

Distilled Sunshine

Did you ever have a headache that made Sunday feel like wash-day?

Q Perhaps you have been drinking inferior teas.

Q No, you don't need medicine—all you need is a package of Grand Mogul Tea.

Q This tea combs the kinks out of the nerves. Why? Because it is rich in theine (the flavoring essence) which is just concentrated sunbeams. Grown on the high table lands of Ceylon, this tea contains the elements of a pure nerve-food.

Grand Mogul Tea

Q There are no other teas "just as good" as Grand Mogul, 25c, 30c, 40c and 50c per pound.

Q Sold only in packages lined with air-tight paper. Premium coupons in each package. The cost of these coupons is not taken out of the tea—but is simply a part of the advertising appropriation.

Lip Salve.

A delicious lip salve that can be used during the day is made of one ounce of spermaceti ointment, fifteen grains of balsam of Peru, fifteen grains of alkanet root and five drops of oil of cloves. Let the alkanet stand in the ointment over a gentle heat until the liquid is deep rose colored, then put through a strainer. When cooled, stir in the balsam and let all settle. When it is clear pour off, leaving the sediment at the bottom, and to the clear add the oil of cloves. When cold it will be hard.

BEWARE OF OINTMENTS FOR CATARRH THAT CONTAIN MERCURY.

As mercury will destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. Sold by Druggists. Price 75c. per bottle.

Take Hall's Family Pills for constipation.

Cheap Literature Course.

There are men and women in Canada to-day who are drunken and besotted with trashy novels. There are public and Sunday school libraries in this country that do not circulate a hundred good books a year. There are book stores in Canada that do more to destroy the human intellect than half a dozen cigarette stores in the same town or city.—Canadian Magazine.

THE HAPPINESS OF HOME.

Very largely depends on the mother's disposition; if she is animated and bright, everyone is happy; but if she is nervous, irritable and everything goes wrong. Bright, cheery women usually use Ferrozone, the greatest health-maker known. By acting through the blood, Ferrozone is able to reach all the organs that need assistance; it establishes regular and healthy action of all functions, builds up the general health, fortifies the system with a reserve of energy that defies disease. Don't put off—Ferrozone costs only 50c. at any drug store; get it to-day.

Shot Fine Lynx.

On Friday last Andrew Turnbull, of Baxter, shot a fine specimen of the lynx species in the swamp near his home. The animal measured about four feet from tip to tip. Mr. Turnbull brought him down with a shot through the heart, says the Alliston Herald.

TERRIBLE BACK PAINS.

They fairly agonize your life. Something powerful and penetrating is needed. Doctors know of nothing so swift to relieve as Nerviline, a strong, penetrating liniment made of cream just such pains as yours. Nerviline is very concentrated, about four times more powerful than ordinary liniments. In the worst cases Polson's Nerviline is extraordinarily good. All muscular pain flees before it. Nearly fifty years in use—a good recommendation, surely.

Manage as we may, misery and suffering will always cleave to the border of superfluity.

Wash greasy spots, pimples or rashes with Lever's Dry Soap a powder. It will remove the grease with the greatest ease. 3c.

Don't brag about your future if your past won't stand close scrutiny.

Coughs, colds, hoarseness and other throat ailments are quickly relieved by Crescents Tablets, ten cents per box. All druggists.

PARIS FASHIONS.

Checked Tulle and Vile With Soft Materials—Louis XVI. Styles.

The pointed Marie Antoinette bands are now so elongated that the corsage itself is arranged into a deep point in the front. The Louis XVI. tendency is clearly visible in modes as well as in fabric, and the tints of pale blue, pink and yellow are the same as in this day.

Waistcoats of flowered material are to be seen on many of the more elaborate tailor made.

The new coats are trimmed with flat silk braids and beautiful enamel buckles and buttons.

A great deal of black chintilly lace is being used over foundations of

AFTERNOON GOWN.

white, and it is held in at the waist with a deep pointed belt of satin.

Black and white dresses are often relieved with a wide belt of pale blue and touches of the same color on the yoke.

Very fine soft cloths, velvets and wools, which drape and fall well, adapt themselves to the full skirted styles which are now prevalent. The new soft tulle, however, are gaining a foothold with Parisiennes. They come in tiny checks in lavender and white or pink and white, such as were worn forty or fifty years ago.

The long slender effect has come to stay, and nearly every garment of fashion suggests to us the 1830 period. The picture shows a blue cloth dress trimmed with red embroidery and having undersleeves of red and blue mul.

JUDIC CHOLLET.

SKIRTS WITHOUT TRAINS.

Tailor Made for Street Wear—Short Coats the Vogue.

Silk tailor made will be about the smartest thing this summer. They will appear principally in navy blue, black and gun metal gray. The jackets will hang loosely and be made up with flat folds simulating tucks. The skirts will just clear the ground and will be quite full, with a trimming of folds simulating tucks, as on the waist. With such a costume fancy buttons either of cut steel or of handsome enamel are used.

Ensemble of the Red Cross.

The selection of the emblem of the Red Cross Society was a compliment to Switzerland, which country had announced her interest in humanity by officially issuing invitations to the nations of the world to meet in conference and establish rules for the government of civilized communities when engaged in warfare.

The national flag of Switzerland is a white Greek cross on a red ground, and the colors of the Red Cross flag were simply reversed.

By the terms of the Red Cross treaty the hospital flag of every nation must be a red Greek cross, on a white ground, and every person, ambulance, or other essential of the service must be so designated.

And this new development, it seems, is not mere vivid imagination. Saniaumont has made his experiments, proved his case.

