THE GENERAL ELECTION

Nomination - To-day.
Election, Saturday Oct. 22.

The Government Candidates for the County of York are:
HON. A. C. BLAIR,
WILLIAM WILSON,
JOHN ANDERSON,
THOMAS H. COLTER.

The Candidates for the Government will have a Walk Over in York.

The Opposition Ticket Very Weak.

POLITICAL AFFAIRS.

All over the province the nasal excitement caused by an election is beginning to be felt, and politicians are commencing to hustle. Tickets are being scraped up by the opponents of the government in nearly every constituency. The opposition are without, and always have been, a policy of any kind; their one aim and ambition being to displace the Blair administration. In Mr. Stockton, the leader of the party, and we might say in the whole of the party, cannot be found a man competent to grasp, and who fully understands the affairs of our province. During the last session of the assembly, Mr. Stockton and the opposition members clearly showed by the first move that he and they made after Mr. Hannington had retired, that they were even ignorant of constitutional methods, as was shown by the fact of their asking for a royal commission to be appointed by the government to enquire into some charges laid against Mr. Blair and his government. They then in most violent language denounced Mr. Blair, but when the opportunity was afforded them to prove the charges they made, they refused to go any further in the matter, thus proving to the public the fact that the allegations they made were without foundation, and that such charges were made by Mr. Blair's enemies purely out of revenge. Men of that stamp are not the kind of men we want.

The Blair administration have on the other hand, shown by their efforts to improve our stock and agricultural interest that they have the best interests of the province at heart, and are to be congratulated on the success which has attended their efforts in that direction. The improvement in the horses and cattle of this province, since the stock importation by the government, was clearly seen at our exhibition this fall; the horse parade being the largest and best ever seen here. Improvements of every kind have been made from one end of the province to the other, and while they may have involved considerable expenditures, they cannot, in time, fail to benefit greatly, our province, particularly the impetuous given the dairy interests, the benefit of which is already felt in our own constituency. The election brought about by the government will abolish the Legislative Council and save the province some ten thousand dollars which they would otherwise lose, by one more sitting of that august, but useless body.

We can see no good cause for displacing the present government, and we can see a good reason for preventing the premiership to go from York to St. John county, and this constituency especially, should do everything in its power to return the four government candidates with, as we know they will, a handsome majority.

The candidates in the field in the different constituencies are as follows:
Responsible—Gov't—Hon. C. H. La Billaud, W. A. Mott.
Opp.—William Murray, J. C. Bar'arie, John Culligan.

Government—Recognized Gov't ticket—John Sive right, Theo. Blanchard, Gov't supporters—Jos. Poirier, P. Venoit.

HONORING COLUMBUS.

Within the present century a disposition has sprung up, increasing as the years go on, for new means of excitement, or, rather the manifestation of a restless spirit, so common to our race and to late generations especially. Great holly occasions and great loss of money, in the shape of wages, are the result of what common sympathy has converted into fashion: As examples—our grandfathers never thought of floral grave decorations, now whole communities feel that they must turn out at an appointed time to strew flowers upon the graves of the departed. After days, whereby school children are required to plant trees at their graves (which is about the wisest conception of all) in wedding's, wooden weddings, silver weddings, golden weddings, diamond weddings, the latter observance of so rare occurrence that no one is supposed to make presents feel their duty to be any way risky in the giving away. Then we have commemorative battles to fight over again, either annually or centennially; and the receding to mind the deeds of great men who have done something for their country in the way of literature, science, heroism, or what not—such as Burns, Shakespeare, and now Columbus. The national anniversary whereby England recalled the recollection of her people to the restoration of Charles 2nd, 21st May, and of Gunpowder Plot, 5th November, appear to have been dropped of late years, on account, we suppose, of the more sensible spirit of the age, which is opposed to what was the tyranny of the monarch, or rather his father, and also to the bigotry which would keep alive the parliament attempt to blow up King, lords and commons in one grand hot-cast. But the question is, if one set of foolish things has passed into oblivion, is not the present generation and also the last equally at sea in some of their observations, as above suggested and others that might be? Nobody thought of celebrating the first centennial of Shakespeare, or Columbus, or even the second centennial; but after poor Shakespeare had been dead for three hundred years and poor Columbus four hundred years, there must be a great deal kicked up over the remains, in the United States and elsewhere, lest we suppose those once great men might be forgotten, without stopping to think that we have the America of the one, and the land of America of the other to keep their memories green. In New York, the whole of this week has been given up to Columbian festivities, indeed, according to what we read in the newspapers the 4th of July celebration is only child's play in comparison, and what is the good of it all? The harm is in great loss of time, wages, balance, among the working classes, dissipation, and loss of life, such as is common to all extraordinary occasions, when great masses of people assemble and pitfalls are not infrequent as every step. The Parisians and New Yorkers are equally excitable and ever seeking for pastures new to let off their superabundant steam. But to give six weeks to Columbus, a man gone to dust four hundred years ago, cap the climax of any thing in this line of business, the sun has ever shone upon. The celebration of the battle of Gettysburg and the final triumphs of the Northern arms, are two events which might go down to posterity as things to be recalled centennially—for these record the salvation of a whole nation. But to make a great row over Columbus is nothing but—but—gammion.

