

Sheep Men

KILL THE TICKS AND
RELIEVE YOUR SHEEP.

The tick is a very hard animal to kill, being covered with a bony shell which is hard to penetrate. No non-poisonous preparation on the market will destroy the eggs (the unhatched tick).

MILLER'S TICK DESTROYER

Positively kills the ticks, eggs and all; is easy to use, and put up in tins which hold enough for 20 sheep, and sold at 35 cents.

HUGH MILLER & CO., Druggists,
167 King St. E., Toronto, Can.

LITTLE'S PATENT FLUID (NON-POISONOUS) SHEEP DIP AND CATTLE WASH

THE ORIGINAL

Non-Poisonous Fluid Dip.

Still the favorite dip, as proved by the testimony of our Minister of Agriculture and other large stockmen.

FOR SHEEP:

Kills ticks, maggots; cures scab, heals old sores, wounds, etc.; and greatly increases and improves growth of wool.

CATTLE, HORSES, PIGS, ETC.:

Cleanses the skin from all insects, and makes the coat beautifully soft and glossy. PREVENTS the attack of warble fly.

Heals saddle galls, sore shoulders, ulcers, etc. Keeps animals free from infection.

NO DANGER; SAFE,

CHEAP, AND EFFECTIVE.

BEWARE OF IMITATIONS.

Sold in large 75c. Sufficient in each to make 250 sheep, from 25 to 40 gallons of wash, according to strength required. Special terms to breeders, ranchmen, and others requiring large quantities.

Sold by all druggists. Send for pamphlet.

GOSSIP.

For writing to advertisers, mention the "Farmer's Advocate."

Mr. W. E. H. Massey, of Toronto, Ont., has established a high-class herd of registered Jersey cattle on his farm near that city, and advertises in our columns a handsome and richly-bred St. Lambert bull, as well as a few young cows and heifer and bull calves. For full information and prices write Wm. Patton, Superintendent, Coleman P. O., Ont. The farm is situated near East Toronto.

A second large importation of Herefords from England to the United States this season has been made. On the latter occasion, Mr. Geo. Leigh, of Aurora, Ill., accompanied by Mr. Joseph Scott, of Montana, a member of the Hallock Cattle Co., of Nevada, and Mr. W. B. Britton, of Hereford, purchased altogether 79 head of pedigreed animals, comprising 18 bulls, 54 heifers and 7 calves, which were shipped by the White Star boat, Tauric.

The April issue of "The Herd Register and Breeders' Journal," published by the American Guernsey Cattle Club (Wm. H. Caldwell, Secretary, Peterboro, N. H.), is a very creditable publication, giving a summary of the history of the breed, a record of a number of milk and butter tests that speak well for the cows as workers, and some excellent photo engravings of typical Guernsey cows, among which is that of Miss Boholink 2157, whose record of 12,437 pounds milk and 696.46 pounds of butter in 1897 proves her to be as good as she looks. She was bred and is owned by N. L. Bowditch, Framingham, Mass. The Register also contains the pedigrees of 132 bulls and 219 females, and transfers of about 275 animals recorded in the last three months, which goes to show that these dairy cattle are growing in favor and are in demand.

W. J. DUCK'S POLAND-CHINAS.

This spring we found Mr. Duck at his post as usual, on his farm at Morpeth, Ont., busily engaged in arranging some splendid large yards for his brood sows for the summer. The herd numbers close to 40 head at present, with a few sows to still hear from. The younger stock are the product of the imported boar Blackamoor 940, by Johnathan 1st 113370, and out of Sterling's Choice 388300. He was imported by his breeder, Mr. W. F. Sterling, Alton, Ill., when under six months, and has done service in the herd two years. As many of the young stock are by him, Mr. Duck now holds him for sale; and he should make a valuable sire in a new herd. Of recent importation is the royally bred, two-year-old boar Goldbug, by A. A. Hidesbrother, recently imported from Hamersville, Ohio, on account of his extraordinary size and evenness. His measurement is 6 feet 4 inches from butt of ear to root of tail, 5 feet 3 inches around his heart and flank, and 9 inches at the smallest part of his hind leg. He was a showing sweepstakes winner at Oxford, one of the best competitions in not only Ohio, but the United States, and naturally much is expected of him. Among the sows we saw the active young Lady Darkness 1106, by Darkness Quality 594 (bred by Gresham Burton, Kansas), dam Princess 773 (sweepstakes sow, Guelph, under six months in '94); she is proving herself one of the very best, and most satisfactory animals in the herd, and much satisfactory stock has been disposed of from her. She is due again in May to Goldbug. Lady Guy 1243, by Columbia Wilkes 29130 A, and out of Hannah 2nd 106904 A (bred by Henry Huffman, Adello, Ill.), was imported early in '97, and is now carrying her third litter to Goldbug, of which much is expected. Butcher Queen, by A. A. Hidesbrother, and out of D.D., was bred by John Duffield, and imported in February. In conformation she is a very sweet type of a sow, possessing evenness not easily excelled; due in May to Lewis Sunshine. Bryant's Model, by Ideal Sunshine 37887, and out of Fancy Price 99108, is now suckling a litter to Oxford Chief, three weeks old, and will be bred to Goldbug to litter in the fall. Seldom seen, by Hidesbrother 840, and out of Highland Mary 943 (a Meredith & Dunlop sow that stands among the very best in the breed), is a strong type of a sow possessing an extra amount of bone, and will be bred to Goldbug to litter early in the fall. Taking them as a bunch, we consider Mr. Duck at least of the times, with a strongly bred, well-gotten, up-to-date stock, which are kept in active, healthy condition, and a herd from which one would reasonably expect to obtain stock that would prove satisfactory. Among the offerings is the two-year-old sire Blackamoor, and orders for spring stock from Goldbug are now being booked.

SPEEDING IN THE RING.

It has been suggested that fair boards using the race track as a drawing card can prevent much crooked work, laying up heats, etc., by dividing a purse of \$300 (for example) as follows: "First heat, \$100—1st, \$50; 2nd, \$30; 3rd, \$20. Second heat, \$100—1st, \$50; 2nd, \$30; 3rd, \$20. Third heat, \$100—1st, \$50; 2nd, \$30; 3rd, \$20." It will thus be seen that each horse wins the money according to his position in the respective heats. Three heats will then settle the race, and each heat will give an interesting exhibition.

Jersey Cattle Club Annual Meeting.

The annual meeting of the American Jersey Cattle Club was held at New York, May 14th. The report shows that, as compared with last year, there has been an increase of 573 in the number of animals registered, and an increase of 211 in the number of transfers recorded. The number registered during the year ending March 31st, 1898, was: of bulls, 3,698; of cows, 9,330; total, 13,028. Vol. 49, recently issued, brings the published entries up to 50,000 in bulls and 129,000 in cows; 62 imported animals have been registered, a larger number than for many years past. The treasurer's report showed the receipts for the year, including balance from last year of \$2,008, to be \$33,732 and payments, including cash on hand of \$2,019, to balance. In addition to this balance the Club has investments to the amount of \$40,000, and books and office furniture valued at \$6,986, and expense accounts and balances due, \$5,355, making the net credit to the Club fund \$49,650. Mr. E. A. Darling was re-elected president.

HEADQUARTERS FOR
