Now, why should she go home-the girl who has just come to conquer the city? The women who are the heads of their professions did not go home, and always. Who will take their places if that army of eager, confident young wo-men at the boarding house tables of New York should suddenly go home? There came a girl to New York, three years ago, who went to see one of the

successful women in her profession.
"My dear young friend," said the successful woman, "go home. I have an average of 10 girls a day who come to me

home and stay there."
"But you didn't go home," suggested the girl.
That was because I didn't know what

The girl did not go home, however. She stayed, and now is earning a salary almost equal to that of the successful woman—for New York is indeed a fairy city if one knows a little magic one-

To every girl who has come here to First, know yourself; that bit of ad-

vice has never yet been equalled.

Second, if it is not your pride, nor your desire, nor your discontent at home, but your sober judgment of your own ability and perseverance that leads you to believe honestly that you can win—then star.

then stay.
Given health, and with no pressing call of duty at home, any girl who un-derstands her own personality, and who stays in the belief I have just mentioned, holds her future in her own hands. In nor own hands! There, alas, is the rub; for upon the way she juggles the future with her own clever hands everything depends, far more than on the interven tion of fate. February Success.

DR. AGNEW'S CURE FOR THE HEART acts directly and quickly, stimulates the heart's action, stops most acute pain, dispels all signs of weakness, flutterfing, sinking, smothering, or palpitation. This wonderful cure is the sturdy ship which carries the heart-sick patient into the haven of radiant and perfect helth. Gives relief in most acute forms of heart disease in 30 minutes.—11

HORRORS OF WAR.

Wounded and Dead Lie in the Field of Battle for Weeks.

Frederic Villiers, the war correspond ent, whose work is known everywhere and who lectured in Toronto after the war between China and Japan, states that a prediction often made by Archi-bald Forbes has come true. Forbes used to say that "the time would come when armies would no longer be able to take their wounded from the field of battle." Villiers says "tha day has come—we are living in it."

the present war Villiers has seen stretches of battle ground on which the bodies of dead and wounded have lain for twelve days, the dead unburied, the wounded untended, while over them incessantly passed shells and bullets. For a soldier of either army to attempt to rescue a wounded comrade—a father, son or brother—would mean instant and useless death. Wounded men have existed somehow amid the dead under these con-ditions, and have been found yet alive after twelve days. The searchlight, which preserves perpetual daylight on the battle ground, the engineering of scientific trenches, machine guns, rifles point blank at 200 yards and with a range of 2,000—these things have made war more terrible now than ever before in history. "Red Cross scieties," says Villiers and seignifife text hooks—they Villiers, "and scientific text books -- they sound well and look pretty, but as ref humano warfare, was there ever put into words a mightier sarcasm?" Vil-

liers kas been through many campaigns, and knows what he is talking about. The man who knows nothing of war but what he has read in herees' tales imagines there is nothing easier than for imagines there is nothing easier than for a truce to be arranged for the burial of the dead, while the Red Cross people on their errands of mercy go safely about picking up the wounded. That simple order of things never existed, perhaps. But now it is much worse. Two army corps confront each other, and by means of scientific trenches get within a distance sometimes and at some points of one hundred yards. Not a living thing can show itself above the surface. These opposing fighters are under telephonic orders of a commander twenty miles away—the front of battle may be ten from one side to rush the trenches of the other. Men are massed in the trenches of the other. Men are massed in the trench for a sudden rush, and they know they go to charge certain death. To be wounded don the chorus, "Carist is risent" to charge, the means a lingering done to the fifty yards of a man's own array, or the man lying in the apen gets bullet after builet, but none in a vital spot to end his suffering. There can be no truce where armies are in this close and deadly grip—with the fate of mations at stake. War is what it is, and it

grows to be so horrible that nothing re-mains but to inform the whole world of its nature, so that in time the whole

THE HOUSEHOLD.

The Many Uses of Kerosene for Domesti Purposes.

