Products/Services

Allergy diagnostic tests and treatment • Diagnostic antigen test

Company Summary

Omega Laboratories Ltd. was established in 1959 to manufacture and distribute specialty allergy-related products. The company's B27-Diagnotest was developed to diagnose the presence of the chronic rheumatic disease, ankylosing spondylitis (AS), in association with clinical and radiological evidences. Omega Laboratories is dedicated to the research and development of new products in the field of allergy. Recent developments include a nitroglycerine injection in vial form.

Products/Services

Motorized wheelchair

Company Summary

Orthofab Inc. was created in 1982 as a branch of Transequip, and is now a wholly-owned subsidiary of Equiconcept Inc. of Quebec. Working with rehabilitation centres in Quebec, the company designed the Karma powered wheelchair. Driven by a direct-drive motor, the wheelchair has a small turning radius and is equipped with a reclining back and a modular base that accommodates a variety of seating systems. Orthofab's manufacturing and distribution facilities employ 40 people. Production capacity is 150 wheelchairs per month.
