans."

Prominent Graduates.

"Western has turned out research workers able to take their place anywhere," he declared, mentioning the names of Dr. Emery, famous for his work on fats; Dr. Rowntree, known the world over for his distinctive physiological chemistry tests; Dr. Earl Watson, now on the faculty of the University of Sheffield, and Drs. J. Weir and H. O. Foucar with the Mayo Clinic. He stated that the Western "U" Medical School Library is suited for research workers, and added that there are sets of books on its shelves valued at $5,000 and $10,000. Laboratories in the new school he declared to be unsurpassed for a broadening in research work.

The feature of the evening was the numerous tributes paid to the memory of the late Dr. H. A. McCallum, formerly Dean Emeritus of the medical school, by the various speakers. All regretted the loss sustained by his death, and the reminiscences of his presence on former similar occasions were repeatedly recalled, which were happy, although tigned with pathos.

Examine All Citizens.

A plea for periodic physical examinations of all citizens in an effort to detect and minimize diseases before they have sapped the vitality, was the feature of the response of Dr. A. J. Grant of this city to "The Profession." He declared that the laity is prone to neglect reporting to the family physician until disease has gained such headway that the best to be obtained was a short prolonging of life. He lauded public health talks, through daily newspapers, and eulogized the work of Dr. H. W. Hill locally in this regard. Child welfare work was also commended by the speaker, who stated that the prolonging of the lives of adults is equally important, without neglect of the former. "Let us lead in this work, which is bound to come in every civilized country?" he asked.

Attacks Drugless Therapy.

"The popular mind today is growing more prone to return to old superstitions in medicine," he concluded, "and to invent new ones even more absurd. Side by side with the marvelous scientific advances in medicine and surgery, we have the ridiculous pretensions of the chiropractor, the osteopath and a hundred other brands of charlatanism preying upon the gullible public. I fear we must saddle most of the blame for such a state of affairs, because we have remained silent altogether too long. We are only now commencing to make the effort in educating the public which should have been on its way twenty years ago."

Dr. Grant recalled the evening twenty years ago when in the same room he acted as toastmaster at a similar function while a student at the medical school here. The toast to "The Profession" was proposed by D. W. McGinnis, Meds '22, who stated that the Institute of Public Health, new medical school and proposed children's hospital were results of the indefatigable efforts of the medical profession of London.

Remember Old School.

"If I must talk, there is nothing I would rather talk about than the new school," began Dr. P. S. McKibben, acting dean of Western University Medical School, in responding to the toast to this institution. "During my seven years here my love for it, the old school, and London has increased. Don't forget the old school. Dr. McCallum was a big man, and the most important factor in any progress that has been made in the Western University Medical School. The university has been discussed and advertised more in regard to finances of the Government toward universities. Our cause has been championed by Mr. C. R. Somerville, who has told the commission that in five years we will have the best medical school in Canada. I hope we will all be agreeably suprised when their announcement comes out, and while I have no private information, I do believe that Western University has made good with the commission and is just as worthy of support as any school in the province. I have delved into the official records of Ontario Medical Council results, and a greater percentage of our graduates have been successful than that of Toronto or Queen's Universities."

Women Students Welcomed.

In proposing the above toast, R. W. Knight, Meds '22, reviewed the record of Western medical graduates, and coupled with his toast the day, when future graduates will startle the medical profession of the continent by brilliant work, which will no longer be handicapped by inadequate laboratories with the completion of the new medical school. Proposing the toast to the freshmen, T. J. Barnby of the sophomore class mentioned the fact that three women matriculated at the medical school last October along with 11 returned soldiers and 29 others. He welcomed them to the student body. Harold McGee of Meds '25a responded as a member of "the freshmen class of the greatest and best school."

In a witty response to the toast to University Athletic Association, Prof. Hart of the arts department predicted a great future for Western. "I am not an orator—merely a botanist," he apologized. This toast was proposed by J. R. M. Martin of Meds '22 and J. W. Wallace, '21, proposed the toast to "The Faculty."

Toast to Canada.

"Canada" was proposed by Dr. W. Tew, who declared this country to be the strongest link on the chain of the British Empire. In response, Dr. E. Seaborne compared the present status of Canada with those of European countries, with a favorable aspect for the former. Roswell P. I. Dougall, meds '23, proposed the health of the sophomores, whose efforts were responsible for the function, and which he declared reflected great credit upon them. He stated that the splendid class spirit exemplified by the sophs was due to their overseas training during the war.