Always having due consideration fo the danger inherent in the use of easily inflammable substances, the following deinflammable substances, the following use tail of the domestic uses of kerosene by Mary Taylor-Ross in "What to Eat" will be found of interest to all housekeepers:

Kerosene is of great use in washing white clothes. One or two tablespoonfuls, put into the boiler, while the water is cold, and gradually heated to make an emulsion will do away with much an emulsion, will do away with much rubbing and consequent wear and tear on the clothes. If one doesn't care to use the oil for the entire washing,

the oil for the entire washing, solled pieces, like towels, may be put to soak in cool water over night, with a spoonful of oil; they will come white much more easily in the morning.

Nothing makes windows, mirrors and pitcure glasses so bright and clear as very hot water, to which a spoonful of kerosene has been added. Use a small clean cloth: wring dry, and rub it over average of 10 girls a day who come to me as you have come. I know girls of refinement—college bred and clever—who cannot earn \$5 a week in this town. Go cloth. Go to the next window and wash in the same way, inside and out, and then go back to the first window and wipe it dry with a large, clean cloth. All the windows in a room can be made clean and sparkling in half an hour by this method

Paint that has been washed in the spring, or woodwork of a natural finish can be made bright and clean in the fall by merely rubbing it down with a cloth oy merely rudbing it down with a cloth dipped in kerosene. Always use clean flannel or wool rags, and discard one every few moments, for there is no use rubbing with soiled cloths. These croths, if washed out at once, will be clean with very little work, for the oil helps make them white.

hem white. When the kitchen sink is rusty, and

When the kitchen sink is rusty, and the set tubs, from neglect, become coated with accumulations of wash waters, rub them over with kerosene.
When, in the spring, the zinc lining of the refrigerator is found to be covered with small white spots, rub the zinc with kerosene. Leave the refrigerator open for several hours, and then wash with hot water, soap and a little ammonia. The spots will have disappeared and the refrigerator will be clean and sweet.

The zinc underneath a range or stove

should never be wet with a drop of wat er, unless the water is wiped up with a dry cloth at once. If water spills on the zine accidentally, wipe it up at once. Wet a cloth with kerosene, and go over the zinc every other day, and it will have the peculiar white shine that a clean zinc always has. If it has been neglected for a long time, or improperly cared for, wash first with ammonia and ashes, then wipe these up with soap and water, and wash the zinc with kerosene, as if the

oil were water.

When a sewing machine runs hard, oil it all over with kerosene, and then sew awhile, or run the machine without sew-ing, to allow the oil to reach every crevice. Wipe away all the kerosene and oil again with some good machine oil. The machine will seem like a new one; it will

run so much easier.

Kerosene oil will remove dirt from one's hands, after blacking one's hands, after blacking the stove, more quickly than soap and water. Pour a little in the water and wash the hands with it, then wash in luke warm water, then in Rot with plenty of soap and a stiff nailbrush. Finish off the hands with lemen and then rub in any good lotion.

After handling a paint brush, kerosene will remove the sticky feeling better than starthing clee.

Studies of the Vernacular.

This is the conversation that took place between the girl with the two-storey pompa-dour and the girl with the aeroplane hat, on the Wentworth avenue car:

"Seer, Jen!"
"Watcha wanta me?"
"Wanta askeesumpin.
choor house t'moranigh se t'moranight?

"Awquitcherfoolin!"

Betchadoo. Say! Juno Lilsimmons?" Bettido. Ullo! Ear sware Iga toft." "Wel, g'by!"-Chicago Tribune. Christ Has Risen.

(By Susan Coolidge.)
Chris has risen—else in vain
All the sunstine, all the rain,
All the warmth and quickening,
And renewal of the spring.
Vain they were to charm our eyes,
Greening earth and gracious skies,
Growth and beauty, bud or bloom,
If within their fast-sealed tomb
All our dearer dead must dwell,
Sharing not the miracle.

Crocus tips in shining row.
Welcome, for your sign we know.
Every bud on every bough
Has its message for us now.
Since the Lord on Easter day
Bursts the bonds of prisoning clay,
Alt the springtime has a voice,
Every heart may dare rejoice,
Every heart no more a prison,
Join the chorus, "Christ is risen!"

