EXCESSIVE DRINKING

Orrine Destroys the Craving for Drink Sold Under Positive Guarantee.

Excessive or continued use of alcoholic beverages always results in a diseased condition of the nervous system.

The drinking man is often heard to say, "I can stop of my own free will and when I wish," but the poor fellow is now devoid of the power to act at the proper time and in the right way-it's too late, the craving has secured a firm hold, and because of the diseased nervous system he has not the ability for sustained effort. The result we all know.

Drunkenness is no longer considered a erime; eminent scientists and physicians have agreed that it is a disease, and must be treated as such.

The home treatment that has been used for a number of years, and is highly successful, is Orrine. It is sold under a positive guarantee that if it does not effect a are all suitable for reproduction. For cure your money will be refunded.

"For that and other reasons it seemed important that the crop should be moved and we were asked to devise some means of granting aid." The minister explained that the banks were not the movers in the matter and when the plan was first mooted prominent bankers were inclined to think no aid was needed. Later these bankers modified their views and asked that the proposal be carried out. The Winnipeg board of trade and other bodies also urged action.
