MAKING DREAMS COME TRUE.

It is not given to every body to purchase the lost delights of golden-houred boyhood. But Edward Tilden, Chicago's millionaire packer, has found it possible to retrace the Road to Yesterday and to reclaim from eternity at least one halcyon day which, as a boy, he was denied. A half century ago a tanned, barefooted country lad with a big lump in his throat stood by the roadside near Delavan, Wis., and watched a circus caravan disappear over the hills. That was as near as he had ever come to seeing a circus. The red gods had called; he could not follow. And as his hopes faded away and his visions of a sawdust ring and pink lemonade were buried in his heart forever, he vowed that some time he'd come back and "take every kid in town to the circus." How faithfully he kept his promise, 2,800 youngsters of his boyhood home can tell you. On a recent June day the boys and girls from miles around were treated to a circus, an aeroplane flight and a picnic on Mr. Tilden's Wisconsin estate. Ah, and the bitterness of years was swept away by one look into their happy faces! They at least had not been cheated, and their wildest dreams had come true. That day will be written in their calendars in gold letter while a correction will be made on that kept by a country boy fifty long years ago.—(Colliers.)

WORLD'S COPPER SUPPLY.

September recorded another big drop in the world's visible supply of copper, the decrease at all points amounting to no less than 24,000,000 pounds, the largest in several months. On October 1, surplus was 92,000,000 pounds, the lowest on record, and equal to about a week's supply—were all the European stocks commercially available—at the present rate of consumption. With such a small amount of the metal on hand, it is not wondered at that the producers stand firm on their present quotations for the metal, notwithstanding the consumers are holding aloof.

NEW YORK AND LONDON.

"We are hopeful," one of the well-known London financial journals comments, on the money situation, "that the United States, in spite of the somewhat heavy demand for gold for Canada expected to be experienced, will not need to take gold from London, but that it will obtain the additional cash required to get through the autumn out of the idle money in the Treasury. There is, indeed, much more need for gold shipments to the Continent than to the United States."

BURBANK ADVISES BOYS.

Luther Burbank, by experience and accomplishment doubtless the best-qualified man in the world to-day to make such a statement, says the great opportunity for our boys and young men is in agriculture. He points out that after the young man has spent eight years at hard study of medicine, the law or engineering, he has not made a success; he is only prepared to commence the battle for it. Whereas, to add but one kernel of corn to each ear grown in this country in a single year would increase the supply five million bushels. One improvement in the potato is already paying back \$17,000,000 a year. Everything we eat and wear comes out of the ground. With less than half our population raising things, should there be any wonder that the cost of living has increased 58 per cent. in fifteen years? To quote Mr. Burbank:

"What the world needs, urgently and now, is men who can increase the forage from our present acreage so that sixteen cents will buy a pound of the choicest sirloin, as of old, instead of a pound of rump, as now.

"What the world needs is not theory, or agitation, or college lore; there are plenty of these, and at a cost of one hundred and eighty million dollars per annum in money and who knows how much time, they have succeeded in increasing our crop yield only a bare 3 per cent.

"What the world needs is men who can do to agriculture and to horticulture what Edison did to electricity, Carnegie to steel, and the Vanderbilts, Hills and Harrimans to transportation—develop their efficiency."—(Popular Mechanics.)

PURPOSE OF THE HIGHER BANK RATE.

"The advance in the Bank of England, rate," according to the London "Statist," "is not a serious matter. It is intended to be precautionary, and as a notification to certain countries of the limited supply of gold in London. The notification is doubtless intended primarily for Germany, Russia, and New York, all of which are able to refrain from taking gold without suffering any serious consequences."

ANTICOSTI ISLAND.

Henri Menier, the French chocolate manufacturer who died recently, was chiefly known to Canadians because of his purchase of the Island of Anticosti in 1895 for \$125,000. The island which lies in the Gulf of St. Lawrence is 135 miles long and 40 miles wide. Mr. Menier spent large sums of money in developing the island and in recent years a large amount of pulpwood has been produced which has been shipped to Ontario mills.
