

Another Royal Suggestion COOKIES and SMALL CAKES From the NEW ROYAL COOK BOOK

WHEN the children romp in hungry as young bears, here are some wholesome, economical, delights that will not only be received with glee, but will satisfy the most ravenous appetite in a most wholesome manner.

Cookies
1 cup shortening
1 cup sugar
1 cup milk
2 eggs
1 teaspoon grated nutmeg
1 teaspoon vanilla extract or
grated rind of 1 lemon
4 cups flour
3 teaspoons Royal Baking
Powder
Cream shortening and sugar
together; add milk to beaten
eggs and beat again; add
slowly to creamed shortening
and sugar; add nutmeg
and vanilla; add 2 cups
flour sifted with baking powder;
add enough more flour
to make stiff dough. Roll out
very thin on floured board;
cut with cookie cutter, sprinkle
with sugar, or put a raisin
or a piece of English walnut
in the center of each. Bake
about 12 minutes in hot oven.

Cocoa Drop Cakes
4 tablespoons shortening
1 cup sugar
1 egg
1 cup milk
1/2 cup cocoa
1/2 cup flour
1/2 teaspoon Royal Baking
Powder
1/2 cup vanilla extract

ROYAL BAKING POWDER

Absolutely Pure

MADE IN
CANADA

"Bake with Royal and be Sure"

Cream shortening; add sugar
and well-beaten egg; beat
well and add milk slowly; sift
flour, baking powder, salt and
cocoa into mixture; stir until
smooth, add vanilla. Put one
tablespoon of batter into
each greased muffin tin and
bake in moderate oven about
20 minutes. Cover with boiled
icing.

Orange Cakes
4 tablespoons shortening
1 cup sugar
1 cup milk
2 eggs
1/2 cup flour
3 teaspoons Royal Baking
Powder
1/2 teaspoon salt
1/2 teaspoon orange extract
grated rind of 1 orange

Cream shortening; add sugar
slowly, beating well; add milk
a little at a time; then add
well-beaten egg; sift flour,
baking powder and salt to-
gether and add to mixture;
add flavoring and grated
orange rind; mix well. Bake
in greased shallow tin, or in
individual cake tins, in hot
oven 15 to 20 minutes. When
cool cover with orange icing.

WEDDINGS

KENT—YOUNG
At Bathurst, on Wednesday, Miss
Marjorie Young, Caracquet, daughter
of F. T. B. Young, was married to
Harold Kent, son of W. J. Kent, by
Rev. A. D. Archibald.

The bride wore a tailored costume
of African brown velour. With this
was worn a fur beaver hat of
line flowers draped with brown. The
bouquet carried was bride's roses.
Miss Helen Young attended her sister
and was gown in blue georgette
crepe with trimmings of jet beads.
She carried pale pink roses, wore
furs of ermine and close fitting hat
of rust-colored satin.

RYAN—RYAN

In New York city on Saturday, Wil-
liam Ryan, of Kouchibouguac, Kent
county, was united in marriage with
raptal mass to Miss Mary Ryan, a
former teacher of Chatham, N. B. Mr.
Ryan, who is a contractor and build-
er in New York, has many friends in
Moncton and vicinity.

OBITUARY

MR. THOMAS ROSS

The death of Mr. Thomas Ross
occurred at his home in Blackville
on Monday evening Oct. 25th after
an illness of a week of pneumonia.
The deceased was in his 81st year
and well known and highly respected
by all who knew him.

He is survived by his wife, six sons
and two daughters. The sons are
Charles, Robert, Marshall, Thomas
and Joseph of Blackville and Mel-
bourne of Three Rivers, Que. The
daughters are Mrs. David McPhail
and Mrs. Earl Donahue of Blackville.
The funeral was held Wednesday
morning services being conducted by
Rev. S. J. Crumley, interment in
St. Raphael's cemetery.

PROFESSOR JOSEPH ADAMS

Many friends throughout the province
will learn with regret of the
death of Professor Joseph Adams, at
8.30 o'clock Thursday morning, at the
residence of his daughter, Mrs. D.
Smith Reid, Mecklenburg St. The de-
ceased has been suffering from heart
trouble for some months and death
was not unexpected. He was in his
70th year of age and was born in Bir-
mingham, England. Professor Adams
was a musician by profession. He
graduated from Royal College, Bir-
mingham, Eng., served twelve years
in the Imperial Army, and on three oc-
casions played concert solos before the
late Queen Victoria, and was personally
congratulated by Her Majesty.