"The balloon envelope of this aerial yacht, as I may call it, is being sewed. Its car is already built. Its boiler and condenser are being completed. Its motor is ordered. Its propellers exist. And very soon the aerial yacht will start on its first cruise."

"Beneath an egg-shaped balloon will be a basket, like a large house with a balcony window running half its length on each side.

"For as there will be no darning up into the rigid solidities above the basket, the basket will be a proper handling of the fauets will secure us the level altitude we desire, and we shall float on, watching the great map of Europe unfold beneath us."

"We shall watch the stars rise. We shall hang between the constellations and the earth. We shall awake to the glory of the morning."

"So day shall succeed day. We shall pass frontiers. Now we are over Russia. Here is Vienna."

And now that it is morning again, let us ride on this breeze as far as Constantinople!"

"This new aerial pleasure yacht which I have named the 'Red Cross' will have no great speed, perhaps nine to ten miles an hour, enough to find a northerly current, and by it reach the Pole."

The inventor decided to try them before they made a complete cure of me. That is two years ago now and as I said before I have had good health ever since I used Dodd's Kidney Pills."

Dodd's Kidney Pills cure once and for all. There is no stage or form of Kidney Disease that they do not cure completely and permanently.

For Hardwood Floors.

Half a gallon of boiled linseed oil heated in an old iron saucepan until almost at the boiling point when applied to an oiled hardwood floor with a clean brush will prove to be an excellent cleanser. Three coats should be put on the first time and then one coat every six months to keep the floor in good condition. Such a floor is excellent in a kitchen, as it only requires wiping with a damp cloth once a week.

A man talks about owning his business. But, as a matter of fact, his business owns him. His whole life is regulated by the demands of the business. The time at which he rises, his breakfast hour, the time given to meals, are all determined by business obligations. He rushes through lunch because he "can't spare the time from business" to eat leisurely. He won't take a rest because he is needed at the store or office. He is in fact an absolute slave to business. The results which follow this slavery are to be seen on every hand. Men dyspeptic, irritable, nervous, with drawn faces and hollow eyes, sit at the desk or stand behind the counter until they collapse in a fit of sickness, or are taken away by heart failure. Those who cannot escape the exactions of business will find a friend in Dr. Pierce's Golden Medical Discovery. It strengthens the stomach, increases the action of the blood-making glands, increasing the vitality and physical vigor. It makes men strong and prevents those business break-downs which so often terminate fatally.

The instinctive feeling of a great people is often wiser than its wisest men.

AERIAL BATTLESHIPS.

Visits to the North Pole—What the Airship Will Do.

Suppose that I consider it quite possible to visit the North Pole in an airship?

"Suppose I predict that, at no distant date, aerial cruisers will threaten fleets, make war on submarine boats, and stampede army divisions?"

"Suppose I tell you that I hope, as early as the coming summer, to give something to the impetus remaining needful to the aerial effort that will bring such things to pass in Europe?"

In these remarkable words, M. Santos-Dumont begins, in the March number of the "Scientific Revue," an article on the future of airships, which takes a strange and even thrilling grip of the imagination.

The twin enemies of ballooning are condensation and dilution. They have hitherto made it impossible for a balloon to stay much longer than twenty-four hours in the air. The world's record is thirty-six hours.

If a cloud makes the sun the gas in the balloon cools and condenses, and ballast has to be thrown out. The cloud vanishes, the balloon dilates under the heat, and gas has to be released. Thus the time soon comes when the balloon ceases to be able to carry its car.

The Problem Solved.

The twin enemies Santos-Dumont has vanquished.

How is it done? When the gas is condensed he re-heats it by means of steam. He carries, let us say, 24 lbs. of water. With one kilogramme (2.2 lbs.) of petroleum he turns this into steam, which dilates the gas to such an extent as to produce 36 lbs. of new ascensional force.

This steam does its work through the medium of aluminium tubes inside the balloon. It cannot mingle with the gas which it re-heats and it cannot injure the fabric of the balloon envelope. And when the steam has done its work it comes out of the other end of the tube in the form of water. There is your 24 lbs. of ballast back again.

"The twenty kilogrammes (or more) of water remain always in a part of the original vessel, the 'water balloon,' says M. Santos-Dumont, 'yet each time I send it round the circle at the cost of one kilogramme of petroleum I gain temporarily thirty kilogrammes of ascensional force.'"

"If the ordinary spherical balloon can stay twenty-four hours in the air with a small quantity of sand ballast, I am able to stay thirty days in the air with the same quantity of petroleum ballast."

New Airship.

And this new development, it seems, is not mere vivid imagination. Santos-Dumont has made his experiments, proved his case.

"The balloon envelope of this aerial yacht, as I may call it, is being sewed. Its car is already built. Its boiler and condenser are being completed. Its motor is ordered. Its propellers exist. And very soon the aerial yacht will start on its first cruise."

"Beneath an egg-shaped balloon will be a basket, like a large house with a balcony window running half its length on each side.

"For as there will be no darning up into the rigid solidities above the basket, the basket will be a proper handling of the fauets will secure us the level altitude we desire, and we shall float on, watching the great map of Europe unfold beneath us."

"We shall watch the stars rise. We shall hang between the constellations and the earth. We shall awake to the glory of the morning."

"So day shall succeed day. We shall pass frontiers. Now we are over Russia. Here is Vienna."

And now that it is morning again, let us ride on this breeze as far as Constantinople!"

"This new aerial pleasure yacht which I have named the 'Red Cross' will have no great speed, perhaps nine to ten miles an hour, enough to find a northerly current, and by it reach the Pole."