Wesley R. Heard, president of the sophomore class, meds '24, suggested that on future occasions of this nature delegates from other Canadian colleges be invited to attend and exchange views for the betterment of all universities concerned. During the evening, Fred G. Thompson, meds '24, entertained with a song, and Albert Wright of the same class acted as accompanist. The banquet hall was decorated with the university colors for the dinner.

"FATHER AND SON" BANQUETS HELD IN LONDON CHURCHES

Sympathy More Potent Than Lash of Authority, Says A. H. M. Graydon.

Around the banquet table, in noisy, hearty sing-songs and in exciting games, the fathers of Cronyn Memorial Church and St. Andrew's Church gathered with their sons Tuesday night, in "Father and Son" festivities. The banquets were held in connection with the "Father and Son" week, which under the auspices of the Y. M. C. A. and the different churches, is being observed in all parts of the Dominion.

It was a merry evening, and one which will be remembered long by the men and boys of the two churches. It was the first time that many of the fathers glimpsed the activities of their sons in group games and gym work, and judging by the enthusiasm displayed it is believed that many new interests were kindled, and that perhaps much good will come out of the intermingling.

Magistrate Graydon Speaks.

Magistrate A. H. M. Graydon was the speaker of the evening at the Cronyn Memorial. Mr. Graydon expressed the belief that many children do not get all the home training they are entitled to, through sheer neglect on the part of their parents.

One of the greatest shortcomings, he said, was the lack of sympathy between the parent and the child. This quality was a most potent force in the proper training of children. It was much better for the child to feel that he had a protector and a true friend than to feel the lash of authority. He urged each father to be someone to whom the son could turn to in boyish troubles, for advice given as such times would perhaps do much toward rearing good citizens.

Mr. Graydon told of his daily contact with children who through their young lives struggled through terrible handicaps. Some of these never knew their fathers; others were reared amid wretched environment. He told of the splendid work accomplished by the Children's Aid Societies, and how so many of the children blossomed into sweet characters when they were placed in foster homes.

He told the boys he wished that they would realize how fortunate they were in having good parents and homes. The boy who lost his father, lost not only material comfort, but a companion and a true counsellor.

Be Wholesome Examples.

Because the young patterned themselves after elders, and because the youthful impressions were so lasting, he urged all men to be wholesome examples. He warned the fathers that they could be too indulgent, and because an austere demeanor would endanger confidences, he urged them to take the attitude of a friend.

He believed the child should be gradually trained to assume responsibilities.

Responding to the toast to "Our Fathers," proposed by Kenneth Smith, H. J. Childs urged the fathers to take the boys into their confidence, and he told the boys to take their troubles to their fathers. He emphasized the responsibility, which, he said, rested upon the shoulder of each father. Mr. Childs gave much credit for the success of the boys' work in the church, to Robert Allister, an untiring worker in the boys' interests.

A toast to "Our Sons" was proposed by W. J. Smith, and it was responded to by J. Kennedy.

An excellent meal was served by the "W. W. W." girls' class. Each man present was given a miniature pennant worked by the members of the class. Competitive games were played by the different groups after the banquet.

Edwin Smith acted as chairman and Rev. G. Q. Warner led the sing-song.

Ball Games a Feature.

At St. Andrew's Presbyterian Church the boys battled against their fathers at indoor baseball and dodge ball during the greater part of the evening. At the banquet which opened the evening program many inspirational speeches were given in response to toasts proposed by the boys.

A toast to "Canada," proposed by S. Gemmel, was responded to by W. E. Buchner. D. Ross spoke to the toast, "Our Church," proposed by N. Roome. R. R. Foote proposed a toast to the "Sunday Schools" and G. W. Hoffard responded. A toast to "Our Dads" was proposed by K. Marsh. J. J. Foote responded.

WINDSOR POLICE TO HAVE 8-HOUR SHIFTS

Inspector Mortimore Wigle of the Windsor police department was in London last evening to study the working of the eight-hour shift for patrolmen, which has been in operation in London for some time. Windsor has been working its police constables in time shifts nine or ten hours in duration, but has lately decided to change to the eight-hour system.

R. H. GRANT COMING TO LONDON FRIDAY

Definite Assurance That Minister of Education Will Meet Trustees.

Definite assurance that R. H. Grant, minister of education, will meet the London Board of Education Friday, was received by No. 2 committee at its meeting Tuesday afternoon. All the members of the committee said they would be present.

The purchase of seats for seven school rooms at Ealing, Wortley road and other schools was discussed, but laid over for a week.

