## Directions to Travellers, &c.

Oysters, cockles, scollops, &c. viz. Bivalves, or shells in pairs, should be preserved with their original

ligaments or fixtures.

Sea and water-shells of the trochi, wilk, snail, volute, or buccina, &c. species have an operculum or door (without which they are not complete) these they shut when at rest to desend; the sew without adhere to the rocks or ground for desence.

Clear the large of their fish without boiling if possible; the small may be kept with the operculum, and fish in them, without offence, in bran, sand, &c. to

be dry.

Boiling oft hurts and even changes the colour; as lobsters, crabs, &c. corals, and all sea-plants; weeds,

when the different fizes cannot be had.

All coloured stones, earths, clays, minerals, metals, and ores to be taken as you find them; stones as have any resemblance to shells, fruits, wood, bones, &c. to be got as intire as you can, and states that have the impression of plants, sishes, insects, or other bodies in or apon them; found in quarries, mines, pits, caves, or wherever the earth is opened.

N. B. Amongst plants, the most common grass, rush, moss, fern, thistles, thorns, or vilest weeds you can find abroad, may meet with the same acceptance as scarce plants; so in all other things the most common as well as rare, i. e. whatever you meet with, may prove acceptable presents, and have gained preserments

where money could not a
