RAILROAD ACCIDENT .- One of those sad accidents which we are so often called upon to re-cord, took place in this town on Monday morning last. Owing to the snow and sleet which fell the day previous, it became necessary to clear the track of the railroad, and for this pur-pose, two engines with a snow plow and tender started out a short time before the passenger train was to leave. On reaching the Magog bridge they had attained a speed of ten miles an hour; and when a few feet past the pier in the centre, Mr. John Finne, the engine driver heard received a cut upon the eye. Finn remained on his efficie until it stopped in the sand, when, his ergine until it stopped in the sand, when, first ascertaining that those on the rear engine and tender were safe, he went to look for Hughes, whom he found just expiring, the wheels of the whole of the cold season our troops burned to death before it was possible to rescue her. THE DINNER TO LORD VISCOUNT BURY -It was reported, in the course of vesterday, that Viscount Bury had met with a serious accident from a fall when skating at the rink outside St. Louis Gate. It appears that his Lordship dislocated his arm, and was otherwise severely shaken. The arm was restored, and the other consequences were not so severe as to prevent the noble guest from honoring the banquet, which had been prepared for him. The decorations of the room were splendid, the feast were such as Mr. Russell knows so skilfully to provide, the arrangements were excellent and all went off exceedingly well. From certain instructions that have recently appeared, we learn that the Roman Catholics of this country feel their position strong enough to encourage them to attempt to arrest the progress of education here. The occasion is not, per haps, inapily chosen, as it is one which is not of itself, perhaps, likely to attract much attention. It seems that the senators of the London Uni versity have, by a recent statute, determined to add mental philosophy to the other subjects on which examinations were required previous to granting degeres. The warning was not unnecessary, for of late the French papers have been filled with speculabeing the expulsion of the German power from Lombardy. THE efficacy of this preparation, for the cure of Chaps and in removing Fimples, 8pots, &c., from the skin renders it an invaluable adjunct to the Toilet. It will be found to invigora-e those important functions of the skin on which depends its puriry and softness. During th frosts and bleak winds of winter, and in case- of sting from Inserta, Chilbhaim Chaps, Sore Lips, and to allay ir ritation of the skin after shaving, its virues will be apparent; being free from any admixture of caustic or delegaterious ingredients, it can be recommended for the most tender and delicate infant.
