A THIRD JUDGE.

The promise made by the premier that an additional judge for the Yukon will be appointed during the present session of parliament is a most important announcement. As constituted at the present time, the appellate court having jurisdiction

over mining disputes, must of ne-

cessity he open to objection. The gold commissioner, before whom all such cases are first instituted, is also a member of the appeal court, and therefore is placed in sitting in judgment upon his own tis Hope, of Seattle, the promoter therefrom. It will very seldom oc- of success in the venture. More than of the Montreal Board of Trade has

As a matter of fact the arrangement which now exists was intended cover the interim until a third judge should be appointed. In the light of today's dispatches it seems clear that the government has fully concluded to relieve the gold commisof the promised third judge will make litigation far less expensive than formerly, as there will no long- shipping department. er be any necessity of appealing cases to British Columbia, as has been the practice in the past.

A clever swindle has been unearthed recently in Seattle. The swindler was caught with a complete outfit for counterfeiting the stamps and labels used on Royal Baking Powder cans. Hundreds of cases of a mixture of alum, cream of tartar and corn starch were thus scattered about the state of Washington, the carefully prepared labels concealing the fraud. Pinkertons were placed on the case and the swindler arrested. The fact that the stuff met with ready sale leads to the suggestion that there is more in a name than many people imagine.

The amount of dirt taken out by present means of working is so far in excess of what could be done by old methods, that a comparison is almost impossible. On claims where in former years a few thousand buckets would be considered a good season's work, veritable mountains

of dirt and gravel are now awaiting the washup. If there are any good reasons why Dawson should not enjoy a summer of universal activity and prosperity, they have not yet appeared.

The will of the late Cecil Rhodes provides that none of the heirs shall come into possession of the property left them until they have engaged in business for a period of not less than ten years. During his life the great South African never hesitated to express his contempt for "wealthy loafers," and apparently he intended that none such should inherit his vast wealth.

All the evidence at hand seems now to point to the fact that the lower country will develop in a most satisfactory manner. Authorities agree that the Koyukuk district includes an immense gold bearing area which requires only systematic prospecting to become highly productive.

It is not without the range of possibility that trolley parties will evidence be riding about Dawson before the close of the present summer. Civilization is certainly making terrific advances in this secluded spot.

The amount of money required each year for the purpose of administering the affairs of this district totals an extraordinarily large sum. Too much government is almost as undesirable as none at all.
