to the minds of every one in England has come back the recollection of the famous Hindenberg Line at Queen and at Drouont.

History will record this, for in spite of returned soldiers in New York City who brag about making the first breach in the Hindenberg Line.

The General Assembly of the Presbyterian Church in the United States is considering a recommendation that the churches of the denomination engage in paid newspaper advertising as aid in advancing the cause of Christ in the world.

Why not? Shall the works of the devil, as Luther might say, be left to monopolize the aid of publicity?

Other conditions being equal, a man who had to lose one leg was likely to live longer than if he had not lost it, and if both legs were amputated

he would probably live longer still, declared Col. Open-shaw, when the Princess Royal opened Church Army Hotels for Limbless Men at Kensington. The physiological reason advanced for his statement was that the heart had to carry the blood to the extremities, and would continue to work longer if the legs were taken away. He added that it was demonstrably true that a legless man could be a better swimmer than before his loss.

An Italian who kept a fruit-stand was much annoyed by possible customers who made a practice of handling the fruit and pinching it there, by leaving it softened and often spoiled. He kept it beyond their reach, he finally put up a sign:—If you must pinch de fruit—pincha de cocoon!
