Lump Jaw

The first remedy to
 cure Lump Jaw was
Fleming's Lump Jaw Cure
 and it remains today the standard treat-
 ment, with years of success back of it,
 known to be a cure and guaranteed to
 cure. Don't experiment with substitutes
 or imitations. Use it, no matter how old or
 bad the case or what else you may have
 tried—your money back if Fleming's Lump
 Jaw Cure ever fails. Our fair plan of selling,
 together with exhaustive information on
 Lump Jaw and its treatment, is given in
 Fleming's Vest-Pocket
 Veterinary Adviser.
 Most complete veterinary book ever printed to
 be given away. Durable bound, indexed
 and illustrated. Write us for a free copy.

Among the Western Representatives
 in Congress is one whose lack of personal
 comeliness is the basis of personal ban-
 teagues.
 "Why, Willie," said one of them to
 the ten-year-old son of the Congressman,
 "how much you resemble your father!"
 "Yes, sir," responded Willie, with
 an air of resignation. "Everybody
 says that, but I don't think I deserve
 it."

DODD'S KIDNEY PILLS

FOR ALL KIDNEY DISEASES
 CURES RHEUMATISM
 BRIGHT'S DISEASE
 DIABETES BACKACHE
 NUMBER 23 THE PRO...

by giving wheat flour in water to
 drink. Clear water must not be al-
 lowed until the symptoms are re-
 lieved. Powdered chalk in two-ounce
 doses, with powdered opium, one
 dram, well shaken up in a pint of
 cold water and given as a drench
 every two hours until relief is ob-
 tained; or, subnitrate of bismuth, one
 ounce, and powdered opium, two
 drams, given in cold linseed tea three
 times a day is very beneficial. When
 the urgent symptoms have subsided,
 cold linseed tea may be allowed in
 the place of the flour gruel for drink-
 ing. Examine well the food and
 water. You may here discover the
 cause of the trouble. If found to be
 at fault, take steps to remedy it at
 once. His present condition is, no
 doubt, due to the gastro-intestinal
 congestion or inflammation set up
 during the attack of diarrhoea. Cer-
 tain structural changes have taken
 place in the mucous membrane of the
 bowels, which has also involved the
 intestines, with the result that you
 have a chronic case of indigestion and
 malnutrition. The only treatment
 to be recommended is careful dieting
 on easily-digested food, such as you
 are feeding. Do not over feed.

SWAMP FEVER
 Mare eight years old, about 1,600
 lbs. weight, was always used to get-
 ting oats, but this summer had to
 go without. She has had a ravenous
 appetite for hay. I have been feed-
 ing coarse slough hay. She started
 to fail, and in five days had got very
 weak and thin, and lost her appetite.
 I gave her hop tea. She began, as
 I thought, to improve. I fed her
 boiled oats with some condition
 powders three times a day. The
 ninth day she seemed worse. The
 tenth she took a chill; then sweat,
 and seemed to have considerable pain,
 but could not rise. She died about
 six hours after. I opened her, and
 the heart seemed all right. The left
 lung was dark, and when cut was a
 little frothy, and when the lungs
 were spread out flat they measured
 about two feet across and two and a
 half feet long by eight inches deep in
 center. The liver seemed dark and
 a little frothy, and had kind of mossy
 spots all over it about half an inch
 long and an eighth of an inch wide,
 lining of the stomach was gone; some
 red spots on the bowels looked like
 inflammation. The day before she
 died a blab came out of her rectum.
 I found when I opened her it was
 about an inch apart. Half of the
 the lining of the rectum filled with
 bloody water. There seemed to be a
 lot of water outside the bowels be-
 hind. Her kidneys seemed all right.
 What was the cause of death? What
 should I have done? Is there dan-
 ger of other horses catching it?
 R. B. P.

Ans.—We are of the opinion that
 your mare died from swamp fever.
 The symptoms, both ante- and post-
 mortem, point to this disease. At
 present there is no known treatment
 for this disease, consequently you did
 all that could be done. So far as is
 known it is not contagious or in-
 fectious from one horse to another.

