The Internal Nerves

The Nerves Which Drive the Machinery of the Body-the Heart, the Lungs, the Digestive Organs.

You prick your finger and know that it is the nerves which carry the painful sensation to the brain. You move your hand, and realize that the idea of movement started in your mind. But did you ever think that every beat of your heart and

every breath of air taken into your lungs is dependent on a constant supply of nerve force ? It is the internal or sympathetic nerves which drive the machinery of the body, and from their derangement or exhausted condition arises

weakness of the stomach, feeble action of the heart, or inactivity of liver and bowels. When nerve force fails every organ of the body becomes more or less deranged. Indiges-

tion, sleeplessness, headaches, irritability and nervousness are some of the first indications. You lose energy and ambition, find your work a drudgery, and grow weak and listless. As time goes on you become more and more helpless, until nervous prostration or collapse bring you to the sick bed, and long months are often necessary for the restoration of the exhausted nervous

Even in this extreme condition Dr. Chase's Nerve Food will usually cure if its use is persisted in, but how much wiser it is to heed the warning in the early stages and keep the

nerve force at high-water mark. No restorative has ever proven its worth in so many thousands of cases as has Dr. Chase's Nerve Food. What it has done for others it will do for you under similar conditions. By forming new, rich blood it nourishes the starved and depleted nerves back to health and vigor, and thereby overcomes the cause of weakness and diseases of the nerves.
