W. A. HAGERTY

All mothers can put away anxiety regarding their suffering children when they have Dr. Williams' Pink Pills for Pale People. Its effects are sure and lasting.

Card of Thanks

Mrs. Peter J. Campbell and family wish to express their thanks to friends and neighbors for kindness and sympathy extended to them during the late Mr. Campbell's illness and in their bereavement.

Card of Thanks

Mr. Alex. McNeil and family wish to express their thanks to the many kind friends and neighbors for assistance rendered them during the illness of the late Mrs. McNeil, and also for expressions of sympathy in their hour of bereavement.

TOWN AND VICINITY

Cecil McAlpine has taken a position in the Merchants Bank.

The next public holiday will be Labor Day, Monday, Sept. 6th.

Kilmartin annual picnic will be held on Labor Day, September 6th.

Rev. A. A. Laing, B. A., of Beamsville is expected to occupy the Presbyterian pulpit next Sunday.

Glencoe is now lighted by the new power, which was turned on for the first time last Friday evening.

Miss Elizabeth Grant has taken a position as stenographer and book-keeper at the Transcript office.

Potatoes have had their day. Each succeeding day brings them down to the old level of spuds or murrhies.

Cowper of North Newbury is relieving Les Diagon, C. P. R. agent who with his mother is holidaying for a few weeks.

Miss Marion Huston was successful in obtaining university matriculation standing on ten subjects at the June examinations.

J. D. McKellar has a turnip weighing 7 lbs. on exhibition at his grain store. He says he has others on his farm that are bigger still.

Wm. McCutcheon, not Wm. McCullum, was the winner of the third prize in the oats crop competition, results of which were published last week.

The marriage took place at Virde, Manitoba, on August 11 of Miss Margaret E. Stinson, youngest daughter of Mr. and Mrs. James Stinson, to Ralph E. Glass of that place.

Apples are so plentiful this season that the early varieties are not saleable and are being given away for the picking. The weather has been favorable for the development of this fruit and the quality is excellent. The packing varieties are likely to rule low in price.

Glencoe ball team went to West Lorne Monday to participate in a tournament advertised to be held there that day. Dutton and Appin teams were also expected to play, but failed to put in an appearance. West Lorne and Glencoe played two games and both were won by the former in a close score.

Anniversary services will be held at Riverside Presbyterian church on Sunday, August 29th, at 11 a. m. and 7 p. m., conducted by Rev. J. K. Charlton, St. George's church, London. A garden party will be held on Monday evening following, for which the Strathroy band and other prominent talent has been engaged.

The garden party which was held on Mr. and Mrs. Harvey's premises, Woodgreen, under the auspices of the I. O. E., proved a very successful entertainment. In the absence of Mr. Lethbridge, M. P. P., the chair was ably filled by Mr. Charlton, rector of St. John's church, Glencoe. The program consisted of vocal solos by Mr. Sheppard of Detroit and H. K. Charlton of Glencoe. Numerous readings and songs were given by Bert Rose, comedian, of London. The Strathroy band added greatly to the success of the entertainment. Proceeds were \$340.

PERSONAL AND SOCIAL

—Calvin McAlpine was home for the week-end.

—Morley McMaster of Sarnia is visiting in town.

—Mrs. Garbutt is visiting in Lambeth this week.

—Jack Ferguson was in town for a few days this week.

—Miss Jetta Holman of Ayr is visiting at R. A. Eddie's.

—L. Sautter is on a trip to Toronto and the Niagara district.

—Albert McRae of Detroit was a week-end visitor in town.

—Lewis Bagnell of Detroit spent the week-end at Levi Smith's.

—Miss Eagan of Detroit is the guest Miss Rose Davenport.

—Mrs. Pickles of Winnipeg is visiting her sisters, Mrs. J. A. McLachlan.

—Mrs. Brocklebank of Windsor is visiting her cousin, Mrs. R. A. Eddie.

