The IMPROVED DANISH MILK SEPARATOR of Burmeister & Wain

which was awarded two gold medals (one in class A, separators for two horses, and the other in class B, or separators for one horse) at the Alborg Centrifugal Milk Separator competition, and also a silver medal at the last St. John, N. B., exhibition. The large size, A machine, requires 1 1/2 horse-power to run it, and will skim 1,200 pounds of milk per hour. The B size requires 0.88 horse-power and will skim 700 pounds per hour. A summing-up of the result of the Aalborg and Vesterung competition may be described as follows:—1st, With the same completeness of skimming and the same quantity of milk worked per hour, DeLaval's separator requires one-third more power. 2nd, With the same completeness of skimming and the same consumption of power, Burmeister & Wain's small (B) separator skims one-third more milk than DeLaval's. 3rd, With the same quantity of milk worked per hour and the same consumption of power, DeLaval's leaves 64 to 65 per cent. more fat in the skim milk. The same report shows that Burmeister & Wain's large size separator requires 1.50 horse-power. Table showing the relative maximum capacity of the Burmeister & Wain and the DeLaval milk separators, and the amount of motive power required to drive them.

J. N. FJORD'S TABLE.

	Capacity.	Completeness of skimming.	Speed.	Motive power required.
	Pounds per hour	Fat left in the skim milk.	Revolutions per minute.	Horse-power.
Laval Separator.....	700 lbs.	0.29	7,000	1.20
Burmeister & Wain (small size).....	700 lbs.	0.30	3,000	0.88
Burmeister & Wain (large size).....	1,200 lbs.	0.25	2,000	1.50
