## PLUG CHEWING TOBACCO

What the Old  
Salt Says:

"It's many years  
since I started to  
follow the sea,  
and like most  
seamen I have  
always chewed  
tobacco.

They all say as  
I say, that  
Empire  
Navy Plug  
Chewing  
Tobacco is  
the best."

The Old Salt.

## GUEST BRIDGE IS COMPLETED; STRUCTURE COST ABOUT \$20,000

This Is the Famous Work That  
Resulted in a Big Lawsuit  
Against the County.

Work on the Guest Bridge, over the River Thames, on the fifth concession of the township of London, was today completed, and incidentally one of the grievances of property owners along the stream which cost the county rather costly litigation, has been removed.

The bridge, two spans of which were constructed four years ago at a cost of \$13,000, now stands for an expenditure of \$20,000. The structure was located in a rather peculiar position, and was considered to be one of the finest when erected. Every precaution was taken by County Engineer Talbot to build a permanent bridge, and records of the flow of water for a great many years were taken to insure against obstruction of the stream.

## CITY COUNCIL MAY ENGAGE A BIG MAN FOR ENGINEER

Matter Will Be Brought Up at  
the Next Regular  
Meeting.

The city council will probably engage the services of a city engineer within the near future.

While Mr. H. A. Brazier, former assistant, is only nominally city engineer now, the appointment was not looked upon as permanent, but merely an expedient in order to overcome the difficulties of handling the department while the aldermen were looking for a big man to fill the position.

The aldermen are practically unanimous in the opinion that something should be done at once.

Ald. Wright, at the next meeting of the council, will bring in a motion to increase the maximum salary for a city engineer from \$2,500 to \$3,500. He will be supported, undoubtedly, by a majority of the council.

"What we want is a good man," he said. "There is no use wasting money any longer, but let us get the best man in sight. I think we can get the man we want for the money I suggest."

A blockade in the future another hundred-foot span has been added, making the total length 250 feet. The cost of the steelwork of the last span was \$4,750, concrete work \$4,000, and grading and filling of the approaches \$1,000.

A rather remarkable thing occurred when the easterly span settled. The reinforced concrete floor, 100 feet long and 16 feet wide, was warped and twisted four feet out of its normal position, but did not crack. This had hitherto been considered impossible by engineers. When the bridge was jacked up the floor again took its place and is apparently undamaged.

A Lawsuit.

The addition of the third span is the result of litigation commenced by George Mason, a farmer, who owns property adjoining the bridge. He claimed that his property was severely damaged by the flood, and before the matter came to trial refused \$500 as a settlement from the county. The case was tried at the last session of the high court here, but judgment has not as yet been handed down. The decision is expected at any time now, however.

The plaintiff at the trial was able to produce records showing that the river did on one occasion 65 years ago reach a level within two feet of as high as the mark attained last spring, and this precedent having been established in law, the county was compelled to reconstruct the bridge.

know one now who will fill the bill in every respect. I am in favor of prompt action. We should have a man at once."

Engage Man at Once.

"With one year's experience on the board of works, I am confident that we should engage the engineer at once," said Ald. Coles. "We should have him on the ground so that he could lay out the work for next year during the winter time, and commence work early in the year. That is the only way to accomplish anything."

"Get a man now," said Ald. Moore, "acting chairman of the board of works. 'Nothing can be gained by delay.'"

"We should lose no time in getting a big man," said Ald. Rose. "We want the best in the land, as we have many big problems to settle."

Other aldermen expressed themselves in the same way, and it is likely that applications will be called for at the next meeting of the council. A number of men have sent in applications already.

How She Obtained Good Bread.

"I have been baking now for 12 years," writes one housekeeper, "and have never had good bread till I used White Swan Yeast Cakes. Sold at grocers in packages of 6 cakes for 5c. Write White Swan Spices and Cereals, Limited, Toronto, for sample."

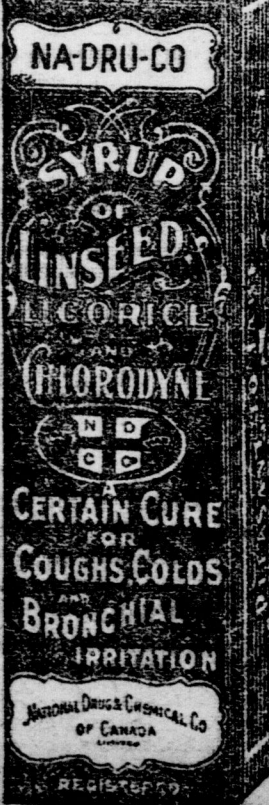

## NA-DRU-CO Syrup of Linseed, Licorice & Chlorodyne

is an absolutely reliable household cough-and-cold remedy, prepared by expert chemists. It quickly relieves coughs, and if taken when the first symptoms appear it breaks up colds before they become serious or troublesome.

