As far as power is concerned, their coal in that district would give them no advantage over Canadians.

A COMPREHENSIVE ALLEN LABOR LAW DEMANDED.

When the Dominion Government comes to consider the enactment of an alien labor law to meet the one that is now in operation against this country it will be necessary to apply a remedy that will meet the case from every point of view.

The American has in passing the law was to prevent Canadian workmen from obtaining employment within the United States. The law forbids a Canadian entering the United States under contract to perform any work in that country. If it is known that a Canadian goes into the United States for the purpose of accepting a situation he is "deported," or sent back. The United States authorities will not allow him to enter the country. When the Dominion Government comes to enact reciprocal legislation it should be taken to make this legislation as comprehensive as possible. The necessity for legislation of this kind is much more marked in Canada than it was in the United States. American workmen have invaded our territory much more extensively than Canadians have done in regard to the United States. British Columbia is full of miners who have come into Canada from Montana, Colorado and other mining States, most of them under engagement before reaching the country. Under the Canadian law, which we hope soon to see enacted, all such "deported" and Canadian De Barrys should be stationed at all the frontier towns to prevent others from getting into the country in the future. If Canada has not miners enough of her own she can obtain them in any quantity from Great Britain. Further, if it is bad policy to allow American workmen to come into this country to get employment, it is equally bad policy to allow Americans to have the same privileges as Canadians in the prosecution of mining locations. If the Americans will not allow a foreigner to own property in their country, why should we allow them to own property in Canada? Why should we go further than this and give them valuable privileges for nothing? Any American citizen can come into British Columbia and claim hundreds or thousands of acres by merely taking out a \$5 license, the same as any Canadian can do. The mineral wealth of British Columbia appears to belong to the Americans just as much as it does to us. It is time our Government devised some legislation to discriminate against foreigners in regard to our natural resources as well as in regard to the labor that rightly belongs to our own people.

What we have said about the invasion of Americans into our mining camps applies equally to our fisheries. The case against them in regard to the latter is even stronger. If we have any laws to prevent American fishermen coming into this country and depleting our waters of their fish, these laws are disregarded or are evaded by subterfuge and sharp practice. The people of Chicago, Minneapolis, Detroit, Buffalo and other American cities are supplied to a considerable extent with Canadian fish. Practically the only Canadian fish, however, in this market is to supply the fish. American fishermen get the employment, American fish dealers make the profit, Americans eat the fish. Canada merely supplies them. Where is the gain to Canada? The Lake of the Woods, Lake Winnipeg, Vermillion Lake, Georgian Bay, Lake Huron and other lakes and bays are being depleted of their fish by American fishermen to supply American markets. How long is the Government going to allow this injustice to continue? Are we not to allow American fishermen to fish in our waters when the Americans refuse to allow a Canadian to get a day's work in the United States? Every American citizen engaged in the fishing business in territories belonging to Canada should be "deported" out of the country with as little delay as our countrymen are hustled across the Niagara and Detroit Rivers. If the Americans require our fish the Canadian Government should see to it that the work connected with catching them and the profit to be made by handling them is reserved for Canada.

We have merely indicated in a general way the course the Government ought to pursue in meeting the odious alien labor law that the Americans have enacted against Canadians. Further details can be supplied by the different industries that are affected by this unfair American competition.

FAKE NEWS PAPERS AND THE POST-OFFICE DEPARTMENT.

It is not difficult to locate the cause of the deficit of \$70,000 in the Post-office Department for the last fiscal year. The biggest part of it, at any rate, is attributable to the generosity of the Government in carrying newspapers and periodicals gratuitously through the mails. Owing to the cheapness of paper and the reduction in the cost of typesetting the number of periodicals has largely increased of late, and the circulation of all papers has had an upward tendency. It is not the legitimate newspaper that burdens the mails so much as fake papers that exist merely because of the fact that the Postoffice Department undertakes to distribute them all over the Dominion for nothing. If these fake papers were made to pay regular postage rates, and if legitimate newspaper publications were subjected to a moderate rate, the deficit would be wiped out, and the department would be in a position to adopt a 2-cent rate for letters. The same abuse of the mails exists in the United States Post-office Department. The United States Postmaster-General in his last report stated that a 1-cent letter rate could be adopted if second-class mail matter were made to pay even one cent per pound postage.

The Navy League in Canada.

A large audience was delighted at St. George's Hall, Elm-street, last night by the lecture of Mr. H. J. Wickham, late of the Royal Navy, on the "Battles of the British Navy." Lieut.-Col. Denison was chairman and introduced the lecturer with appropriate remarks on the position of the British Navy at the present time and the position it affords the colonies. The lecturer, by the aid of time-light views, projection, the first view thrown on that view was a portrait of the Queen, which was greeted with prolonged cheers. After this came the representation of the famous victory of Lord Howe. Then followed the sinking of the Royal George, the battle between the Revenge and the Spanish fleet, the Battle of Trafalgar, and the famous Battle of the Nile. In the course of his remarks he stated that during the past year the British Navy and the Navy League had been brought prominently before the public. A pamphlet containing a paper, read by Mr. Wickham before the Toronto branch of the Canadian Navy League, was presented to the audience. Mr. Wickham will lecture in the principal cities and towns of Canada, under the auspices of the Navy League.

Guinane's

210 YONGE STREET.

210 Yonge Street, Jan. 21, 1897.

WHY IS IT

These advertisements are read? It is because we are thoroughly acquainted with our subject—"Leather."

WHEN IT comes to telling you of stylish shoes—comfortable shoes—good wearing shoes—we've to tell you only what we know! There's no imagination required—no study. We're post-graduates in the art of shoedom. No firm in Toronto—no shoe form—is more roundly abused by wholesale and retail shoe dealers than Guinane's.

WHY?

Because we control the best grades of shoes and we sell cheaper grades of shoes at less than the wholesale jobbers' prices.

You pay no INTERMEDIATE profit when you buy at Guinane's.

TO-MORROW, FRIDAY, WE WILL OFFER:

Gentlemen's Department.
