Prices.—The price of brick varies greatly with the quality, locality, market or demand; the values as given in the table of production are those at the yard or kiln and do not include costs of delivery. They do not, therefore, represent the price to the consumer. The average price of common brick at the kiln in 1910 according to these returns was \$8.13, as compared with \$7.81 in 1909; and of pressed brick \$11.89, as compared with \$11.01 in 1909.

In the Maritime Provinces, during 1910, the price of common brick varied from \$4.80 to \$9, averaging for Nova Scotia \$5.77, and for New Brunswick \$7.83.

In Quebec the price of common brick varied between \$4 and \$10, averaging \$6.63; while the price of pressed brick averaged \$15, with only one firm reporting production. The average price of common brick in Ontario was \$7.88,
