Operations on the farm are usually suspended by the first of this month; though as long as the ground continues open, something may be done—stones may be dug, walls built, drains made, ground ploughed, and materials for manure collected. In the distribution of the winter's supply of fodder, the coarser and poorer kinds should be reserved till the coldest weather, the appetites of the animals being then sharpest, it will be eaten with less waste. Those farmers who are not already provided with cutting machines, will do well to procure them, as their use is attended with considerable economy. Coarse hay, straw, or corn stalks, are, by being passed through a cutter, brought into
