Continued heavy export purchases, aggregating 125 loads, advanced wheat to a bushel, after early weakness to-day. The market closed 1/2c to 3/4c net higher, and not far from the top. Commission house trade was on a large scale, and shorts active buyers on frost damage news in northwest. Sept. 1.04% to 1.05%, closed 1.05%; Dec. 1.07 to 1.08%, closed 1.08%; May 1.10% to 1.12, closed 1.12%.

Chicago Live Stock. Market has been rather nervous to-day, prices ranging from 1/2c to 3/4c below to 1/2c over yesterday. Low prices were made during the early trading, as a result of further selling by a large operator and free selling by several of the commission houses, some of which are credited to large local holder. Pit crowd sold early but covered later. Further talk of good export sales, sharp advance in Antwerp market, firm tone in Liverpool in both spot and futures, reports of frost damage here and at other points, and bullish crop news from North Dakota and Canada on frost damage, have been influential.

Ennis & Stoppard wired to J. L. Mitchell at the close.

Among Liverpool cables were as great a surprise to the majority of traders this morning as was the weak market yesterday, and the local sentiment was very bearish, which led to some opposite to about yesterday's low price, where the best possible support was encountered, resulting in a gradual advance to a final appreciation of about 1/2c from the low point. Throughout the session there was a steady demand for the stock, and prices from the northwest, reports of large export sales, which included No. 2 red varieties, and the stock were obtained yesterday. The demand from abroad appears to be on the increase, and it is expected that the market will be maintained at a shade higher, but local sentiment was very bearish, which led to some opposite to about yesterday's low price, where the best possible support was encountered, resulting in a gradual advance to a final appreciation of about 1/2c from the low point.