—Miss Louise Garbutt returned home on Saturday from a visit at Lambeth.

—Mrs. Neil Graham has returned home after spending several weeks at Bayfield.

—Mr. and Mrs. Chas Davidson of Woodstock visited at Hiram Lumley's last week.

—Mr. and Mrs. Harry Davenport of Detroit are visiting at the formers home here.

—Hugh Munroe, formerly of the

SUFFERED DAY AND NIGHT

The Tortures of Dyspepsia Relieved by "Fruit-a-lives"

LITTLE BRAS D'OR, C. B.

"I was a terrible sufferer from Dyspepsia and Constipation for years. I had pain after eating, belching gas, constant headaches and did not sleep well at night. Finally, a friend told me to try 'Fruit-a-lives'. In a week, the Constipation was corrected and soon I was free of pain, headaches and that miserable feeling that accompanies Dyspepsia. I continued to take this splendid fruit medicine and now I am well, strong and vigorous." ROBERT NEWTON.

50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-lives Limited, Ottawa.

family. Good wages and railroad fare paid. Apply at Transcript office.

Special bargains this week—Two 499 Chevrolets, nearly new, two extra good Fords; one second-hand Overland, newly painted, and one slightly used light four-Overland—Wm. McCallum.

The Dominion Feather Mattress Co. are located in Newbury and are making the sanitary roll-top feather mattress from old feather beds. A card will bring our agent to see you and show sample of work.

Mrs. Hart has donated to the Daughters of the Empire a beautiful finely crocheted quilt. Tickets are 50 cents each, and are selling rapidly. The quilt will be on exhibition and tickets sold at the McRae Hall on Thursdays and Saturdays.

After the closest inspection and comparison we have decided as thousands of others have that the 'Eureka' vacuum sweeper with all the attachments offers more real value than any other. See them demonstrated in our carpet department. \$66 complete.—J. N. Currie & Co.

Internally and Externally it is Good.—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pain in the chest, colic and many hundred ailments it has curative qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

AUCTION SALES

Household effects of Miss Jennie Gordon, at Wardsville, on Saturday, August 21, at 2 o'clock. No reserve. Terms cash. James Brown, auctioneer.

The Movements of Fish.

The erratic movements of fish are a constant source of worry to scientists, who, try as they will, can never account for the varieties of these sea dwellers. An American writer relates a case in point. In May, 1879, the fishing schooner Hutchins, sailing from Gloucester, on the Atlantic coast, was under the command of Captain Kirby, trawling for cod. A strange fish came up in the nets, a large creature covered with yellow spots. The men caught two tons and brought them to land, where they were found to be an entirely new family. Scientists named them "tile fish." For three years, until 1882, they were caught in large numbers. Then the "bankers" reported that they were no longer to be seen. The news came that the sea was covered with dead tile fish. Six thousand square miles of sea were almost hidden by the dead fish. Authorities said that there must have been a volcanic disturbance or else some deadly disease had killed the fish. In 1915, fishermen working the same waters brought the fish in abundance, and to this day the fish are there in millions.

Grand Opening Her Health.

Her Mother—'I should think you'd be high up in that low cut suit.'

Fanny Philippa—'Why no. Don't you see I'm wearing my winter coat?'

FARM WATER SUPPLY

Attend to This as a Recourse to Health.

Polluted Water Causes Much Typhoid—Get Your Drinking Water Tested—Septic Tank for Sewage Disposal.

(Contributed by Ontario Department of Agriculture, Toronto.)

WATER POLLUTION IS RESPONSIBLE FOR MANY OUTBREAKS OF TYPHOID FEVER. THIS IS DUE TO THE FACT THAT THE TYPHOID BACILLUS IS FREQUENTLY PRESENT IN SEWAGE OR SURFACE SEWAGE WITH WHICH THE WATER SUPPLY IS SO EASILY CONTAMINATED IF PROPER CARE IS NOT TAKEN TO PREVENT SUCH CONTAMINATION.