One Hundred Prizes

The Advertiser's Great Figure Puzzle Contest

$700 First Prize

$2,500 Divided By Winners

Forming a Chain of Circles Around the Figures in the Puzzle Chart So as To Obtain the Greatest Difference Between the Sum Totals of the Odd and Even Numbers You Encircle, Will Earn You a Rich Cash Reward.

GOLDEN OPPORTUNITY TO SOLVE FASCINATING PUZZLE.

■ SEE PRIZE LIST. ■ WHAT'S THE DIFFERENCE? ■ YOU RUN NO RISK. ■

TO PARTICIPATE IN CONTEST

This contest is open to all residents of the Province of Ontario. Solutions of the puzzle will not be accepted from outside of this territory. While addresses for delivery of the paper may be changed as desired, all communications and matter relating to the contest must pass back and forth from the original addresses of contestants. The contest is open to men and women under the following terms:

Anyone in the Province of Ontario, upon making a subscription payment to The London Advertiser of not less than $2.75, or more than $10.00, may submit a solution of the puzzle. You may submit as many different solutions as you wish with a subscription, on payment of not less than $2.75 or more than $10.00 with each one. If you submit more than one solution, the payment with each one will be applied to extending the subscription already in force, unless otherwise directed. If you are already a subscriber, your subscription will be extended from the time last paid to, whether you receive the paper by mail or carrier. New subscriptions will be started as soon after receipt of solutions as possible. No change will be made in any carrier service you are now receiving the paper through. All amounts paid will be credited on subscription at the regular rates, so you cannot lose, while standing an equal chance to win a valuable cash prize.

FACTS TO REMEMBER

While the amount you pay with a solution of the puzzle does not have any effect on your winning a prize, it does affect the amount you will receive, should you win one of the first five prizes, as the value of these prizes is determined by what the winners pay. This is explained in the prize list, which you should study carefully before sending in your solution.

The value of the first five prizes may also be increased $100 each by interesting four people who are not now subscribers to become subscribers. The sum of $25 will be added for each new subscriber, not to exceed four. Each of the new subscribers must pay not less than $2.75, and he has the privilege of entering the contest, if he wishes to do so, upon the same terms as any other contestant, the $2.75 or more up to $10.00 paid by him entitling him to submit a solution of the puzzle. Whether these new subscribers submit solutions of the puzzle or not, each one must sign a separate blank, so that the records may be kept in such a way as to show by whom they were interested. If no solution is sent by a subscriber you interest, merely write across the face of the chart, "No solution submitted," and send it in attached to the blank. Any one or all of the names of any new subscribers may be sent in with your solution, or any time later you wish before the close of the contest.

Extra Charts Furnished

Those desiring extra charts to work on will be supplied with what they require if they will either call at The Advertiser contest office in person, or send a self-addressed, stamped envelope for mailing them. The office is located at 110 Dundas street. Postoffice Box 578.

If the paper is already being sent to your residence, but in the name of some other member of the family, and you do not wish an additional copy, merely answer "Yes" to the inquiry if you are already a subscriber, and attach a note to the blank stating in whose name the paper is being delivered to.

Contestants will find this puzzle offers unusual entertainment for a party of friends. If you want to pass a pleasant winter evening invite in a few friends, and give to each one a chart, and see who in a given length of time can work out the best result. It will prove to be a most interesting game. Extra charts may be secured for this purpose by calling upon the contest manager for whatever number is needed.

The best chart submitted in this contest will be reproduced in The Advertiser, so that every contestant may check it up and compare it with his or her own work.

PUZZLE CHART

This Chart with chain drawn across it and blank beneath attached must be returned as your solution.

2	3	8	7	4	5	2	3	4	3	2	5	6	3	4	5	4	3	2	5	4	7	8	5	4

Use of This Puzzle Authorized by James R. Colburn.

This blank, properly filled out and attached to chart above, with your chain of circles across it, must be sent in with your remittance. If you secure any new subscribers each one must submit a blank separate from yours. If a new subscriber does not wish to participate in the contest he may note across the face of the chart, "No Solution."

BLANK FOR SOLUTION DATA AND SUBSCRIPTION.

TO THE LONDON ADVERTISER: Date Submitted...............1921.

I herewith inclose $........ for subscription, and submit the following as my solution of your puzzle:

Total of Odd Numbers .... Total of Even Numbers .... Difference ....

Name ....

