

CYANIDE

WHEN YOU NEED IT

The mills operating on Aero Brand Cyanide in Mexico, Canada and the United States, have never shut down from lack of cyanide.

The raw materials used in making Aero Brand Cyanide are obtainable in unfailing abundance—(1) **Cyanamid**—made at the same plant, for various purposes, at the rate of 72,000 tons per annum, and (2) **Common Salt**, readily obtainable in the open market in unlimited amounts.

The process of manufacture is simplicity itself—merely fusing the raw materials together in a suitable furnace.

Aero Brand Cyanide, developed three years ago to meet an acute cyanide shortage, and since used at the rate of thousands of tons per annum, has never missed shipment when wanted. Moreover, it is always sold, basis 100% NaCN, at prices practically equal to the lowest pre-war prices of sodium cyanide.

Send for Booklet C, telling about this dependable, money-saving product.