It's a good thing to keep always on hand in the Medicine Cabinet.

In 25c. and 50c. bottles, at your Druggist's.

NATIONAL DRUG AND CHEMICAL CO.  
OF CANADA, LIMITED.

## TOO MANY TREES IN LONDON; CUT DOWN AND GIVE POOR

Chairman Williams of Board of  
Health Puts Forth the  
Scheme.

Dr. E. Williams, chairman of the board of health, has a scheme to relieve poor people, who might suffer this winter owing to the scarcity and high price of coal. It is none other than cutting down a large percentage of the trees in the city.

"London has twice too many trees," said Dr. Williams, in discussing his proposition. "We could easily dispense with half of them. In my opinion, light and air are much to be preferred to the shade. Walk down any of the streets, and you will see that we have too many trees. Coal is going to be expensive, and scarce. Why not cut down a large number of these useless trees, make them into firewood, and supply it to those who need it? I think that would relieve the situation greatly and incidentally benefit the city as much."

## ONLY ONE CANDIDATE TAKES NAVAL CADET EXAMINATION

Stratford Youth Writing at the  
Western—Civil Service Tests  
Over Tonight.

There is but one candidate, a young man from Stratford, trying the naval cadet examination, which commenced at the Western University yesterday morning, and will continue until Saturday afternoon. The examination is very similar to the matriculation and includes the different mathematical subjects, and several of the languages.

Provost James, who is presiding at this examination, as well as that of the civil service, stated that the results will not be known for some time, as the papers have first to be sent to Ottawa, and from there to the different examiners to be read.

In the civil service examinations there are 21 candidates trying the preliminary and 20 the qualification papers. Some of those writing on the examinations are sitting in both sections. These candidates will be through this evening, but as the number of candidates throughout the country is fairly large, the results will not be published for some time.

## LAND FOR FACTORY SITES TO BE PURCHASED BY CITY

Sum of \$6,000 Will Be Asked  
From the Ratepayers in  
January Next.

Four money bylaws were recommended to be sent to the ratepayers in January next by the manufacturers' committee at its session on Wednesday afternoon. Three of these are loans to manufacturers, and the other is to purchase land for the extension of the London and Port Stanley switches and furnish factory sites.

The first bylaw is to loan the Dennis Wire and Iron Works \$25,000 at 4 1/2 per cent for 20 years for an extension of their plant. It is the intention to construct steel sash and the like. The firm agree to employ 100 men the first year and 150 the second. The loan is to constitute a first mortgage on their plant.

The second bylaw is to loan \$25,000 to the Electric Light Company of Ohio for fifteen years at 4 1/2 per cent interest. The company has bonded five acres of land near the L. and P. S. R. tracks, south of the river, where they will erect buildings costing \$65,000. The firm are to employ forty hands at the beginning and add thirty to forty a year.

The next is to loan the C-N-W Shoe Company the sum of \$25,000 for a shoe factory here, for fifteen years, at 4 1/2 per cent interest, the interest for the first five years not to be demanded, but the loan to be paid off in ten equal instalments. The company have opened their factory here next to the Cook-Fitzgerald Company and expect to erect a big plant for the manufacture of ladies' shoes.

Factory Sites.

The fourth bylaw is to purchase a parcel of land from the Chelsea Green Land Company for \$6,000 for factory sites and industrial purposes.

There was no objection whatever to the motions to submit these bylaws to the ratepayers.

The petition for the annexation of Chelsea Green was presented, and it was recommended that the council declare itself in favor of attaching this suburb to the city.

Those present at the meeting were: Ald. Spittal, chairman; Ald. Coles, Ald. Johnston, Ald. Murphy, Ald. Moore, Mayor Graham, Lieut.-Col. W. M. Gartshore, J. Grant Henderson, commissioner of industries, and Secretary S. Baker.

Must Not Render  
Lard or Tallow

Grinding of Bones Is Also Prohibited  
in Local Market  
House.

At the meeting of No. 3 committee of the city council last evening, it was decided to prohibit the rendering of lard, tallow, etc., and the grinding of bones, in the Covent Garden Market House. The board of health sent a communication to the committee, protesting against the butchers doing this sort of work.