Address ....
(Street and Number) (Postoffice)

Are you already a subscriber? ....Do you wish paper by carrier or by mail?..........
(Yes or No)

Have you sent in any other solution prior to this one?...
(Yes or No)

If this blank is used by a subscriber who has been interested by a contestant, write in the name and address of the contestant who interested you. You have the same privilege of participating in the contest as the contestant who interested you in subscribing.

The name of the person who interested me is:

Name ....

Address ....
(Street and Number) (Postoffice)

NOTE.—Contestants desiring the paper sent to somebody else should merely attach a note to this blank giving name and address of persons they wish the paper sent to. Any subscriber whose name or address is not correct on the label of his paper will please fill in this blank as it should be and attach note to blank, giving name and address as it is now printed on his label.

THE PROBLEM

The problem is to draw a chain of circles once across the chart, from the first column on the left to the last column on the right, selecting the figures to encircle from which you can obtain the greatest difference between the sum total of the even and the sum total of the odd figures. The odd figures are 3, 5, 7 and 9, and the even, 2, 4, 6, 8. By "sum total" is meant the figures added together. That is, you are to take the odd figures you put circles around, and add them up; then the even figures, and the difference between the two totals is your solution. It makes no difference which of the two sum totals is the larger; the greatest difference you can obtain either way is what counts

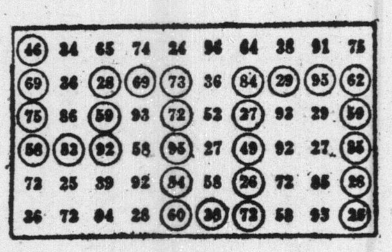
The chain must be drawn in continuous sections of either three, four or five circles to a section. By "section" is meant three, four or five circles in a straight line. You may use either number of circles you wish in each section. The sections of the chain may go either up or down, or to the right, but not to the left. That is, start in the first column by drawing either three, four or five circles up or down, as you wish; then proceed to the right, then up or down again; then to the right, and so on until you reach the last column. The chain must end with either three, four or five circles in this column.

In determining the number of circles in each section count the last circle in one section as the first in the next. The figures in the corner circles, however, are to be counted but once when adding them up to get the totals of the odd and even figures. You may start at any figure you wish in the extreme left-hand column. There must be one section running up or down in this column as well as in the last column.

Contestants should try all the combinations they can to see what is the greatest difference they can obtain between the sum total of the odd figures and the sum total of the even, or vice-versa. The prizes will be awarded for the greatest differences submitted, without regard to what the greatest possible difference that can be obtained may be. Only the figures you put circles around are to be considered. The following illustration will furnish a general idea for drawing your chain of circles. The illustration consists of double figures, such as 46, 69, 75, and so on, but the puzzle contains only single figures from 2 to 9. Hence the differences will be comparatively much smaller and the sum totals easier to obtain.

ILLUSTRATION

The accompanying illustration explains what a chain of circles is. The first section, it will be noted, consists of four circles; the second, three; the third, three, and so on. The sum total of the even numbers, viz., 46, 58, 92, etc., is 750, and the sum total of the odd numbers, viz., 69, 75, 83, etc., 892. The difference between these totals is 142.



GENERAL RULES

This contest is wholly independent of, and is in no way connected with any other newspaper contest in London or elsewhere. The prizes are offered solely by this paper, and will be paid in accordance with the terms and conditions stated in this announcement.

The Advertiser offers these prizes for individual effort. While it is proper for members of one household to work together, or several friends, it is not permissible for more than one of those working in unison to send a solution of the puzzle. When in the judgment of the contest manager more than one member of the same family, or more than one of any number of persons he believes have worked together, send in a solution of the puzzle, he reserves the right to refund subscriptions and return the solutions he believes have been submitted contrary to the foregoing rule. The Advertiser also reserves the right to finally decide any other questions which may arise, and those entering the contest agree to abide by such decisions.

The spirit and intent of the contest is to reward those who work out the best solutions of the puzzle through their own independent efforts.

The time a solution is submitted has no effect upon its winning a prize. It is well, however, to send in your solution as soon as you have it in shape to submit. Something might arise to prevent you sending it in later, thereby causing you to lose the chance of winning one of the valuable prizes. If, on the other hand, you submit an early solution, and later find you can improve upon your first effort, you have the privilege of submitting as many more solutions as you wish on the same terms as your first. Your solution blank must state correctly the sum totals of your odd and even numbers, as well as the difference, otherwise your solution will be considered as incorrect, and ruled out of contest.