THE BIBLE'S POPULATION.

The latest estimate makes the total population of the earth 1,440,000,000. The set down that the language spoken now number 3,000. The Eastern Kisheneuzian states that the Bible is now accessible to fully two-thirds of the human race. It is true that the Scriptures have been translated into not more than 187 languages, but those are the dominating tongues of the world, and through them Christianity reaches the bulk of mankind—or may do so, England and America are immeasurably ahead in the production of translations and commentaries. Glass, as far as research has been able to determine, was in use 2,000 years before the birth of Christ, and was even then not in its infancy. In the state collection at the British Museum there is the lead of a line moulder in glass bearing the name of an Egyptian king of the eleventh dynasty.

THE BIBLE'S POPULATION.

A German has patented a process for making barrels without staves. The trunk of a tree is saved into lengths to the size of the barrel required, and the chunks are placed in a boiler and boiled for a few hours. It is believed that if a current of electricity is passed through the boiler a chemical action is generated that softens the wood for working. After the boiling the bark is stripped from the chunks. In front of a cutting tool the chunks are held by forks in a manner similar to that in which a piece of wood is held in a lathe. The chunk revolves rapidly against the edge of a fixed broad blade that cuts a continuous sheet of soft wood of any desired thickness. The strip passes to a flat table where it is cut transversely into lengths of the required size. One machine cuts grooves for the head and the bottom, and another cuts V-shaped slots out of the edges. Then the pieces are bent into cylinders and hoopled. Moisture is extracted by a drying apparatus.

CANADA'S GRAIN CROP.

A recent estimate places our total wheat crop this year at 25,000,000 bushels. In Ontario the crop is 33,000,000 bushels against 32,000,000 last year. In Manitoba and in the Northwest it will be 20,000,000 against 25,000,000 to 30,000,000 last year. Other provinces will yield probably 2,000,000 against 3,000,000 last year; making a total this year of 25,000,000 bushels against 32,000,000 to 35,000,000 in 1891. There is considerable doubt about the amount of wheat necessary for home requirements and consumption, the total exportable surplus this year will be 20,000,000 bushels, or about 10,000,000 less than last year. The total oat crop in Canada this year is 85,000,000 bushels against 90,000,000 last year. The total barley crop will be 17,000,000 bushels against 19,000,000 last year. There was a decrease from 1 to 3 per cent. in the yield per acre in Ontario this year in every grain but rye, the greatest decrease being in winter wheat, which was 22.2 per cent. against 27.7 per cent. last year.

Sundry Ebulitions in Prose and Rhyme.

How the Domestic, Social and Literary World is Wagging.

An English mint possesses an electrically operated machine for counting coins.

There is a tree in Jamaica known as the life tree on account of its leaves growing even after being severed from the plant; only by fire can it be entirely destroyed.

The Russian physician who proposes to cure neuralgia pain by throwing a beam of electric light from an arc lamp on the patient is entitled to a respectful hearing. It will be a long time before we exhaust the uses of this electric agent.

A French manufacturer makes minute electric lamps about the size of a pea for the use of photographers in the dark room. They are intended for use in the camera, and are a pair of spectacles or on the frame without the glasses, the lamp being shielded by a reflector. The latter is made up of acoustical material.

Things Not Generally Known.

It seems that 26 per cent. of the women of England earn their own living; but yet one would scarcely believe that there are nearly three hundred and fifty female blacksmiths in that country.

If you wish to increase your chances of life, marry, for as a rule, married men live longer than bachelors; yet out of every thousand persons in England more than six hundred are unmarried.

It has been noticed how women mostly commit suicide by drowning, and men by shooting. By the way, suicide is less common among miners than any other class of people; and self-destruction, strangely enough, is said to be most prevalent among soldiers.

Thirty-five millions of people are every year—few of these from old age. In a doctor's opinion, nearly as many people shorten their lives by over-eating as those who die drinking; while in England alone three hundred persons are annually out off through accidental poisoning.

France has the cheapest rate of postage but possesses a capital in which it is said more murders take place in six months than occur in London, Berlin and Vienna together, in any other country.