"The board is right," said Ald. Wright. "The place should be merely for selling the finished article."

Fire Chief Aitken contended that the London Electric and G. N. W. Telegraph Company's wires were in bad condition, and after every storm the fire alarm system suffers severely. At the last session, a number of wires were broken, and the department's alarm system was put out of business in some sections.

"The wires are rotten, and when they suffer break we are the consequences," declared the chief.

It was decided to order the companies to put up proper wiring.

Fire Chief Aitken suggested to the committee that all persons interfering with fire alarm boxes be prosecuted, and this will be done.

The Newboys.

The newboys will not be furnished with a place to warm their feet. Some time ago, the board of works reported that the request of the boys could not be granted, as the streets were narrow, and unsuited for such obstructions. Ald. Wright thought the matter had not been properly investigated, and the communication was sent to No. 3 committee. He reported last night that it was impossible to accede to the request of the lads, and so the matter was dropped.

Ald. Rose declared that the bridges and railway crossings of London were badly lighted, and as the council has not reached the maximum number of lights under the agreement, it was decided to request the city engineer to investigate the crossings and bridges, and if necessary erect the lights needed.

Those present were Ald. Wright (chairman), Ald. Murphy, Ald. Rose, Ald. Ashplant, Fire Chief Aitken, Market Clerk Baker, and Secretary Baker.

CLASH AT KINCARDINE

Kincardine, Nov. 13. — A special meeting of the water and light commission was called last evening regarding the deadlock of the town council and the water and electric light commission, when the commission considered the demand made by the town council was considered to be simply a lack of confidence in the water and light commission, and this body, working upon this idea, at once tendered their resignation. The resignation was signed individually by each member of the commission and handed in to the town council.

The water and electric light commission has been, until this year, unable to make this department pay, and the commission just resigned has been able to put it upon a paying basis, and would have cleared up all indebtedness at the end of the year had the council accepted the proposition of the commission.

The water and electric light commission by its action now has lost a valuable ground. They have been the means of regulating many irregularities and the way was open for having the duties of that body conducted on business principles, which has not been done for many years.

RESULTS OF ELECTIONS  
FOR ADVISORY COUNCIL

Names of the Representatives  
of Western and Queen's  
Universities Not Yet  
Submitted.

Toronto, Nov. 14.—The result of the election of members to the Advisory Council of Education was made known by Hon. Dr. Pyne, minister of education, yesterday. The list of official members is complete except for the names of the Queen's and Western University representatives, which have not been reported.

The following have been elected: Ex-officio Members—John Seath, LL.D., superintendent of education; Rev. R. F. Falconer, D. D., president University of Toronto.

University Representatives—Maurice Hutton, LL.D., principal University College, Toronto; Rev. Provost Macklem, M. A., Trinity College, Toronto; Professor J. C. Robertson, M. A., Victoria College, Toronto; Rev. A. McCann, LL.D., McMaster University, Toronto; Rev. A. B. Roy, O. M. L., University of Ottawa.

High School Representatives—Gilbert A. Smith, M. A., Toronto; A. P. Gundry, B. A., Stratford.

Public School Representatives—Harriet Johnston, Toronto; James D. Denny, B. A., Ottawa; T. A. Reid, Owen Sound; R. F. Downey, B. A., B. Paed., Peterborough.

Separate School Representative—John J. Rogers, Lindsay.

Public School Inspectors' Representatives—N. W. Campbell, B. A., Durham; T. A. Craig, Kemptville.

School Trustees' Representatives—John H. Laughton, Parkville; J. J. Morrison, Arthur.

Sure It's So.

## PEOPLE NOT LIKELY TO VOTE, \$50,000

West Londoners Are Afraid Too  
Much Is Being Asked for  
the Breakwater.

ALD. ASHPANT POPULAR

West Londoners Are Grateful for the  
Part He Took in Having the Wall  
Repaired.

The breakwater, the Wharncliffe bridge, and the proposed change from double to single sessions in the kindergartens were the principal topics for discussion at the meeting of the West London Progressives on Wednesday evening. President Nichols presided.

Since Ald. Ashplant's special meeting to consider the breakwater problem has been realized, their committee appointed to represent the Progressives to wait on the council, were discharged. Some present thought it wise to have this committee of three become a permanent body, and attend every session of the council to advocate their interests, but the majority present felt that a move of this kind was too much of the "dog in the manger" style.