SCOTT'S **Emulsion**

When you go to a drug store and ask for Scott's Emulsion you know what you want; the man knows you ought to have it. Don't be surprised, though, if you are offered something else. Wines, cordials, extracts, etc., of cod liver oil are plentigetting cod liver oil when you take them. Every year for thirty years we've been increasing the sales of Scott's Emulsion. Why? Because it has always been better than any substitute for it.

TWO ARCTIC BABIES.

ander Peary's Exjerience Some Tiny Musk Calves. On the 4th of July, 1896, in a broad, level valley in the heart of Ellesmere Land, I came upon a herd of fire musk ozen. When they saw us they ran together and stood back to back in star form, with heads outward. This is their usual form of defense against walrus, their only enemies in this land. After they were shot I discovered two tiny calves, which till then had been hidden under their mother's long hair. Such funny .little coal-black creatures they were, with a gray patch on their foreheads, great, soft black eyes, enormously large, bony, knock-kneed legs and no talls at all.

With the falling of the last musk ox my dogs made a rush for the little animals, which, though wild-eyed and trembling with fear, showed a bold front to the savage, unknown creatures which surrounded them. Fortunately, I was too quick for the dogs, and rescued the little fellows.

Then I hardly knew what to do. I had not the heart to kill them myself, nor tell my Eskimos to. Finally I thought I would try and get them to the ship, fifty miles away, though I did not know how I was to do this over the miles of mountains and rough ice.

After the dogs were fastened the little fellows stood quietly by the bodden of the store the delege of the little fellows stood quietly by the bodden of the little fellows stood quietly by the bodden of the little fellows stood quietly by the bodden of the little fellows stood quietly by the bodden of the little fellows stood quietly by the bodden of the little fellows stood quietly by the bodden of the little fellows stood quietly by the bodden of the little fellows stood quietly by the bodden of the little fellows stood quietly by the bodden of the little fellows stood quietly by the bodden of the little fellows stood quietly by the bodden of the little fellows stood quietly by the bodden of the little fellows the stood of the little fellows stood quietly by the bodden of the little fellows the stood of the little fellows the stood of the little fellows the stood of the little fellows the little fellows

NERVOUSNESS, DYSPEPSIA, IN DIGESTION, and kindred ailments take wings before the healing qualities of South wings before the healing qualities of South American Nervine. Thomas Hoskins, of Durham, Ont., took his preacher's advice, followed directions, and was cured perman-ently of the worst form of Nervous Prostra-tion and Dyspepsia. cured them of chronic coughs, must be some truth in it. Try a bettle for that cough of yours. Prices: S. C. Wells & Co. 310 25c. 50c. \$1. LeRoy, N.Y., Toronto, Can.

THE PLUCK OF FATHER LACOMBI Bidding the Blackfeet stop firing and nide where the Cree shots could not reach them, Father Lacombe raised his Cross in his right hand, a flag of truce in his left, and marched straight out in the face of the firing line, shouting on the Crees to come out and parley. The Blackfeet could hardly believe their eyes when they realized what he was doing— marching straight in the face of certain death. They called to him to come back. They would fight to the end and die together; but he marked right on. Bullets fell at his feet. Two or three balls siffed past his ears singeing his hair. Again the Blackfeet shouted for him to come back, but he was beyond call, and the

bullets were raining around him like hail.

If the sun that rises over northern Dame Bradette Cured of all her snow fields ever witnessed a more human piece of unconscious heroism than this solitary figure advancing against the firing line—I do not know of it.