INFORMATION

In the event of ties on this puzzle, as many prizes will be reserved as there are contestants tied, before any prizes are awarded for a less correct solution. For instance, if five people tied on the best solution, the first five prizes would be reserved for them, and they would be awarded the prizes in accordance with the standing of their solutions of the second puzzle. That is, the one submitting the best solution of the second puzzle would receive the first prize; the one submitting the next best, the second, and so on.

No solution unaccompanied by cash to apply on subscription will be accepted. Solutions and the money should be sent together, not separately. No solution may be changed after it is once submitted. If you want to submit something different send another solution, accompanied by any amount you wish to pay from $2.75 to $10.00. It will all be credited on one continuous subscription, and you will have the satisfaction of knowing your paper is paid for that far in advance. No one directly or indirectly connected with The Advertiser will be permitted to enter this contest.

24 months	$10.00

(NOTE.—Delivery by carrier outside of London is made in St. Thomas, Chatham, Tillsonburg, Woodstock, Ingersoll, Paris, Galt, Kitchener, Wallaceburg and Stratford.)

The amount of the first five prizes depends on how much you pay on your subscription. You may pay as low as $2.75, or as high as $10.00.

The Prizes

All prizes have an added value for the person who sends in from one to four new subscriptions. New subscribers are worth as high as $25.00 each.

FIRST CAPITAL PRIZE MAXIMUM AMOUNT OF...... $700.00

$100.00 in cash, to which will be added 50 times the amount paid by the subscriber with the winning solution; also $25.00 for each new subscriber, not to exceed four, sent in with the winning solution.

The following table shows what the prize would be worth according to various subscription payments, without allowing anything for new subscribers:

$ 2.75 subscription payment would net	$237.50
$ 5.00 subscription payment would net	$350.00
$ 7.50 subscription payment would net	$475.00
$10.00 subscription payment would net	$600.00

Then add to each of these $100.00 offered for four new subscriptions, and you will see you can win $700.00 in all by paying $10.00 on your subscription, and by sending in four new subscriptions. The new subscriber may pay any amount from $2.75 to $10.00.

SECOND CAPITAL PRIZE MAXIMUM AMOUNT OF...... $450.00

$100.00 in cash, to which will be added 25 times the amount paid by the subscriber with the winning solution; also $25.00 for each new subscriber, not to exceed four, sent in with the winning solution.

THIRD CAPITAL PRIZE MAXIMUM AMOUNT OF...... $400.00

$50.00 in cash, to which will be added 25 times the amount paid by the subscriber with the winning solution; also $25.00 for each new subscriber, not to exceed four, sent in with the winning solution; $25.00 will be added to this prize if the winning solution is received by February 26. Contest closes on March 19.

FOURTH CAPITAL PRIZE MAXIMUM AMOUNT OF...... $300.00

$50.00 in cash, to which will be added 15 times the amount paid by the subscriber with the winning solution; also $25.00 for each new subscriber, not to exceed four, sent in with the winning solution; $25.00 will be added to this prize if the winning solution is received by February 26. Contest closes on March 19.

FIFTH CAPITAL PRIZE MAXIMUM AMOUNT OF...... $200.00

$50.00 in cash, to which will be added five times the amount paid by the subscriber with the winning solution; also $25.00 for each new subscriber, not to exceed four, sent in with the winning solution; $25.00 will be added to this prize if the winning solution is received by February 26. Contest closes on March 19.

PRIZES SIX TO FIFTY.

No. 6 a fixed amount of	$70.00
No. 7 a fixed amount of	$50.00
No. 8 a fixed amount of	$30.00
No. 9 a fixed amount of	$25.00
No. 10 a fixed amount of	$20.00
No. 11 a fixed amount of	$15.00
No. 12 to 21 each	$10.00
No. 22 to 41 each	$ 5.00
No 42	$ 4.00
No. 43 to 50 each	$ 2.00

SPECIAL CONSOLATION PRIZES.

There are fifty prizes offered above. The persons who have registered the next fifty highest answers, that is, No. 51 to 100 on the list, as a consolation prize, will be paid 20 per cent of the amount they have turned in on new subscriptions for other persons. Each new subscriber may pay from $2.75 to $10.00; the larger the payment from the new subscriber the greater will be the prize-winner's consolation money.

The Contest Closes on March 19, 1921. Address All Solutions, Inquiries and Requests for Charts to

CONTEST MANAGER, THE LONDON ADVERTISER
110 DUNDAS STREET. LONDON, ONT. POSTOFFICE BOX 578.
