Tight Collars Muddle Brains.

Dr. Leonard Williams calls atten-

ion in the .'ractioner to the penal-

ties that men and women have 'o pay for the erect posture. Instead of the heavy organs in their abdo-

mens having the support of the float-ing ribs and the bony pelvis, as they

have in the lower animals, they hang

gravity pulls them down and all sorts

As the weather grows warmer and ice elips into the ranks of commodi-ties that march under the banner of H. C. L., the question of how to keep the refrigerstor full this summer be-gins to worry the already sadly per-plexed head of the family. But if you are handy with tools you can build an iceless ice box at a triffing cost, and the cost of operating will be nothing. Here is the way it is done: A wooden frame is made with di-meneions 42 by 16 inches, and is cor-A wooden frame is made with di-mensions 42 by 16 inches, and is cov-ered with screen wire, preferably the rustless kind. The door, made to fit closely and mounted on brass hinges, can be fastened with a wooden latch. The bottom is fitted solid, but the top should be covered with screen wire. Adjustable shelves can be made of solid wood or strips or sheets of galvanized metal. Shelves made

from poultry netting on light wooden frames, are probably the most desir-

thing else.

of interest.

able. These shelves can rest on side braces placed at desired intervals. A bread-making pan, 16 by 16 inches, is placed on the top and the frame rests in s 17 by 18-inch pan.

AN ATTRACTIVE SURFACE.

AN ATTRACTIVE SURFACE. All of the woodwork, the shelves and the pans should receive two coats of white paint, and one or two coats of white enamel. This makes an at-tractive surface and one that can be easily kept clean. The screen wire also may receive two coats of enamels, which will prevent it from rusting. A cover of canton flannel, burlas or duck is made to fit the frame. If canton flannel is used, the smooth side should be out. It will require about three yards of material. This cover is buttoned around the top of the frame and drawn down the side on which the door is not hinged, us-ing buggy hooks and eyes or large-headed tacks and eyelets worked in the material. On the front side ar-range the hooks on top of the door, instead of on the frame, and also of the door, allowing a wide hem of the interial to overlap the place where the door closes. The door can then be opened without unbuttoning the cover. The bottom of the cover should extend down into the lower

THE ATHENS REPORTER

that the It is 1 lain the the 'intelligence, which w to the dog and the 'intellec een the concede to the dog and the 'intellect' which we regard as the monopoly of his master. The distinction would be greater still if the master did not so frequently nullify the difference by wearing tight, hi: collars to im-pede the all important drainage. A constricted neck means a muddled head; not infrequently it connotes a bad one and a pimply face."

Worth Knowing.

Worth Knowing. A dainty way to serve eggs for breakfast, luncheon or tea is to take round slices of bread, toasi them deli-cately, butter them and dip them lightly in hot water. On each round spread the white of an egg beaten stiff with a speck of salt. Make a depression in the centre, in which place a whole yolk, set the toast in the oven just long enough to set the yolk and brown the white a little. Place on a platter and garnish with parsley. Are you worried over rusty from utensils? There's nothing like kero-sene to remove rust from iron. Any metal article that is badly rusted should be immersed in kerosene and allowed to remain until the rust has softened. Then wipe if with a soft cloth and polish with steet wool or silver polish, according to the finish.

North.

IN EVERY STABLE

Sufficient Unto Themselves.

United States marines who have hobnobed with Filipino head hunters and have long been friendly with the Chamorros of Guam, met their Water-loo when they tried to establish the entente cordials with the Cha-Chas of the Virgin islands. According to the marines the Cha-Chas are "moor miners". They live

According to the marines the Cha-Chas are "poor mixers." They live on the west side of the harbor of Charlotte-Amalie, decline to mingle or intermarry with the negroes, and re-sent any butside interference with their affairs. They are the hardest drinkers and best workers on the is-land, their industry bringing them a mod their and the sent land, their industry bringing them a good living as fishermen and weav-ers of straw hats. The tribe is said to have come originally from the Dutch and French Leeward islands. So far the marines have taken only long fistance observations of the Cha-Chas. For while the tribe is not hostile, its members indicate that they want to be left alone.

Peculiar in their way were thir-teen mummies found a while ago in a cave on Ragamil Island, which is one of the leut: hain. They were wrapped in skins and nets; but the THE PARTY PA

Viewed solely as a matter of optics the Arctic night is as dark as any night. Explorers in high latitudes say, RELIEF AT LAST night. Explorers in high latitudes say, however, that there are many allevia-tions of the obsecurity. The scars flash keeniy, the moon comes along in a regular succession of phases, the snow surface relieves the gloom under conditions of the utmost absence of light, and the surfora borealis is the finest kind of illuminant. Explorers all agree that their men pass the winter night without much difficuity if only there are means of amusement.

I promise to send you a FREE trial of the new absorption treatment, and re-ferences from your own locality if you will but write and ask. I assure you of immediate relief. Send no money, but tell others of this offer.

Nianara Square, Buffalo, N. Y. and the second WIDELY DIFFERENT

Are Islands of New Zealand and Australia.

"Usually, in our mental geography, Australia and New Zealand are con-veniently grouped, yet one of the first surprises awaiting the tourist from the northern hemisphere is to find that Australia and New Zealand may not be purprised as two telands of like not be regarded as two islands of like appearance, differing mainly in size; near neighbors which may be treated

as a unit," says a communication of the U. S. National Geographic Society

from Herbert E. Gregory. New Zealand is nearly twice as far from Australia as Bermuda is from New York, and it is not only east, but also south.

"Four days' travel across a chilly "Four days' travel across a chilly sea is required for the traverse from Wellington to Sydney, and after ex-changing chill midsummer climate of the New Zealand lake region for the heat of Adelaide, one readily accepts the evidence of the map that the southern coast of the Australian main-land has the latitude of central New Jersey, while the southernmost of the three islands which comprise the Do-minion of New Zealand occupies the position of southern Newfoundland.

"In climate and vegetation the two dominions are as unlike as Norway and South Carolina. New Zealand is a land of mountains, gorges, rivers and fiords. The higher peaks of the south island are eternally snow-cap-ped and the glaciers of its southera Alps rival those of Switzerland. The surrounding seas are too cold for cor-als. Among the mountains of the als. Among the mountains of the North Island volcanic fires are still active, and the geysers and hot springs are little less impressive than those of the Yellowstone Park. The aboriginal inhabitants of New Zealand, at the time of their discovery by Captain Cook, were the most ad-vanced of all the South Pacific races, while the aborigines of Australia are

remarkable point about them was that remarkable point about them was that the cavern which served them as a burial vanit, was steam-heated. In coldest winter weather it was k'st warm by volcante fires. Eleven of these thirteen mummles

are now in the National Museum at Washington. They are completely ccated.

It is sumosed that ancestors of the present-day valeuts mummified their dead, not for any religious reason, as did the Egyptians of old, but because they did not want to part with them. Their method was to wrap their de funct relatives in the skins and in-testinal membranes of sea mamals

a criminal was than a criminal oriense to cut timber at the forers. Only such could be gathered as the wind had blown down; hence, a heavy windstorm was hafled by the peasants r.s so much good luck, and from this comes the modern application of the expression.
