A Warning

To feel tired after exertion is one thing; to feel tired before is another. Don't say the latter is laziness—it isn't; but it's a sign that the system lacks vitality, is running down, and needs the tonic effect of Hood's Sarsa

It's a warning, too—and sufferers should begin taking Hood's at once.

The Golden Caff.

The Egyptian women were bangle hoops of gold in their ears, which were regarded as the wearer's choicest possions and were parted with under direst stress. The golden calf was supposed to have been made en-tirely from the earrings of the people.

Only English Pope.
The only Englishman who ever ruled as pope was Nicholas Breakspear, who was born about the year 1100 at Langley, near St. Albans. He was unani-mously elected for the papal chair in 1154 and bore the title of Adrian IV.

Air Your Clething. Air your dresses well and they never will seem stuffy. Clothes never should be shut up in a wardrobe immediately after they have been worn. Let the bodice of a dress hang over the back of a chair for at least half an hour before putting it away. The oldest clothes can be kept fresh and odor less if they are treated in this way.

"I feel it my duty to testify to the Psychine. While travelling in New Ontario conducting special meetings I contracted a very bad cold, which gradually developed into Bronchitis of the worst form. I was advised to try Psychine, which I did, and after using but a few heitles I was applied by but a few bottles I was completely restored to health. I recommend this wonderful remedy to sufferers from Bronchitis and other troubles." Later: "I wish to add that my voice, since using Psychine, is stronger and

has much more carrying power than it had before I had bronchitis, and the vocal chords do not tire with speaking." P. TILLER, Cant. Salv'n. Army. Ann St., Toronto, Aug. 13, 1907.

THE DIET DRILL

Ancient Method of Making Brave Soldiers In China.

In robes of pale silk, delicate and cool, a fat young Chinese diplomat amused a half dozen pretty girls at a Bar Harbor tea.

"And," he was saying, "we find it hard to abolish the ancient diet drills our soldiers. They still believe, you know, that it is food rather than work and study which makes the successful warrior.
"Our old laws bid the soldier on the

thirteenth day before going into bat-tle to eat tiger jelly, so as to possess the tiger's ferocity. On the twelfth day they tell him to eat lion liver in order to acquire the lion's bravery. For the eleventh day the ancient writings advise serpent soup, which will give the man the serpent's cunning; on the tenth day, chameleon custard, so that he may dazzle and confound the enemy by changing color like the chameleon; on the ninth day, a broth of crocodile that he may pursue the enemy in the water no less cleverly

"Next, jaguar spleen, which will give him the jaguar's fierce and rapid onslaught; next, kites' heads, for the eyesight; then hippopotamus brains, to toughen the skin against wounds; then roast monkey, for nimbleness in scaling the enemy's walls; then stew-ed scorpions, a dish that makes the eater capable of inflicting venomous wounds; then underdone venomous breast, so that the soldier may be crue and pitiless. And finally on the day of battle the man is ordered to eat a red powder made of the desiccated blood the leopard, so that he may tear the foe to pieces as the leopard tears his prey."

The young diplomat laughed. "We have still," he said, "hundred of mandarins and thousands of sol-diers who think that this diet system makes better warriors than all the modern drilling and gunnery and science in the world."-Exchange

Three Giant Locomotives. Three locomotives, now building for the Eric railroad at the Schenectady works of the American Locomotive company, will be the heaviest and most powerful engines of their kind

ever constructed, Each locomotive alone, without its Each locomotive alone, without its tender, will weigh 205 tons, and will haul on the level 320 loaded freight ears, or a train two miles long.

These enormous machines are of the type known as Mallet compound, and will have sixteen drive wheels, arranged in two independent groups of eight each. The boilers used are more than forty-three feet long, and the in-

eight each. The boliers used are more than forty-three feet long, and the in-side diameter of the largest firebox foundation ring is eight feet. It is provided with 404 tubes two and onety-one feet long. The water in the boller will weigh 42,700 pounds and the tubes 23,700 pounds. One of the fireboxes would make a good sized living room, being ten and one-half feet long and nine and one-half feet wide inside, and having a grate area of 100 ide, and having a grate area of 100 mre feet.—New York Herald.

The Tattered Flags. There is a curious reason for the or-der which the kaiser has just issued to are to be taken from their cases only on the most important occasions. The flags of the German army are in a deplorable condition, even the new ones, for the colonels of regiments which have had new colors given them of went through the Franco-Prussian war hated parading with brand new colors, as if the regiment had never been in action. They winked at the subalterns, who slit the new flags and gave them the dilapidated air of the old colors But the emperor was furious at this imitation, and so he has had the sham glories put back into the cases.

New Method Mirrors. Copper very closely resembles silver in many respects, but hitherto no method has been known of depositing it from aqueous solutions on glass s as to form mirrors like those so long made with silver. This is now accomplished by reducing cupric oxide by an aqueous solution of phenyl hydrazine in presence of potassium hydrox-Some mirrors made in this way have been shown to the London Royal society by Dr. F. D. Chattaway and have a coherent metallic film as brilliant and uniform as that of the silver on glass reflectors used in telescopes and much more beautiful on account of the color.

Accidents on Warships. Occasional accidents are as much to be looked for on a warship as in an industrial plant. If the officers and

crew are to be fit for service in time of war they must practice with the big guns. They must engage in work where momentary carelessness and the neglect of some seemingly trivial precaution may mean sudden death or permanent disablement. On a battleship, as in an iron or a powder mill, eternal vigilance is the price of safety, and in spite of the utmost vigilance deplorable casualties may happen.-Chicago Tribune.

A Sailor and His Grog. At present every British sailor is allowed an eighth of a pint of rum per day, or, if he likes to go without grog, he gets nine-sixteenths of a penny. Total abstainers in future will get 1 penny.-London Saturday Review.
