St. John, N. B.

The Result of Practical Experience

A GROWING APPRECIATION of the invaluable results obtained by the use of Primary Materials in connection with the education of young children is noticeably evident. Teachers and School Authorities throughout the Dominion are recognizing the far-reaching advantages obtained by transforming the old irksome methods into pleasureable and highly instructive occupations with the assistance of

Bradley's Primary Materials

They supply a wide selection of modern aids to every subject encountered in the Primary Grade—word, sentence and number builders, sewing cards, sticks and splints, weaving mats, cutting and folding papers and other supplies, including many incomparable text books for the Teacher.

If you have not received a catalogue, write us at once.
