After a bitter debate, the American Federation of Labor, in its annual convention here to-day, refused to call upon the United States Government to lift "all blockades" against Russia and recognize Soviet Government. The Federation went on record as "not justified in taking any action that might be construed as an assistance to, or approval of Soviet Government, so long as it is based upon authority which has not been vested in it by a popular representative National Assembly of the Russian people, or so long as it endorses or creates revolutions."

### AMERICAN ARMS SEIZED.

DUBLIN, June 15. Removal of personal arms from officers of an American ship, which arrived at Dublin, became the subject of inquiry by American Consular officials to-day. When the freighter Milwaukee Bridge arrived at Dublin recently, the police took the pistols from the captain and three other officers under the pretext that a raid for arms by Sinn Feiners was feared. It is pointed out that a ship while in port is under local laws, but American officials want assurances that there is an apparent necessity for the seizure of arms in Irish ports.

## So-Called Sugar Shortage Does Not Exist.

The National Preserves and Food Products Association announced at New York that its members will stay out of the sugar market until the price of the sugar comes down from its present high level. The association claims to represent 85 per cent. of the manufacturers of the country who make jams, jellies and preserves.

"The so-called shortage of sugar does not exist," read a statement by Marcus Blakemore, President of the Association, who has investigated available supplies with the help of the Department of Justice and representatives of the refining industry. "Present prices represent pure inflation, caused through hoarding by sugar speculators."

He said that with the sugar that has already been received in the United States and the amounts contracted for and available on the Cuban market, an excess of more than 500,000 tons over last year's total consumption, is in sight.

"Last year, with a Government-fixed price of nine cents a pound, we did not use nearly as much sugar as we have available this year," Mr. Blakemore declared. "And this year, owing to the condition of foreign exchange and transportation conditions the demand for export is much smaller. The net result is that there is plenty of sugar, but the public has been scared into paying the exorbitant and outrageous prices for the speculators who have shouted 'shortage,' and held their stocks for still higher prices."

Mr. Blakemore said that he and other members of the association had been surprised by the amounts of sugar they found stored up in the United States.

"When we started this investigation we thought, as everyone did, that there really was a shortage. Our purpose was to discover where the sugar was so we could buy it for use in our business. When we discovered the facts, we called a meeting of the association."

"After the members heard our report of conditions they voted unanimously to refuse to purchase sugar until present high prices are cut in two. We will close down our factories after using up the supplies we now have if the speculators refuse to listen to reason."

It is the hope of the association, Mr. Blakemore said, to start a country-wide movement among manufacturers using sugar and also among the housewives of the country aimed at the present high prices. "If the housewives want to help, they should begin by using up the small supplies of 25 to 100 pounds which most of them have stored away," he said. "As soon as the dealers see that buying has ceased, prices will tumble and the enormous stocks now stored in warehouses and freight cars will become available at reasonable figures."—Ex.
