

DE LAVAL

CREAM SEPARATORS

Their Great Simplicity

THE DE LAVAL CREAM SEPARATOR EXCELS all others, not only in thoroughness of separation, sanitary cleanliness, ease of running and durability, but as well in its great simplicity.

THERE IS NOTHING ABOUT THE OPERATION, cleaning, adjustment or repair of a modern De Laval Cream Separator which requires expert knowledge or special tools.

the frame of the machine. simplicity of construction.

NOR ARE THERE ANY parts which require frequent adjustment in order to maintain good running or to conform to varying conditions in the every-day use of a cream separator.

THERE IS NOTHING about the machine that cannot be taken apart, removed or replaced by anyone who can use a wrench or screw driver. In fact the only tool that is needed in the use or operation of a De Laval Cream Separator is the combination

wrench and screwdriver illustrated below, which is furnished free with every machine. Visit the local De Laval agent and see for yourself its simplicity of construction.

A DE LAVAL CATALOGUE—TO BE HAD FOR THE asking—completely illustrates and explains every detail of cream separator construction.

Combination wrench furnished with each De Laval Separator, the only tool required in setting up, taking down or using a De Laval machine, the simplest as well as the best cream separator ever built.

Fill out the coupon or give information asked for in a letter or postal and get this 72 page book free.

ROOTS AND BRANCHES

The true value of a tree is based upon its root system and limb growth. Trees grown at

Brown's Nursery
Welland County
Ontario

Are famous because of these two points.

If you have land suitable for fruit or ornamental trees, send in your list for prices.

Peach, Apple, Plum and Cherry Trees are our largest output.

Don't Feed the Soil — Feed the Plant

In the top eight inches of average soil there is enough plant food in the form of nitrogen to last for 90 years, in phosphoric acid for 500 years and in potash for 1000 years.

And yet that very spot may prove barren. Plants have to take up their food in solution, in the "sap of the soil." All this food may be locked up so tightly by nature that the plants can't get at it fast enough for the commercial farmer, and he has to put in the same food in the soluble form of fertilizer.

Just so, a fertilizer may, by analysis, have all the necessary elements and yet not give the plant full value because these elements are not ready soluble.

Put into your ground a fertilizer that will feed not your already overstocked soil but your hungry crops with food which is available and easily absorbed.

Bowker's Fertilizers

have chemically correct elements—there is a brand to fit every need. More than that, these chemicals are blended and mixed so that they are rendered water-soluble and go into your ground in the most available form. Most crops do most of their feeding in 60 days.

Write for our illustrated catalogue, based on forty years of experience. In writing, state what your crops are.

BOWKER FERTILIZER COMPANY
43 Chatham Street, Boston, Mass.

Central Nurseries, St. Catharines, Ont.
