FROM THE TRAINER'S CORNER

(By MacLary of Babylon)

Three hods for Der Kaiser!
The Emperor of Germany has some
sound ideas about sport and exercise
which the people of this side of the
Atlantic would do well to consider.

"The object of sport," says the War
Lord who has never had a war, "should
be the physical development of the
masses rather than the effort to es-
tablish new records."

That is the true, correct, sensible
and democratic conception of the
ideals of sport and athletics.

It is the shame of democratic Amer-
ica that it sets up and encourages and
supports a standard of sport which
has for its chief end and aim the
breaking of records, rather than the
building of sound and strong bodies
for the multitude.

American schools and colleges foster
this ideal, with the result that the
great masses of students are physical
mollycoddles, while the few, on whom
vast amounts of money are expended,
are hailed as heroes.

The result is flabby muscles for the
many and swelled heads and chests
for the few "supermen" who are the
product of this foolish system.

Listen to the Kaiser again.
"I desire to direct attention to a
matter as to which I believe our na-
tion is on the right track. This is an
endeavor to confer the chief benefits
of sport upon the whole people, to
bring the masses up to a high plane
of physical development, and not to
set out individual first-class perfor-
mances from the dead level, which re-
mains generally lower."

The Emperor said a mouthful when
he delivered that utterance. And that
course which he urges Germany to
avoid is exactly that course which has
been adopted and followed and brought
to a high state of perfection in the
United States, and to a somewhat
lesser extent in Canada. The Kaiser
may have been thinking of the ath-
letic situation in the United States, as
a horrible example when he made that
statement, although he is too great a
diplomat to say so.

In the next Olympic games, to be
held in Berlin, the Americans may
and probably will show superiority to
the German athletes, and this will be
accepted by shallow thinkers as proof
of the greater stamina, strength and
endurance of Americans. It will be
nothing of the kind.

Go to New York, or, if you deny that
the metropolis is a representative Amer-
ican city, to Chicago, or San Fran-
cisco, Minneapolis or Louisville. Stand
at a street corner and pick out the
first hundred men who pass. Do the
same thing in Berlin, or any other
German city. Pit these men against
each other in almost any form of ex-
ercise requiring strength, stamina and
bodily agility, and see who will win.
I am an American, and I would root
for the Americans—but I wouldn't put
any money on them!

The reason is not far to seek. As
the Kaiser says, it is the German idea
to "confine the chief benefits of sport
upon the whole people, to bring the
masses up to a high plane." On this
side of the Atlantic the German-Amer-
icans are about the only people who
maintain a persistent movement with
this object in view. The Young Men's
Christian Association, and the simi-
lar organizations of Hebrews, have ac-
complished much in this way, but it
is a drop in the bucket. The Boy
Scouts hold out hope for the rising
generation. More, much more, is
needed. Exercise in youth builds a
good foundation for manhood, but a
foundation is only a foundation, and
not a complete structure.

In Germany the gymnastic societies
such as the Turnvereine, enlist the at-
tention and enthusiasm of people of
all ages and creeds and both sexes.
The disciples of Friedrich Jahn, the
father of the Turnplatz, have as their
ideal the development of the strong
and shapely body and the maintenance
of good health through the right sort
of exercise and amusements.

The development of certain muscles
at the expense of others, and, often,
to the positive detriment of the health,
in order that records may be broken,
plays no part in the German pro-
gramme.

The German ideal of physical train-
ing was introduced into America near-
ly a century ago, but it was not until
about 1850 that the German population
became sufficiently numerous to sup-
port local societies banded together
in a Turner Union. Cincinnati Ger-
mans organized the first American
turngemeinde in 1848, and the move-
ment soon spread to Milwaukee, St.
Louis, New York, and other cities have
a considerable number of immigrants
from the fatherland, and they are of
use.

While the Turners of Germany have
no generally shared interest outside
of the invaluable physical culture
training, the American Turners consti-
tute one of the most influential social
reform bodies on the North American
continent. They have been pioneers
in many sociologic and economic move-
ments for the benefit of humanity, in
addition to aiding in the spread of the
physical culture movement among
non-Germans.

Laws against child labor, against
silly and unsanitary tenements,
against unsafe, poorly lighted and un-
ventilated factories and workshops,
and against the adulteration of food,
have long been advocated by the Turn-
ers. They were leaders in the play-
ground movement, and to a large ex-
tent they inspired the gymnastic and
athletic features of the Y. M. C. A.
and allied bodies.

From the viewpoint of an American
physical trainer, there is but one se-
rious defect in the system as practiced
in Germany, and that is a tendency
to pay too much attention to the ex-
ercises which are performed in large
groups and classes, and too little to
those sports in which individual ini-
tiative is developed.

As an example, boxing has never
found favor in Germany, and recent
attempts to introduce the sport have
been religiously suppressed by the
authorities. The many art is on the
"barbwire" list in the fatherland.

That the German opposition to box-
ing may be due to a fear that Germans
could not excel in that game can
scarcely be alleged, as Fapke, Hiltch,
Volgaast and many other champions
and near champions have demon-
strated that men of German blood can
put up their fists with the best of them.

Drills in which hundreds or thou-
sands of people participate make a
pretty spectacle, and they are useful,
but not to the exclusion of the more
individual types of exercise, such as
boxing and baseball, which develop
as well as physical agility.

RESULTS IN THE BIG LEAGUES

AMERICAN LEAGUE.

Washington 3; Detroit 0.
At Washington:
Detroit 000000000-0 3 0
Washington 00011010-3 8 1

BALLOON RACES

St. Louis, Mo., July 13.—The "San
Francisco, 1915," piloted by E. R.
Cole, of St. Louis, and his aide, R. E.
Emerson, of Springfield, Mo., early to-
day was the only balloon not report-
ed landed in the National elimination
race, which was begun here Saturday
afternoon. The balloon was last heard
from passing over Dalgren, Ill., at 8
o'clock yesterday morning. It has
been in the air fifteen hours, but ac-
cording to a note dropped at this
point, five hours had been spent in a
calm. The "San Francisco, 1915,"
then was headed for the east.
Of the seven which landed yester-
day, six had not covered 200 miles.