Suddenly, he was seen to reel and fall drenched in blood. A bullet had bounced from the ground, striking him in the shoulder, and glancing up grazed across his forelead. Demons could not have restrained the Blackfeet them. To the triumphant yell of the Crees they sent back counter shout that set the ravine ringing. They were no longer on the de-fensive. A whirlwind rush of rage carfensive. A whirlwind rush of rage carried them past all bounds of fear. They only waited to see the priest on his feet for the force of the bullet had been broken by the shoulder wound—when, with yells of fury, they poured volley after volley into the Cree bluffs, running from hiding of snowdrift to brushwood, pressing the hostiles back and back till, before midday, the fighters were in walking dictages and Bluckfoot snapled out before midday, the fighters were in walking distance and a Blackfoot snarled out
"You have wounded your priest! Canaille! Have you not done enough?"
Wounded the man who had nursed
them, too, through the smallpox scourge?
The Crees were dumbfounded. Besides,
they were beaten; and they probably
reasoned that if a handful of men taken they were beaten; and they probably reasoned that if a handful of men taken by surprise put up this kind of a fight, the same men on the aggressive with daylight to aid them and couriers scurrying to bring back the absent hunters, could coop the Cree company up in one of these ravines and exterminate the entire band. Besides, thirty of their braves were dead, fifty wounded; and retreat on horseback over deep snow with fifty wounded to carry could-not be made with unded to carry could not be made with as great speed as the return of Blackfeet warriors might warrant.

A Crea advanced to parley.—Agnes C. Laut in April Outing.

Building Up the Canadian Northwest. When the Dominion of Canada decided to build up its Northwest Provinces by inducing immigration its first step was to map out an advertising campaign, says the Philadelphia Record. The number of incoming settlers had been averaging about 15,000 per year. Under the direction of the Minister of the Interior nearly \$200,000 was spent in setting forth the attractions of the great Northwest, and an immigration boom immediately followed. Last year 128,364 settlers, near ly 50,000 of whom hailed from the United States, took up their residence in Canada, and the tide is still increasing. The Dominion has officially demonstrated that when

"Control." But Not Operation.

(New York Herald.) It is evident that the question of mu-nicipal control of public utilities is about to be forced upon the attention of New York in a practical way.—Philadelphia

It depends upon what our esteemed contemporary means by "control." New York has already determined to grant

no franchises in perpetuity.

It will eventually own the new subway and other important little utilities. The people approve of municipal owner-ship, but if by "control" the Inquirer means their "operation" that is a very different matter. Philadelphia has given us a significant object lesson as to dangers of that sort of "control."

THOSE WORRYING PILES!- On application of Dr. Agnew's Ointment will give you comfort. Applied every night e to six nights, and a cure is effect ed in the most stubborn cases of Blind, Bleeding, or Itching Piles. Dr. Agnew's Ointment cures Eczema and all itching and burning skin diseases. It acts like magic. 35 cents.—15

A Thousand to One.

Personal solicitation is undoubtedly Personal solicitation is undoubtedly the most efficacious method of selling goods, but it is also the most costly. Moreover, the prospective buyer is often inaccessible to agents; he lives in perpetual fear of being talked to death, and when he grudgingly grants an interview he is in anything but a receptive mood. Where the salesman cannot penatrate the newspaper is accorded a penetrate the newspaper is accorded a ready welcome. What the seller has to say through its advertising columns is say through its advertising columns is attentively perused and duly considered. Given an eloquent "ad." writer, with something worth writing about, and the newspaper will make a thousand sales where the typical "young man of pleasing address" will make but one. say throug

Folly of the Fakir's Victims.

Felly of the Fakir's Victims.

The people who attempt to get rich quickly by putting their money in wild-cat schemes have been getting some hard lessons lately. If investors could stop to consider that if the deceivers who concet these schemes and foist them upon the public had one-tenth part of the paying investments they advertices so liberally they would under no conditions part with the stock fewer lambs would be shorn. A really good and profitable business does not need to advertise the sale of the stock to any great extent, as it will sell itself, and there are always plenty of shrewd investors willing and ready to purchase. It is a case of investors seeking the investment, not of investment seeking the investment.

KIDNEY DUTY .- It is the particular function of the kidneys to filter out polsons which pass through them into the bloods When the kidneys are diseased they cannot do their whole duty, and should have the help and strength that South American Kidney Cure will afford in any and all kidney disorder.