Repairing the Wall.

The association also decided to cease the centenary of the council in regard to the breakwater, since the city engineer had been ordered to repair the wall. Several members agreed with the statement made by Mr. James Heavey, jun., that \$50,000 was a sum of money too great to repair the breakwater.

"If a \$50,000 breakwater bylaw is submitted to the ratepayers it will be defeated for sure," said Mr. Heavey. "It would be far better to submit a \$20,000 or a \$25,000 proposition, which would build a reasonable embankment. If the larger sum is voted on by the ratepayers, while if the citizens saw that our demands were reasonable, the chances for the bylaw carrying would be greatly increased."

Breakwater or Bridge.

Again, the Progressives thought it would be a wise policy to drop one of their schemes, the breakwater or the bridge, and place all their energy in obtaining one of these two necessities. The breakwater was the more important, and they should devote themselves to this. If they endeavored to obtain both, they might draw a blank as a result. However, like other topics introduced, this question was dropped before a decision was arrived at.

Ald. Ashplant did a good stroke of business among the West End citizens when he took such a keen interest in the repair of the breakwater. All sorts of bouquets were thrown in his direction, and in recognition of his services, Vice-President James J. Clark and E. A. Pocock were the principals in making the aldermanic legislator an honorary member of the association. All present were unanimous that Ald. Ashplant was one of the few worthy members of the present council. Ex-City Engineer Graydon is evidently not so popular in the West End resort. One member wanted a motion passed opposing his appointment to any department of the city engineering. This motion was not carried.

The School Age.

Considerable opposition was expressed to raising the compulsory school age to 16 years. According to Mr. Ed. Pudney, this was a burden on the workingman with a large family. He was strongly opposed to the measure, and several others were of a similar mind.

Mr. Joseph Lawrence was present, and gave an address which touched on

Famous "Pint of Cough  
Syrup" Recipe

No Better Remedy at Any Price.  
Fully Guaranteed.

Make a plain syrup by mixing two cups of granulated sugar and one cup of warm water and stir for two minutes. Put 2 1/2 ounces of pure Pinex (fifty cents' worth) in a 16-ounce bottle, and fill it up with the Sugar Syrup. This gives you a family supply of the best cough syrup at a saving of \$2. It never spoils. Take a teaspoonful every one, two or three hours.

The effectiveness of this simple remedy is surprising. It seems to take hold instantly, and will usually stop the most obstinate cough in 24 hours. It tones up the faded appetite and is just laxative enough to be helpful in a cough, and has a pleasing taste. Also excellent for bronchial trouble, throat tickle, sore lungs and day, and he saw no reason for this amount of work trying them.

To Run a Slate.

Mr. Lawrence advocated a union of West and East London Progressives and the central Real Estate Association to nominate candidates of their own choosing to run for the city council. He declared the present governing body to be an absolute failure. He considered the federal square to be a wild goose chase and the men who favored it were fit candidates for the lunatic asylum. Mr. Lawrence was accorded a vote of thanks for his address.

A resolution was placed before the meeting and carried to oppose the pro-

# BOVRIL

THE BODY-BUILDER.

Its virtues are that it comprises all the valuable elements of beef—that it is in such a form that it is very easily digested and assimilated—that it assists the digestion and absorption of ordinary food.

## Easy to Get Rid of Dandruff and Stop Hair From Falling

Parisian Sage Hair Tonic Will Make Any Person's Hair Luxuriant  
and Fascinating.

## LOOK OUT FOR IMITATIONS

Give Parisian Sage a chance to drive every particle of disgusting dandruff from your hair.

Give it a chance to soak into the hair roots and stop the hair from falling out.

You won't be sorry if you do—you'll be dandruff dirty all your life if you don't.

And when you get a bottle of Parisian Sage you are not throwing any money away, because it is guaranteed to eradicate dandruff; to stop falling

hair and itching scalp in two weeks or money back.

It is not a dye and does not contain poisonous lead; if you think lead that colors the hair is safe to use ask your doctor or druggist.

Parisian Sage kills the dandruff germ because of its peculiar power to get to the roots of the hair; right where the germs thrive and multiply.

But besides killing the germs it supplies nourishment to the hair; stops it from falling out and causes it to grow thick and luxuriant.

Parisian Sage is a most delightful hair dressing, not sticky or greasy. A large bottle for only 50 cents at druggists, department stores, and toilet goods counters everywhere. All druggists guarantee it.