M. Langlois, of Paris, an indefatigable worker eighty years old, has spent fifty-years of his life in clipping from newspapers articles offering documentary interest. He has collected 100,000 of the documents, has numbered and indexed them, and has together them on enormous registers bound in parchment. These pages are most interesting, and this unique collection is offered to the National Library. It certainly will be often consulted, for it represents the quintessence of 300,000 journals.

Political Proverbs.

Some men his make voice that can't make laws. Politicians has no business in politics and viny viny.

Mighty few patriots set up nights warring against their own government.

A candidate for office is willing that a gal that wants to get married.

A candidate for constable worries as much over it as a candidate for Parliament.

These's plenty us money in the country or we only know how to get hold us it.

NOTES AND NOTIONS.

Cost of Postage Eighty Years ago.

An old almanac for 1814 gives the following as the rates of postage prevailing at that time: "For every single letter by land, for 40 miles, 8 cents; 60 miles, 10 cents; 150 miles, 12 cents; 300 miles, 17 cents; 500 miles, 20 cents, and for more than 500 miles, 25 cents. No allowance to be made for intermediate miles. Every double letter to be payable the said rates; every triple; every quadruple packet weighing one ounce, at the rate of four single letters each ounce. Every ship letter originally received at the office for 50 miles and not exceeding 100, 14 cents per sheet; over 100 miles, 2 cents per sheet.

GREAT BIBLE COMPETITION.

Thousands of Dollars in Rewards for Bible Readers.

The Latest Home Magazine presents its grand and exciting Bible Competition to the public of America. The first prize offered is \$1000 in cash, the second \$500 cash, the third \$250 cash, the fourth \$100 cash, the fifth \$50 cash, the sixth \$25 cash, the seventh \$10 cash, the eighth \$5 cash, the ninth \$2 cash, the tenth \$1 cash. The object is to offer these prizes to the best Bible readers in America. The competition is open to all who are able to read the Bible. The prizes are to be given to the best Bible readers in America. The competition is open to all who are able to read the Bible. The prizes are to be given to the best Bible readers in America.

6TH HALF-YEARLY COMPETITION.

The Most Interesting Contest Ever Offered by the Canadian Agriculturist.

One Thousand Dollars in Cash, a pair of handsome Spectacles, a pair of Harness, and over two thousand other valuable prizes. The object is to offer these prizes to the best agriculturists in Canada. The competition is open to all who are able to cultivate the soil. The prizes are to be given to the best agriculturists in Canada.

One Thousand Dollars in Cash will be paid to the person sending in the largest list of English words constructed from letters in the words "The Canadian Agriculturist".

Five Hundred Dollars in Cash will be given to the second largest list.

A Handsome Pair of Spectacles, Carriage and Harness, will be given for the third largest list.

Over one thousand additional prizes awarded in order of merit: One Grand Pair; \$3000 worth of Spectacles; Dinner Sets; Ladies' Gold Watches; Silk Dress Patterns; Portiere Curtains; Silver Tea Services; Tompkins' Patent Sewing Machine; and many other valuable prizes.

As there are more than 1,000 prizes, any one who takes the trouble to prepare an ordinary good list will not fail to receive a valuable prize. This is the biggest thing in the competition line that we have ever placed before the public, and all who do not take part will miss an opportunity of a life time.

Rule—1. A letter cannot be used often more than it appears in the words "The Canadian Agriculturist". For instance the word "grain" could not be used, as there is but one "g" in the word "grain". 2. Names of places and persons names. 3. Names will not invalidate a list—the wrong words will simply not be counted.

Each list must contain one dollar to pay for a month's subscription to "The Agriculturist". If two or more lists, the largest list which bears the earliest postmark will take the first prize, and the others will receive prizes in order of merit. United States competitors will be shipped from our New York office free of duty. All money letters should be registered.

Our Former Competition.—We have given away \$25,000 in prizes during the last two years, and have thousands of letters from prize-winners in every state in the union and every part of Canada and Newfoundland. Lord Kilomara A. D. C. to the Governor General of Canada, writes: "I shall never forget my friends to enter your competition, and I shall never forget the prizes I received. I received \$1,000 in gold, and we hold the receipt for same. A few of the prize-winners: Miss J. Robinson, Toronto, \$1,000; J. W. Harrison, Fenelon Falls, Ont., \$1,000; David Harrison, Syracuse, N. Y., \$500; H. Davis, St. Louis, Mo., \$500; W. H. Taylor, West Duluth, Minn., \$500; Miss Georgina Robinson, Oak St., Brooklyn, \$1,000; Fred H. Hill, 659 State St., Bridgeport, Conn., and thousands of others."
