Example of Hospital Orthæpedic Work.

J. S. A boy, — years of age, admitted to the Hospital for Sick Children. The condition of his feet (Figs. 1 and 2) had existed from birth, and he wore boots made especially for him. Was discharged (Fig. 3) with the feet in the position shown in the cut. A brother (F. S.) was treated in the Hospital for a similar trouble at the same time.
