Not Very Filling.

Mrs. Andrews was the most conscientious visitor of the district, but for various reasons she was not popular among the poor people whom she longed to help.
"I don't want to see that peaked look-

ing woman in my room again, ner I won't!" said the grandmother of the nine ragged Palmers.

"I read my Bible wid the best o' folks," went on the old lady, "but there's times for some things an' times for others, an' that Andrews woman is without the sense to know the one from the other. What was the motte she brought us yesterday, all in red and gold letters, and we with empty stom-achs? — 'Be filled with faith!'".

"Do you believe men's souls go into animals after death?" he asked. "Well, I sometimes think perhaps they do," she answered. "There are some dogs who wouldn't be as mean as they are if it were not for an influence of some kind inside of them."

Simon V. Landry Cured by Dodd's Kidney Pills

Had Lame Back, Weak Lungs, and was a Total Wreck before he was Induced to Try the Great Kidney Remedy.

River Bourgeois, Richmond Co., C. B., June 21.—(Special).—One more remarkable cure has been credited to Dodd's Kidney Rills in this neighborhood, and the story is best told in the words of Simon V. Landry, the man cured. Mr. Landry says:
"I was bothered for over a year with Lame Back, Weak Lungs, and Palpitation of the Heart and general weakness and shortness of breath. In fact I was a total wreck. I could not work as I got tired and weak so easy.

any relief till I was induced to try Dodd's Kidney Pills.

"After I had used three boxes of them I was able to start to work again. I recommend 'Dodd's Kidney Pills to everybody."

It is cures like these that give Dodd's Kidney Pills their popularity. They not only relieve but make people able and willing to work.

SOME OLD THEATERS.

Playhouses That Flourished In Ancient Greece and Rome. You may wonder what there could

be injurious to public morality in a theater made of stone. Consul P. Cor-nelius Scipio Naseia knew, but history doesn't tell. The first attempt to build a stone theater in Rome was made a short time before he was elevated to his office. It was sanctioned by the censors and was nearing completion when Scipio persuaded the senate to command it to be pulled down, advancing as his reason solicitude for public morality.

The Romans did not possess a regu-lar stone theater until a very late pe-

riod, and, although dramatic representations were very popular in early times, it appears that a wooden stage was created when necessary and was afterward pulled down again, and the plays of Plautus and Terence were performed on such temporary scaffoldings. In the meanwhile many of the neighboring towns of Rome had their stone theaters, as the introduction of Greek customs and manners was less strongly opposed in them than in the city of Rome itself. Wooden theaters, adorned with the most profuse magnificence, were erected at Rome even

during the last period of the republic.

A magnificent wooden theater planned by M. Æmilius Scaurus was built in his ædileship 58 B. C. Its scena consisted of three stories, and the lower of them was made of white marble, the middle one of glass and the upper one of gilt wood. The cavea contained 80,000 spectators. In 55 B. C. Cn. Pompey built the first stone theater at Rome, near the Campus Martius. It was of great beauty and is said to have been built after the model of that of Mytilene. It contained 40,000 specta-

C. Curio built in 50 B. C. two magnificent wooden theaters close by one another, which might be changed into one amphitheater. After the time of Pompey, however, other stone theaters were erected, as the theater of Marcellus, which was built by Augustus and called after his nephew Marcellus, and that of Balbus, whence Suetonius used the expression, "Per trina theatra."

Four Ways to Health. Hygienic living demands imperative-

ly the absolute purity of the four fol-lowing necessities: Air, water, food and thoughts. Granted these, you have the constituents out of which nature for-mulates such a perfect creature that the inward purity seems to lend a radiance to the personality. It is not simply a few breaths of fresh air a half dozen times a day that a woman needs, but a continuous supply, and just as the greater part of women are half starved for fresh air, so they are also stinted, oftener from ignorance than necessity, in the quantity of water the body re-quires to keep it clean and healthy. Pleasure of a pure, elevating nature has come to be recognized as having a distinctly therapeutic office and hence to be one of those factors which merit the same consideration and attention as other necessaries in a well ordered life.

When Pens Were First Used. About the year 600 A. D. pens made of quills were introduced. This is shown by the fact that the word pen-na, a quill, is not found, it is claimed, in any work bearing an earlier date. Previous to that time the word calamus, signifying a reed, was exclusive ly employed as a designation for the vehicle used in transferring the ink to the parchment or other surface se-lected by the writers of that early age Steel pens first came into use in 1803. composed of gold made their appear-

The Water Moccastz The water moccasin, which seldom exceeds four feet in length, is a very venomous snake and is more to be dreaded than the rattlesnake, as it will attack anything and everything on sight and without apparent provocation. All bacon rinds should be washed and carefully preserved by keeping them in a glass far. These are de licious for seasoning greens and touching up for fricasseed chicken.

A Big Load For an Ancient Ship. Constantinus conveyed from Helfopolis to Rome an obelisk weighing 1,500 tons, and, in addition to this long coveted monolith, the ship carried about 1,200 tons of pulse stowed about the smaller end of the obelisk in order to bring the ship on an even keel.

Steel and Sea Water.

When steel is exposed to the action of sea water and the weather, it is said to corrode at the rate of an inch in 82 years. An inch of iron under the same condition corrodes in 190 years. When exposed to fresh water and the weather, the periods are 170 years for steel and 630 years for iron.

Value of Forests. Just as man's existence upon this

planet would have been impossible had not the pre-existing forests furnished a rich vegetable mold to give fertility to the soil, so the entire extinction of the forests now would in time bring mankind to a disastrous end.

Bachelors and Maids. The mortality of bachelors is greater. at all ages, than the mortality of old maids.

Labor Saving Soup. "Soup too hot? Well, it's this way." said the waiter at the table d'hote res-taurant as he grew confidential. "The chef found that he was running shy, and, as he didn't want to make any more, he threw in a lot of pepper so the guests would be satisfied with smaller portions. You see, if he hadn't, the hungry man who comes in late would be complaining about the smallness of the portion served to him. A man will be satisfied with a few spoonfuls of

BURDOCK BLOOD BITTERS CURED

MRS. WALTER MANTHORNE,

BROOKLYN, N.S. She says: "I suffered for three years with terrible headaches and rushing of blood to my head. I lost my appetite and became very thin and weak. I tried many different remedies and consulted doctors, but all in vain until I started to use Bur dock Blood Bitters. I had not taken more than two bottles when I began to feel better, my appetite improved wonderfully and I increased rapidly in weight. I took altogether four bottles and am now as well as can be, for which I owe my thanks to Burdock Blood Bitters. I can recommend it to all those suffering as I did."
