

NEW YORK EXCHANGE.

EARLY RALLY CAUSED BY COVERING OF SHORTS—COALERS FIRM—GRANGERS STEADY—SUGAR QUIET—STOCKS GENERALLY CLOSE HIGHER.

New York, March 7.

The market for Americans in London after a heavy opening has recovered somewhat and is now irregular and dull. Some buying orders are said to have been called over from this side.

The two most interesting features of yesterday's market were the flurry in call money, and the comparative strength of the coalers under the lead of D. L.

The buying of D. L. is based on the expectation that under the new president the relation between that road to other anthracite coal carrying roads will be of a more harmonious nature than in the past. The stock advanced materially on comparatively light purchases and it is believed now that the minor holdings of Prest Sloane have been marketed. Opinions differ regarding the money market. The professional element being inclined to predict considerable stringency, basing their opinion first of all on Saturday's bank statement and secondly on the very large disturbances which will have to be made in connection of the Central Pacific and the purchase of the Chicago & Alton. About \$14,000,000 will have to be paid towards the end of the week in connection with the Central Pacific readjustment, and about March 15th the purchase of the Chicago & Alton will call for some \$24,000,000. The effect of the latter payment upon the money market will be transient in as much as the money, so paid out will quickly be returned to the banks.

One of the strongest stocks yesterday was General Electric there has been no activity in the stocks for some time but some stockholders however, recently made an examination of the conditions of the company and reported that at least 12 and probably 16 p.c is being earned on the stock.

The stocks which yielded most easily to the pressure during the afternoon were the Grangers, and more especially B. Q. Despatchers from Chicago show a falling off in the grain movement during the last week there receipts being 5,147,000 bush. against 6,796,000 for last year. The temper of the room on — is bearish.

The Anthracite Coal stocks are still the strongest features in the market, and there is a great deal of talk about them upon Mr. Morgan's return from Europe. In the main, sugar has been strong and it is now conceded that the regular dividend will be paid, but, as we said yesterday, we do not believe that the people familiar with the American Sugar Refining Co. consider the payment of the regular dividend a bull point on the stock.

There is a pretty good short interest in the grangers, which has made it possible

NEW YORK STOCK MARKET.—March 7, 1899.
