I.H.C. BINDER TWINE

1 LB. → ← 1 LB.

STANDS EVERY TEST

IT HAS FULL LENGTH, FULL STRENGTH AND EVENNESS OF STRAND

IT may be that you are one of the farmers who used short length twine last year—if so, you are familiar with the disadvantages of using inferior binder twine.

International Harvester Company twine is guaranteed to be full length and full strength. Every Canadian farmer who used this twine last season knows that every pound complied with the government's inspection requirements.

While it is true that "a pound is a pound the world around," it doesn't logically follow that the average length of a pound of sisal twine measures 500 feet. It should, and the farmer who uses a pound

of the sisal brand is entitled to 500 feet of good, serviceable twine, and that is what he will get if he buys International twine. Farmers receive full value when they buy International twine.

Bear in mind that the brands of Deering, McCormick and International twine are guaranteed to average as follows:

Sisal,	500 feet per pound
Standard,	500 " " "
Manila,	600 " " "
Pure Manila,	650 " " "

Call on the local agent and have a talk with him concerning these brands of twine or write nearest branch house for further information.

The Tie That Binds

Examine our lock—"The Tie That Binds." Notice how it locks smooth on both sides of the line wire. Being an oval loop, it permits a long bend in the line wire. This does away with short kinks, which cause so many breaks in the fence.

This lock can't slip and adds strength and wear to the whole fence. The "Standard" may cost a little more than small, soft wire fences—but it's worth more to every farmer and stockman who wants the best. Write direct to the factory for catalogue and sample lock.
