Dr. H. M. Tory,
President,
National Research Council,
OTTAWA, Canada.

Dear Dr. Tory:

I attach hereto a memorandum on the proposed scheme for collecting material from the Hudson Bay - Labrador area: and I would be very grateful for any assistance from General MacBrien that you can obtain. I think his Department will be interested as both dogs, related wild carnivores and fur animals and their food animals are of great importance in the Territories.

As requested at the Meeting, I have sent a copy of this letter and memo. to Sir Arthur Currie.

Yours sincerely,