HEAVY MARE LAME
 I have a large heavy-draft mare
 which went lame in left front foot
 last January. It was exceedingly
 painful, and finally broke at the heel,
 and then, again, along the side of the
 foot just at the top part of the hoof.
 The foot was poulticed, and she was
 given complete rest and she recover-
 ed, only that her foot contracted a
 little. About a month ago she went
 lame again, and two weeks later a
 lump appeared and broke about the
 same place along the side. This
 time it was poulticed with soap and
 sugar until the discharge ceased, then
 it was cleansed daily with a solution
 of carbolic acid, glycerine and water.
 The lameness is nearly gone, and the
 sore is healing, although I have been
 obliged to work her daily at having.
 The foot is always wrapped to keep
 out dirt. She was shod about two
 months ago with bar shoes and a
 leather pad as she is rather flat-
 footed. What would cause this
 trouble, and how should it be treat-

Weak? Tired? Run-down?

These conditions come from overwork, a weak stomach, overtaxed nerves or feeble blood. When you feel "all in"—hardly able to drag about, no energy, no ambition, easily exhausted and can't sleep—take

BEECHAM'S PILLS

and note what a difference they make in your condition. The stomach is the first to feel the good effects. Food tastes good, the digestion is strengthened; bowels and bile work regularly, the blood is cleansed, and the nerves rested. The whole system responds to the tonic action of Beecham's Pills. Soon there is the buoyant feeling of returning health,

Fresh Strength and New Life

Prepared only by Thomas Beecham, St. Helens, Lancashire, England.
 Sold everywhere in Canada and U. S. America. In boxes 25 cents.

Inside Facts
About All Kinds of Roofing

Before deciding on any roofing, for any purpose, send for our free book which will give you the inside facts about all roofings—shingle, tin, tar, iron—and prepared, or "ready" roofings.

This book is fair, frank, comprehensive. It tells all about the cost of each kind of roofing. It tells the advantages and the disadvantages of each, as we have learned them in twenty years of actual test. It is a veritable gold mine of roofing information.

The reason we send it free is because it tells, too, about Ruberoid roofing.

The First "Ready Roofing"
 Since Ruberoid roofing was invented, nearly twenty years ago, there have sprung up more than 300 substitutes. Many of these substitutes have names which sound like Ruberoid. Before they are laid and exposed to the weather, they look like Ruberoid. But don't let these facts deceive you.

A roof of Ruberoid is flexible enough to stand the contraction of the cold and the expansion of the sun's hot rays.

It is so nearly fireproof that you can throw burning coals on a Ruberoid roof without danger of the roof taking fire.

It is rain proof, snow proof, weather proof. It resists acids, gases and fumes.

These wonderful properties of Ruberoid are due to the Ruberoid gum which we use—our exclusive product.

Ruberoid roofing also comes in attractive colors—Red, Green, Brown, suitable for the finest homes. These color roofings are made under our exclusively owned patents.

The colors of Ruberoid do not wear off or fade, for they are a part of the roofing.

If you are going to roof, though, learn about all roofs. To get this book, address Department 97K The Standard Paint Company of Canada, Ltd., Montreal.

RUBEROID
 (TRADEMARK REGISTERED)

Be sure to look for this registered trademark which is stamped every four feet on the under side of all genuine Ruberoid. This is your protection against substitutes which many dealers brazenly sell as Ruberoid. Ruberoid is usually sold by but one dealer in a town. We will tell you the name of your Ruberoid dealer when you send for our free book.

"The Land of the Big, Red Apple"

Write us for information of the best of the Famous Okanagan Valley. Our booklet is free to those interested.

Fruit lands at reasonable prices where irrigation is not required. Climate unsurpassed, rich soil, pure water, good schools—in fact everything one could wish for to make life worth living.

FISHER & SAGE
ARMSTRONG, B. C.

W. J. McCALLUM
BRAMPTON, ONT.

My next importation of fillies, mares and stallions will arrive about the middle of September—a larger and better importation than ever.

Our former importation have been sold within the shortest period of any importer in America, which proves we handle the best. We are satisfied with small profits which also accounts for quick sales. If you want the best at the same price others are asking for an inferior class, I would strongly advise intending purchasers to wait and see my stock first. This importation, the majority of which will be bred, will have size, quality and breeding. The place at which these fillies and stallions will be disposed of is to be announced later. Address all communications to Brampton, Ont.
