

297292/5

Ottawa, February 19, 1912.

Sir,

The Department desires to install fire escapes and a fire protection system at the Carcross Boarding School and I am enclosing herewith details of the fire escape to be fixed to the walls at the side of each monitor's room.

It is also desired to install a standpipe of  $1\frac{1}{2}$  inch galvanized iron for vertical lift about forty feet in length added to the distance to well and connections with force pump, which should be connected with the tank and supplied with four  $1\frac{1}{2}$  inch globe valves.

Three fifty foot lengths of  $1\frac{1}{2}$  inch hose with couplings and nozzels and also one fifty foot length with couplings for the roof only may be purchased. These articles may be bought from Mr. Matthew Watson, Carcross, and the Department will rely upon you to make the best arrangement possible as to price.

Your obedient servant,

  
Assistant Deputy and Secretary.

E. D. Evans, Esq.,  
Principal,  
Carcross Boarding School,  
Carcross, Y.T.