The deceased was well known in
the Maritime Provinces and filled the
position of organist in several towns.
Professor Adams was a Presbyterian
in religion and beloved by all who
knew him. The funeral took place
Friday afternoon, Nov. 5 at 3 o'clock
from his late residence, 77 Mecklen-
burg street.

The late professor Adams was Band
master of the 132nd Battalion, and
during the summer conducted a class
of musical students in Newcastle. At
the time of his becoming indisposed
he resided in Newcastle and returned
to St. John with his daughter.

ment of the young, further that the
activity of this gland depends quan-
titatively on its iodine content. Ex-
haustive investigation has shown
that in the sow this iodine content
was much lower during the normal
or usual months of pregnancy, than at
any other time during the year. All
of the above the hog-man may re-
gard as fearful and wonderful. The
fact remains that the introduction of
iodine into the pregnant sow's ration
may have the effect of causing a
normal litter, where the contrary
had been the case previously.

Methods of Prevention

There is no way to treat the af-
fected small pig. Prevention only is
possible through the sow.
1. Feed a light grain ration, as re-
quired, but balance it with plenty
of clover hay in racks, and with pul-
verized mangels or cooked turnips. Make
mineral feeding a feature, charcoal,
soft coal, wood ashes, ground rock
phosphate, earth, soda, etc. The use
of tankage, fish meal, bone meal, etc.,
is also recommended. Place where
the sows may help themselves from
self-feeders or in the meal ration, 2
to 5 per cent. In many cases as pre-
viously stated, particularly in East-
ern Canada, such preventive practice
for some reason, is effective. In
Western Canada, however, where the
phenomenon is regularly the cause
of very serious losses, the trial of a
direct addition of iodine in the form
of potassium iodine would be re-
commended. The minimum dose re-
quired to give results is not definite-
ly known; however, the adminis-
tration of 5 grain doses of potassium
iodine daily during the pregnant pe-
riod has proven almost a certain pre-
ventive. In fact, the use of this drug
two or three times weekly, is recom-
mended where it is used during the
complete gestation period. In prac-
tice, the best plan would be to have
a druggist make up a solution of
known strength or dilution. By the
use of a small measuring glass and
known quantity of the solution, the
desired amount of potassium iodine
could be added and stirred upon the
slop or meal, depending upon the
number of animals fed.

PERSONALS.

Mr. D. W. Stothart left on Sunday
for Montreal, Que.

Alderman W. L. Durisk left on Wed-
nesday for Montreal.

Mr. James Robinson of Millerton
was in town yesterday.

Mr. Harvey Way of Wayerton has
returned from the West.

Mr. and Mrs. Robt. Melrose, left
yesterday for St. John, N. B.

Mr. John T. Sutherland of Blis-
field was a visitor to town yesterday.
Mr. and Mrs. John Elder of Mil-
bank spent Sunday in town with
friends.

Miss Isabelle Long of St. Clair,
Madawaska Co. is visiting Newcastle
friends.

Misses Clair and Josephine Wheeler
have returned from a pleasant visit
to St. John.

Mr. Harry Cassidy left last night
for Hamilton, Ont. to study elec-
trical engineering.

Miss Dora Harper of Bushville left
last week for St. John, where she
will spend the winter months.

Mr. Edward Menzie and Mrs. L. C.
White spent a few days last week on
a bird shooting trip at Tracadie.

Mrs. Archie Taylor and little son
Hilton of Fredericton spent last
week with Mr. Wm. B. McCullam,
Jane St.

Mr. J. Ander, formerly manager of
the Canadian Gear Works passed
through Newcastle, Sunday, en-route
to Montreal.

Mr. and Mrs. W. W. Cormier and
Mess George Dunn and Michael
Coughlan, who motored through to
Boston a few weeks ago, have return-
ed home.

The friends of Mr. and Mrs. Chas.
Delano will be glad to hear that their
little son, Gordon, who was kicked in
the face by a horse some weeks ago
has fully recovered.

Miss Gertrude Buckley, who gradu-
ated from St. Vincent's hospital,
New York, in May, arrived home on
Sunday's Limited to visit her parents,
Mr. and Mrs. J. D. Buckley.

The Rev. Clarence MacKinnon, M.
A. D. D. Principal Presbyterian Col-
lege, Halifax, N. S. left for Halifax,
on Monday morning's Maritime Ex-
press to resume his duties there, after
conducting The Memorial Service in
St. James' Presbyterian Church on
Sunday.

