Number of Victims May Never Be Knowa as Many Were Completely Cremated.

Binghamton, July 24. - Owing to the thoroughness with which the fire licked up everything in its path at the overall factory, it is absolutely impossible at the present time to give an accurate list of the dead. Many bodies were entirely cremated, and of others only a few bones are left.

The horror of the holocaust deepens as bodies are uncovered in obscure quarters and the death list grows. The directors of the Binghamton Clothing Company are standing by their estimate of 111 employees in the factory at the time of the fire. Of this number, 44 are dead, 50 escaped, 7 are in the hospital, 3 are being cared for at their homes, and 7 are

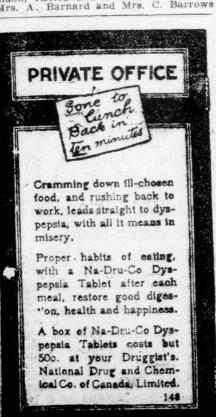

b unaccounted for. Bodies Clustered. Late yesterday afternoon a cluster of bodies was uncovered in the northeast corner of the building, facing street, where the victims had evidently rushed towards the windows in hopes of escape. It is now feared that the estimate of the Binghamton Clothing Company as to the number

lost will be exceeded Inquiries in Progress. Three investigation are in progress or proposed, into the cause of the holocaust. A determined effort will he made to place the blame on the present system of factory inspection and it is probable that a radical change in factory laws will result. Coroner Seymour announced today that a rigid investigation of the fire would begin tomorrow and subpoenaes have been issued for the survivwho will be called upon to describe factory conditions and explain the congestion at the fire escape and

WILSON PLANS TO INTERVENE IN MEXICO SOON

United States Will Take Steps To End Present Unsatisfactory Situation.

Rumor That Ambassador Who Is Coming Home May Not Return.

Washington, July 23 .- President Wilon has apparently reached the conlusion that the time has come for he United States Government to take action having for its object the ending of hostilities in Mexico and the re-establishment of law and order

The plan which the President and his advisers have under consideration embraces alternately propositions that may be set forth as follows:

Offer Mediation. First, that the United States Govrnment offer its services as mediator o bring about an agreement between the Huerta Government and the Constitutionalists under which both sides will cease hostilities, agree to hold a constitutional election for President and Congress at an early date, and accept the result of that election, the Government of the United States agreeing in return to recognize the ederal authority thus constitutional-

chosen and installed. Second, failing that, that the United States Government rescind the privlege possessed by the Huerta Government of importing arms and other munitions of war from the United States, thus placing both Huertalsts and Constitutionalists on an equality that particular.

Stop War Supplies. There is a report current that the President had determined not to permit further war supplies to be sent from the United States to Mexico, but other information is that whatever acted upon until Ambassador Wilson as reached Washington and has given a first-hand account to the President and Secretary of State of the condiions that prevail in Mexico City and hroughout Mexican territory. Ambasalor Wilson is expected to reach New ork by steamer from Havana on Friay afternoon, and his conference with ne President will take place that night

r on Saturday. Will Not Return. While there is no official authority or the statement, it is the general understanding in administrative circles hat the ambassador will not return to Mexico City in an official capacity That much appears to have been determined in advance of his coming.

Reforesting Proves Highly Profitable

[Canadian Press.] Sunapee, N. H., July 24.-The plantng of 5,000,000 acres of New England and with lumber could easily yield an annual revenue of \$10,000,000, and would produce all the timber required by the people of that section, said Dr. B. E. Fernow, dean of the Forest School of the University of Toronto,

ence today. He cited instances where intelligent orestry had increased land value from five to ten fold in 50 years. For New England he recommended municipal enterprise in recovering waste lands, with state supervision which, he declared, would be immensely profitable and effective in furnishing supplies.
