POTATOES = =
CABBAGE = =
= = = CARROTS

Potato disease may generally be checked or prevented by a judicious use of salt, which also acts as a solvent of potash compounds, and keeps off the grubs. Cabbages and carrots require 300 to 700 lbs. salt per acre in proportion to the lightness of the soil. Kohl rabi requires similar quantities.

Let Us Heat Your House...

WITH OUR

Hecla Coal or Wood Furnace

in which we have incorporated all the latest improvements in Furnace construction.

The Dome and Radiator are combined and constructed with our Patent Fused Joint, making it absolutely gas-tight.

It is fitted with a large double-feed door, making it suitable for large, rough wood.

The fire-pot is in two pieces, with a flanged extended surface, which keeps it from warping or burning out.

The Hecla works perfectly with any kind of fuel; hard coal, wood and soft coal, for which we provide a Hot Blast attachment which ensures perfect combustion.

Send a rough sketch of the building you want heated and we will give you estimates and advice.

We Manufacture all kinds of
Furnaces, Stoves and Hollowware.
