PERRY'S HUNGARIAN BALM.

For Restoring, Preserving, & Beauti-
fying the Hair.

THIS elegant preparation is an infallible remedy
for Blotches or falling off of the Hair. It pro-
motes and completely restores the Hair, and dan-
dies, strengthens the Roots of the Hair, causes it
to grow luxuriantly; gives it a rich, dark, soft and
glossy appearance, and prevents its turning gray.
The Hungarian Balm is a purely vegetable com-
pound, scientifically and chemically combined,
and is warranted to contain none of those deleter-
ious ingredients which prove so injurious to the
Hair. It acts directly upon the skin, cleansing and
purifying it from all unwholesome secretions, thereby
preventing and curing the accumulation of
sebum, dandruff, and other impurities, which so fre-
quently cause decay and loss of the Hair.
The Hungarian Balm is especially adapted to
ladies' use; and those who have tried the various
oleaginous mixtures, with no benefit, will at once
discover the agreeable and beneficial effects pro-
duced by this pure and delicate preparation. In-
stead of matting and tangling the Hair, which is
more or less pulled out in the process of combing,
it leaves it soft and clean, promotes a natural
growth, and prevents a continual dark and glossy
appearance. It is also a powerful and effectual
remedy for all other complaints of the Hair.
Each round tin, held in favor of this impor-
tant Compound, but it is deemed unnecessary,
as the propriety has been established that one tin will
maintain the hair in its natural state, and prevent
its falling out. This is the

DEVINES Compound Pitch Laxenge.

An appeal to matter of fact, and
common sense.

It is that which has so long been sought for,
and is in full faith offered to the public as a
CERTAIN CURE for

**Croup, Whooping Cough,
Croup, Asthma, and
Consumption.**

and will, in any case where lungs sufficient are
left to sustain life, check the ulceration, and raise
the patient to health. This is not an idle boast,
for it is tried every day in the market without a
through trial; but has proved beyond a doubt that
what has been asserted can be done.

We do not ask you, reader, to take our word,
but those who, but a few weeks ago had given up
in despair and were now in the enjoyment of health,
and without asking how they were benefited, are
in favor of this great remedy.

Let all, then, who are afflicted, TRY IT, and
if the assertions on each box are not proved after
an impartial trial, the price will be returned; when
the article is not perfectly satisfactory.

If the Laxenge on being exposed to the air in
hot weather should become soft, it is no objection,
but rather goes to prove that they are in good
condition.

recently published in New York.

THE FUTURE LIFE.
How shall I know thee in the sphere which keeps
The disembodied spirits of the dead,
Will all of thee that time could wither, sleep
And yet remain as thou art?
Will not thy own neck demand no more?
I there most the gentle presence pain!
Nor hear the voice I love, the rest again
In thy sweet eyes the tear that gleams.

Will not thy own neck demand no more?
I there most the gentle presence pain!
Nor hear the voice I love, the rest again
In thy sweet eyes the tear that gleams.

Will not thy own neck demand no more?
I there most the gentle presence pain!
Nor hear the voice I love, the rest again
In thy sweet eyes the tear that gleams.

The arrangement now being made to operate against
the Russians in the Baltic at the opening of the
spring campaign includes 55 vessels; namely, five
floating batteries, the decks covered with iron
plates, eight inches thick, rendering them prac-
tically invulnerable; and launch boats (those vessels
armed with six of the long-range guns will be
ready to receive 10 long-range guns, to be armed
with iron shot, three mortars, the most power-
ful description of all of mortars, drawing about
four feet of water, the latter being specially in-
tended for service in the Baltic Sea.

The Emperor of Russia before his sons, Michael
and Nicholas, left for Bessarabia, gave them his
solemn blessing, in the presence of 30,000 men
forming the nucleus of the Imperial Guard. After
the ceremony was over, the Emperor knelt down,
his sons following his example, and at the word of
command the 30,000 guardsmen did the same.

The infant is received.
Dr. Chalmers furnishes the following teach-
ing expression of his opinion on the subject
of infant salvation. It is expressed in strong
and beautiful language:

This affords, we think, something more
than a dubious glimpse into the question that
is often put by a distracted mother when her
child is taken away from her—when all the
concerns it ever had with the world amounted
to the gaze upon it a few months, or a few
opening smiles, which marked the dawn of
existence;—but the purpose of not only saving
the weak against the strong, and protecting
the economical and political interests of man-
kind, but for supporting the sacred principles of in-
ternational right; which, if violated in one case by
a powerful Government against a weaker, would
lead to the ruin of the world, and the destruc-
tion of the weak against the strong, and protect-
ing the economical and political interests of man-
kind, but for supporting the sacred principles of in-
ternational right; which, if violated in one case by
a powerful Government against a weaker, would