MISSING RADIUM FOUND

UTICA, N. Y., Nov. 4.—The thirteen
thousand dollars worth of radium,
belonging to a Utica physician, which
was lost in a hospital sewer last Sun-
day, was found yesterday in the
sewer pipe not far from the hospital.
The radium was thrown into a toilet
bowl by a patient who felt annoyed
by its heat. Twenty men have
been uprooting and examining the
sewer since its loss was discovered.
The radium was in a vial especially
made for it and it is in three por-
tions, each about the size of a small
bird shot.

PILES

Do not wait
another day with
itching, bleeding,
or protruding
Piles. No
surgical opera-
tion required.

Yields of Bush Fruits in Canada

At the Central Experimental Farm,
the average yield of the Herbert ras-
pberry for two years on one row ninety
feet in length was at the rate of more
than 205 bushels per acre. Under
field conditions, cultivated raspber-
ries produce from 50 to 100 bushels
of crop per acre, according to the sea-
son. Gooseberries at 40 pounds per
bushel yielded at the rate of 909 bus-
hels to the acre. Red currants gave
202 bushels to the acre in one instanc-
e and 49 bushels in another. These
figures are taken from a new bulletin
issued by the Experimental Farms at
Ottawa on the subject of "Bush
Fruits." In this pamphlet the cur-
rant, gooseberry, raspberry, blackber-
ry, dewberry, and loganberry are
treated in such a way as to make
their cultivation and to understand
the merits of the different worthy
varieties. It is pointed out that the
currant, gooseberry, and raspberry
grow wild almost if not quite to the
Arctic Circle. The treatise is the
result of experiments carried on at
the Central Experimental Farm and
the widely separated branch farms
and stations. This publication, which

Royal Bank Loses \$13,000 By Theft

TORONTO, Nov. 4.—About \$13,000
was stolen from the Royal Bank at
the village of Woodbridge, Ont., last
Tuesday, and yesterday James Flem-
ing, who is said by the police to have
been the accountant of the Wood-
bridge branch of the Royal Bank, was
arrested in this city on a charge of theft.

CHANGING THE "BUSHEL" PER ACRE" FIGURES

Hard work plus experience plus
plenty of fertilizer in Maine produced
290 bushels of potatoes to the acre.
Hard work plus experience plus lit-
tle or no fertilizer in Michigan, Min-
nesota and Wisconsin produced 100
bushels to the acre.

—New Jersey Experiment Station.
is designated in Bulletin No. 94, and is
available at the Publications Branch
of the Department of Agriculture at
Ottawa, contains also a treatise on
the common diseases of bush fruits
and the insects affecting them with
methods of control.

The Mystery of Hairless Litters

To the swine grower the pheno-
mena of hairless litters is a mystery
in so far as origin is concerned. He
simply knows that sows normal in
every way farrow litters that are
quite abnormal in one, all, or a com-
bination of the following:—comple-
tely or partially hairless, with unde-
veloped hoofs; blind; very large, flabby
and with abnormal development of
the head and neck; very small weak
and undeveloped generally. Such
pigs usually die in from a few hours
to a few days after birth. Not all
pigs in the litter are so affected some
being quite normal. The sow remains
normal.

While the scientist has arrived at
what is possibly the direct constitu-
tional cause, the preliminary causes
are also more or less in mystery.

Some Inconsistent Facts

A breeder may one year lose 90%
of his pigs and the next year with
the same breeding stock, feeds, quar-
ters, water and management, obtain
a normal increase. In certain years
and localities that trouble seems to
be almost of an epidemic, only to
disappear entirely. Is it due to
seasonal influence? Is it transmissi-
ble? Is it due to some poisonous
element in the sow's ration which
leaves her unharmed but which ar-
rests or renders abnormal the later
development of the pigs in the litter?

**The Apparent Cause of the Hairless
Pig.**

It cannot be stated definitely that
the cause is seasonal. Certainly
there is no consistency in such a
claim. The possibility of contagion
is also most difficult to assume. It
would, further, seem illogical that
any actual poison, to the foetus
would leave the sow quite unharmed.
Apparently the difficulty lies in some
deficiency of the sow's ration, which
is essential to the normal growth of
the little pig. Apparently too, this
malady or abnormality is similar to
the thyroid affections of calves and
lamb.

Sows are
