

YOU ARE THE MAN

I want, if you are possessed of the ordinary amount of intelligence and perseverance. If you are, you can make money by obtaining the agency for your district of that staunch old Company, The Germania Life Insurance Company, of New York. Present occupation need not be interfered with, nor is previous experience necessary. Write for particulars, giving references, to George W. Rönne, Manager 46 King Street West, Toronto.

Teachers Wanted

If you intend to fill in the summer holidays by taking an agency of any kind, give us a call before settling on your article. We control an article (made in Canada now) with which many teachers and students, in the States, make big money during vacation. Address:

PERFECTION

BUTTONLESS

FOOTBALLS

Made in Glasgow and as used by the Scottish Football Association there is offered in Canada a football made in imitation of the above design. It is very nice to look at, but for wearing qualities it will not compare with these, as many have found by experience. Had we room we could give scores of letters in corroboration of this. Beware of a fancy looking "match" ball. Ours are all filled with Mackintosh's Best Quality Grey Rubbers, stamped and tested.

PRICE LIST

Perfection, Buttonless \$1.50 \$1.60 \$1.75 \$2.25 \$3.00

FIFTH EDITION

OF

Armstrong's Arithmetical Problems IN

Senior Classes in Public Schools, and Candidates for Entrance to High Schools and Collegiate Institutes.

This edition contains nearly 600 Problems. The Entrance Papers from JUNE 1880 JUNE 1892, both inclusive, are appended, also the Public School Leaving Examination Papers for 1892. The answers to all the Problems are given. No other work possesses these features.

Read What Teachers and Inspectors Say of it:—

I am highly pleased with your Arithmetical Problems for Senior classes. It suits my Entrance candidates exactly. A book such as this is needed by every Fourth Class pupil.—GEO. KIRK, Head Master M.S. Chatham.

I have just examined your Arithmetical Problems for Senior Classes. The problems are very suitable and the collection must prove very valuable to teachers. I heartily commend it.—G. D. PLATT, B.A., P.S. Inspector, Prince Edward.

After a careful examination of your "Arithmetical Problems for Senior Classes," I find them well graded and very suitable for the purpose intended. The teacher who uses them for home or class work, will save himself a vast amount of labor, and in all probability secure to his pupils much better results.—J. S. DEACON, Inspector, Halifax.

I have no hesitation in saying that for the purpose for which it is intended the work is infinitely the best with which I am acquainted. Its strong point, to my idea, is the logical sequence in the problems by which the pupil is almost insensibly led on step by step until he reaches quite a difficult style of question. The printer, too, has done his work very well, and there are but few typographical errors. I shall certainly recommend every teacher in my inspectorate to use a copy.—J. C. MORGAN, M.A., Inspector, Barrie.

Price, strongly bound in cloth, 25 cts.
