

## THE HEATING PROBLEM

is so easily solved to-day with all the modern inventions of this kind. The easiest of all is heating with gas.

We have gas heaters from \$4.50 and upwards; these can easily be installed, and properly heat, at a moderate cost, any room, office or store.

WITHOUT ANY CHIMNEY, SMOKE, ASHES, ETC., you can have an open fire-place any place in any room desired. Turn a tap and your logs are burning, slowly or full blaze, just as you may wish. When you have finished, turn the tap back and it is all over and ready again without any further trouble. These fireplaces are for sale from \$30.00 and upwards, and only cost you  $2\frac{1}{2}$  cents per hour to operate. See them in our salesrooms,

MESSRS. VICTORIA GAS CO., LTD.,  
City.

DEAR SIRS:—

We find the economy, saving of time and fuel, with the great convenience, attached to the use of a Gas Stove, far exceeds our expectations, and we use it constantly.

Yours truly,

(Sgd.) G. JENNINGS BURNETT,  
Organist, St. John's Church, and Teacher of Music.