Typhoid bacilli get into sewage from two sources, viz., typhoid patients or convalescents and typhoid carriers. The excreta, both solid and liquid, from such individuals is liable to contain millions of the typhoid bacilli, consequently anything that gets contaminated therewith, particularly food materials, or water, is liable to spread the disease.

In connection with the water supply of towns and cities steps are usually taken by the authorities to see that sewage contamination does not occur or to see that the water is purified should contamination take place, as it occasionally does, even when great care is taken to prevent it. Frequent bacteriological analyses are made of such water supplies and these readily show the presence of sewage bacteria, should contamination occur. The water may look bright and clear and still have many sewage bacteria, including the typhoid bacilli, present in it. If these are found the water is purified, usually by chlorination.

In connection with the private water supply on the farm and in small rural communities where dependence is largely placed on wells and springs as sources of water used for household purposes, it is essential that adequate measures be taken to prevent contamination of these sources of supply.

Again and again outbreaks of typhoid fever have occurred on farms where the well or spring from which the household water is obtained has become contaminated. In such cases the trouble does not usually remain confined to the farm, as the contaminated water, when used for washing dairy utensils, milk pails and cans, and for cooling the milk is liable to contaminate the milk. Then when the typhoid bacilli get into the milk from the contaminated pails, cans, milkers' hands, etc., they multiply rapidly and the consumers of such milk are liable to develop typhoid. Many outbreaks of typhoid fever in towns and cities have been traced to the contaminated well water on the farm from which milk has been sent for use in such towns and cities. Hence the necessity for the strictest care being taken to prevent contamination of the sources of water supply on the farm. Should contamination occur it means danger not only for the farmer and his household but for the entire community that uses the products, especially the milk, from the farm.

Every care should be taken to prevent surface drainage or seepage getting into the well or spring, because such drainage or seepage may contain the typhoid bacilli that have been given off by typhoid convalescents or carriers.—Prof. D. H. Jones, O. A. College, Guelph.

Septic Tank for Sewage Disposal.

This system consists ordinarily of a two-chamber concrete, waterproof tank equipped with an inlet, overflow and vent pipe, and an automatic siphon for emptying the tank of the liquid sewage from time to time, and a system of tile, called the "absorption bed," consisting of several parallel rows of 3 or 4 inch land tile laid with open joints almost level, and shallow, and branching off from a main line of sewer pipe which connects it to the tank. For the ordinary sized home each chamber should be about 3 feet square and 3 feet deep, and 150 feet to 200 feet of land tile would be required for the absorption bed. The vitrified sewer tile is best for the main and number of them will depend upon the distance of the absorption bed from the tank.

The sewage enters one chamber by a 4-inch inlet pipe, where it is decomposed to a large extent by a certain kind of bacteria, thence in a semi-liquid condition it passes over into the other chamber through a 4-inch overflow pipe. Here it remains until a depth of about 18 inches is reached, when the siphon automatically comes into operation and discharges it in a couple of minutes into the main sewer pipe, from which it passes into the rows of tile. Through the open joints in these it escapes into the top layer of soil where another kind of bacteria completes the work of destruction began by the ones in the tank. The bacteria in the tank thrive and work best in the dark and away from the air, while those in the soil require plenty of air, hence the tanks must be kept tightly closed except for a small vent for escape of decomposition gases, and the land tile laid near the surface. The intermittent flushing of the tank by the siphon favors the bacterial action in the soil by increasing soil ventilation, the air being forced out of the soil on discharge of siphon and afterwards coming back into it pure and fresh.

If this system be properly installed it will dispose of sewage in a very satisfactory manner and without endangering the water supply. Complete plans in blue-print form for installing it may be secured for one writing from the Department of Physics, Ontario Agricultural College, Guelph, Ont.—R. R. Graham, O. A. College, Guelph.
